DIGITALAIKART

2026-27 EDITION

The Aadhaar + PAN Fix Playbook

Fix the mismatch. Reactivate your PAN.
Unblock your KYC — without an agent.

10	17	6	₹176
PARTS	QUICK ANSWERS	CASE FILES	TYPICAL TOTAL

AUDIT · AADHAAR · PAN CR-01 · LINKING · SIX CASE FILES · TRAPS · 30-DAY PLAN

Every fee, form, section and deadline verified against UIDAI and Income Tax Department sources on 4 November 2026.

Income-tax Act, 2025 · Income-tax Rules, 2026 · PAN CR-01 · Rule 158 · Rule 162

Read This First

Your bank says your KYC failed. The income tax portal says your PAN is inoperative. The Aadhaar centre wants a document you do not have. Somebody on WhatsApp is offering to fix all of it for ₹2,500. And a refund of ₹18,400 has been sitting unpaid for four months.

None of those are separate problems. They are one problem: **three records of the same person that do not match each other.** This playbook fixes the record, not the symptom — built on what the rules say after the Income-tax Act, 2025 and the Income-tax Rules, 2026 replaced the old framework on 1 April 2026.

What you can fix with this book

- An Aadhaar name, address, date of birth, gender, mobile or email that is wrong, outdated or unsupported by documents.
- A PAN that does not match Aadhaar, using the new PAN CR-01 form that replaced the old correction request.
- A PAN that has gone inoperative because Aadhaar was never linked — and the ₹1,000 fee that comes with it.
- A bank, demat, mutual fund, employer or insurance record that still carries the old version of you.
- A refund, TDS credit or Form 26AS entry that is stuck because of any of the above.

How to use it

Do not read this cover to cover and then act. Work in this order — the records have a hierarchy, and doing it backwards wastes money and your only allowed date-of-birth change.

1. **Audit first (Part 2, about 12 minutes).** Write down exactly what each record says. Guessing is how people pay twice.
2. **Fix Aadhaar next (Part 3).** Aadhaar is the base record. PAN has to match it, and from 1 April 2026 that matching is checked strictly.
3. **Fix PAN after that (Part 4).** Only once Aadhaar is right. Otherwise you correct PAN to match a wrong Aadhaar and do it again.
4. **Link and reactivate (Part 5).** ₹1,000 fee, challan, 30 days.
5. **Push the correction downstream (Part 7).** Bank, employer, demat, insurer. A corrected PAN does not travel by itself.

> **Verified as of 4 November 2026**
> Every fee, form number, section and deadline here was checked against UIDAI and Income Tax Department material on 4 November 2026. Fees and portals do change — re-check the Appendix links before you pay.

> **What this is not**
> This is a practical guide, not legal or tax advice, and it is not a substitute for a chartered accountant on a disputed assessment. It also cannot change what an officer decides — it can only make sure you send the right document, to the right portal, the first time.

Contents

Part 1 — **Why your KYC keeps failing**
The three-record model, and what changed on 1 April 2026

Part 2 — **The 12-minute record audit**
Six checks that tell you exactly which record to fix

Part 3 — **Aadhaar: the free fixes and the paid ones**
Fees, the Aadhaar app, update limits, rejection reasons

Part 4 — **PAN: correcting it the 2026 way**
PAN CR-01, e-KYC route, fee table, tracking

Part 5 — **Linking and reactivation**
₹1,000 challan, 30-day rule, what stays blocked

Part 6 — **Six real cases, solved end to end**
Marriage, DOB typo, single name, initials, NRI, turning 18

Part 7 — **Downstream: bank, employer, refunds**
Re-KYC, Form 16, 26AS, demat and insurance

Part 8 — **The trap list**
Nine ways people lose money on a ₹75 job

Part 9 — **Your 30-day plan**
Calendar, printable checklists, escalation ladder

Part 10 — **Seventeen questions people ask**
Short, direct answers to what actually blocks people

Appendix — **Official links, fees, helplines**
One page you can screenshot and keep

PART 1

Why Your KYC Keeps Failing

One identity, three records, and a rule change that made the gaps visible

There is only ever one reason a KYC, a PAN-Aadhaar link, a TDS credit or a refund fails: two systems compared a field and the values were not identical. Not similar. Not obviously the same person. Identical, character for character.

The three-record model

Think of your identity as one master record with copies taken from it at different times.

Record	Who holds it	What it is	How it changes
Aadhaar	UIDAI	The base record. Name, date of birth, gender, address, mobile, email, biometrics.	Update online or at an Aadhaar centre, with documents.
PAN	Income Tax Department	The tax record. Built from an application you filed, not copied from Aadhaar.	Form PAN CR-01 (individuals) at Protean or UTIITSL.
Copies	Bank, demat, mutual fund, insurer, employer	Snapshots taken when you opened the account or joined the job.	Re-KYC, or a written correction request to that institution.

Almost everyone assumes PAN is copied from Aadhaar. It is not. Your PAN was created from whatever you wrote on a form — often years earlier, often filled in by an agent, often with a spelling the agent chose. That is why a person can have a perfectly valid Aadhaar and a PAN that has never matched it.

What changed on 1 April 2026

The Income-tax Act, 1961 was replaced by the **Income-tax Act, 2025**, and the Income-tax Rules, 1961 by the **Income-tax Rules, 2026** (Notification 22/2026, G.S.R. 198(E), dated 20 March 2026, in force from 1 April 2026). Four things in that change matter to you.

Old	New, from 1 April 2026	What it means for you
Section 139AA, section 234H, Rule 114AAA	Section 262(6) of the Income-tax Act, 2025, with Rules 158 and 162	Same obligation to link, new legal basis. The ₹1,000 fee is now in Rule 158(10); the consequences of not linking are in Rule 162.
One generic correction request for everyone	Form PAN CR-01 (individuals), Form PAN CR-02 (non-individuals)	Corrections use a new form under Rule 158(12). It asks for more fields, including both parents' names.
Form 49A / 49AA for a new PAN	Forms 93, 94, 95 and 96	Only for fresh applications. Existing PANs stay valid; you do not need to re-apply.
Loose matching in practice	PAN identity details must align exactly with Aadhaar during verification	A spelling difference that survived for years is now the thing that fails.

The consequence people underestimate

While your PAN is inoperative under Rule 162, four things stop: no refund is issued, no interest accrues on a refund, tax is deducted at a higher rate under section 206AA, and tax is collected at a higher rate under section 206CC. Rule 162(3) routes the higher rates to section 397(2). The refund does not disappear — it is held. The interest does disappear, permanently, for the period the PAN was inoperative.

Who is actually exempt from linking

A small group is outside the inoperative-PAN consequences, under Notification 37/2017 and the department's Link Aadhaar FAQ. If you are in one of these groups, do not pay ₹1,000:

- A resident of Assam, Jammu & Kashmir or Meghalaya.
- A non-resident, as defined in the Income-tax Act.
- A person who was 80 years or older at any time during the previous year.
- A person who is not a citizen of India.

Everyone else who was allotted a PAN on or before 1 July 2017 and did not link it by 30 June 2023 is in scope. A second group joined them: under Notification No. 26/2025, PANs issued against an Aadhaar Enrolment ID had to intimate the actual Aadhaar number by 31 December 2025, and those that were not became inoperative from 1 January 2026.

The four mismatch patterns

Before you touch any form, identify which pattern you are in. Every later step depends on it.

Pattern	What you see	Fix order
Aadhaar is wrong	Aadhaar spelling or date differs from your school certificate, passport or bank record	Aadhaar first, then PAN, then bank
PAN is wrong	Aadhaar is correct and consistent with your documents; PAN is not	PAN only — do not touch Aadhaar
Both wrong, differently	Two different errors in two systems	Aadhaar first (base record), then PAN to mirror it
Only a copy is wrong	Bank, employer or insurer holds an old version	Correct that institution; leave Aadhaar and PAN alone

PART 2

The 12-Minute Record Audit

Write down what each record actually says before you change anything

This is the step people skip, and it is the reason people pay for the same correction twice. You need three documents open side by side: your e-Aadhaar, your e-PAN, and your bank passbook or statement. Twelve minutes, once.

Check 1 — Pull the records, not the memories

- **e-Aadhaar:** myaadhaar.uidai.gov.in, or the Aadhaar app. Use the PDF, not a photo of the card. The card and the digital record can differ if an update is pending.
- **e-PAN:** download free from the income tax e-filing portal or from Protean or UTIITSL. The e-PAN reflects the current PAN database, which is what verification reads.
- **Bank:** ask the branch for the details on your CKYC record. What is printed in your passbook is not necessarily what the CKYC registry holds.

Check 2 — Compare the seven fields that matter

Not the whole card. Seven fields. Compare them character by character, including full stops after initials and the order of words.

Field	Aadhaar	PAN	Bank / CKYC	Match?
Name (exactly as printed)				
Date of birth (DD/MM/YYYY)				
Gender				
Father's name				
Address				
Mobile number				
Photo / signature				

Print this page, or copy the table into a notes app. Fill it in. The mismatch will be obvious in under a minute once the values are written down, and you will stop arguing with a call centre about a difference you cannot name.

Check 3 — Name: the four differences that break links

Difference	Example	What usually happens
Expanded vs initials	Aadhaar: RAJESH KUMAR SHARMA; PAN: R K SHARMA	Link or KYC fails. PAN correction is the fix.
Surname position	Aadhaar: SHARMA RAJESH KUMAR; PAN: RAJESH KUMAR SHARMA	Sometimes passes, often fails. Align the order.
Spelling	Aadhaar: SONIYA; PAN: SONIA	Always fails. One letter is enough.
Married vs maiden name	Aadhaar: PRIYA NAIR; PAN: PRIYA MENON	Fails. Change Aadhaar first, then PAN.

> **A rule worth memorising**
> Aadhaar is the base record, so you correct **PAN to match Aadhaar**, never the reverse — unless Aadhaar itself is wrong against your underlying documents. If Aadhaar is wrong, fix Aadhaar first and then let PAN catch up. Changing PAN to match a wrong Aadhaar creates a second correction and a second fee.

Check 4 — Is your PAN inoperative right now?

This check is free, needs no login, and takes 30 seconds. Do it before anything else, because if the answer is yes, every other correction gets harder.

1. Open incometax.gov.in. Do not log in.
2. Find **Link Aadhaar Status** under the quick links on the home page.
3. Enter your PAN and your Aadhaar number.
4. Read the result. It will say either that they are linked, or that they are not.

If it says linked, your PAN is operative and Part 5 does not apply to you. If it says not linked, you are in the ₹1,000 group unless you fall in one of the exempt categories in Part 1 — and no other correction will save you from that fee.

Check 5 — Is there an update already pending?

Filing a second Aadhaar update while the first is processing is one of the most common ways people create a mess: the new request can be rejected because the record is locked. Check **Check Aadhaar Update Status** on the myAadhaar portal or **Track my request** in the Aadhaar app. If a request is in process, wait. UIDAI allows up to 90 days for processing.

Check 6 — Decide, then stop researching

Fill this in and commit to it. The rest of the book is the execution detail for whichever line you tick.

☐ Aadhaar is correct and PAN is not → go to Part 4, do a PAN correction only.

☐ Aadhaar is wrong → go to Part 3, fix Aadhaar, then Part 4.

☐ Both are fine but PAN is not linked → go to Part 5, pay ₹1,000, link, wait 30 days.

☐ Aadhaar and PAN both fine and linked, but bank or employer differs → go to Part 7.

☐ You have never held a PAN or lost the number → go to Part 4, the last section.

PART 3

Aadhaar: The Free Fixes And The Paid Ones

What you can do from your phone tonight, and what needs a centre visit

Most Aadhaar problems that people pay agents ₹500 to ₹2,000 to solve can be solved free, tonight, from a phone. The rest need one centre visit and ₹75 or ₹125. The trick is knowing which is which before you travel.

The free windows, and when they close

UIDAI is currently running three temporary waivers. All three are dated, and all three will end.

What is free	Where	Until
Document update (submitting proof of identity or address online)	myAadhaar portal	14 June 2027 — extended by UIDAI office memorandum dated 13 May 2026
Email address update	Aadhaar app	31 December 2026
Biometric update for children aged 7 to 15 (mandatory biometric update window)	Aadhaar centre	30 September 2027

The first waiver is the important one. Normally a document update at a centre costs ₹75. Through myAadhaar it is currently free — and the free route is the same one that actually fixes a mismatch, because the document is what proves the new spelling, not the form.

The full fee table

Service	Where	Fee
Aadhaar enrolment (first time, any age)	Centre	Free
Demographic update — name, gender, date of birth, address, mobile, email	Centre	₹75
Biometric update — fingerprints, iris, photograph	Centre	₹125
Demographic update done together with a paid biometric update	Centre	Free (the ₹125 covers it)
Document update (PoI / PoA upload)	myAadhaar portal	Free until 14 June 2027; ₹75 at a centre
Email update	Aadhaar app	Free until 31 December 2026
Biometric update, child aged 5 to 7 (first one)	Centre	Free
Biometric update, aged 15 to 17 (first or second)	Centre	Free

> **If a centre asks for more**
> The only amounts an Aadhaar centre may charge are ₹75 for a demographic update and ₹125 for a biometric update. Anything else — a 'typing charge', a 'form charge', a 'fast-track charge' — is not a UIDAI fee. Free biometric updates must be done as a standalone transaction; if the operator bundles something else into it, the free waiver does not apply.

The Aadhaar app: what it can do

The Aadhaar app (package **in.gov.uidai.pehchaan** on Android, App Store id 6744029871 on iOS) is the official UIDAI app. It needs Android 9 or iOS 16 and above. It is not the old mAadhaar app and it is not a private app with a similar name — check the publisher before installing.

What it does today: mobile number update, address update, biometric lock and unlock, selective sharing of your Aadhaar Verifiable Credential, authentication history, e-Aadhaar download, contact card sharing, and tracking of a request you have already filed.

Registering

1. Install the app, choose your language.
2. Enter your Aadhaar number and accept the terms.
3. Choose the SIM card in the phone that is linked to your Aadhaar.
4. Complete face authentication.
5. Set a 6-digit PIN. This PIN is the lock on the app — do not share it with anyone, including someone claiming to be from UIDAI.

Updating your mobile number without visiting a centre

This is the fix for the most common block of all: an Aadhaar linked to a number you no longer use, which locks you out of every OTP service in the country. Inside the app, choose mobile number update, enter the new number, verify with the OTP sent to the **old** number, and complete face authentication.

One limit to know before you start: the app route needs the old number to still receive an OTP. If the old number is dead, or if no mobile number was ever registered against your Aadhaar, the app cannot help and you must go to a centre with your biometrics — that is a ₹75 demographic update.

Updating your address online

Address update on myAadhaar needs a registered mobile number and one valid Proof of Address in your own name. Upload the document, submit, note the Update Request Number. If you have no document in your own name — a very common situation for people living with family — UIDAI allows a **Head of Family** based update, where the HoF declares that you live there and submits their own proof of address plus a self-declaration.

The three updates that need a centre, and why

Name, gender and date of birth cannot be changed online. They need an operator, biometric authentication and a document checked at the counter. Plan one visit and carry originals plus photocopies.

> **Know your limits before you use one**
> UIDAI caps these: **name can be updated twice** in a lifetime, **gender once**, and **date of birth once**. That is not a suggestion. A wrong date-of-birth application is not a mistake you get to make twice, which is why the next section is the most important page in this part.

Date of birth: the one change you cannot redo

UIDAI treats a birth certificate as the legal proof of date of birth. What you must submit depends on what was submitted before.

What was submitted at enrolment	What you need now
A birth certificate	A corrected birth certificate with the same registration number
A school leaving certificate, marksheet or passport	A corrected version of that document, or a birth certificate
Nothing usable, or you do not know	A birth certificate is the safest route; a sworn affidavit on stamp paper may be accepted in specific cases

Two situations that trip people up. First, a woman who changed her name on marriage can submit the date-of-birth document issued in her pre-marriage name, provided she also carries evidence of the name change — the marriage certificate does it. Second, if your school certificate and your birth certificate disagree, UIDAI will go with the birth certificate; fix the school record separately rather than arguing at the counter.

Name change: what is a correction and what is a new name

Type of change	Example	What is needed
Minor correction or initials	SONIYA to SONIA; R K SHARMA to RAJESH KUMAR SHARMA	A Proof of Identity showing the desired spelling. No gazette.
Surname change after marriage	PRIYA NAIR to PRIYA MENON	Marriage certificate, plus a photo identity document in the old name if the certificate carries no photograph
Full name change, or change of first name	MOHAMMED ARIF to ARIF KHAN (new first name)	Gazette notification of name change, used as the Proof of Identity

A marriage certificate is on UIDAI's list of acceptable Proof of Identity documents. If it carries your photograph, it stands alone. If it does not, carry it together with a photo identity document in your old name — passport, PAN or voter ID — so the counter can see the same face across both names.

When you have used up your limit: the exception route

If your name or gender change is refused because you have already used your allowed updates, there is a formal route. Visit an Aadhaar centre, place the update request, and the centre will give you a URN. Send that URN with your reason and documents to UIDAI at **help@uidai.gov.in**, or call **1947**. This is UIDAI's exception handling process for name and gender updates; it is slower than a counter update but it exists, and it is free to ask.

Tracking, and how long it really takes

Two numbers confuse everyone. The **EID** is the 28-digit Enrolment ID from your original enrolment slip — you will almost never need it after enrolment. The **URN** is the Update Request Number issued for each update you file, and it is the one you track with. Keep the acknowledgement slip; photograph it and store it, because the URN is the only reference UIDAI will accept on a call.

UIDAI allows up to 90 days for processing an update. Most are done in 7 to 30 days, but do not plan a house purchase, a passport application or a bank re-KYC around an assumption. If 90 days pass with no result, that is your escalation trigger.

Nine rejection reasons and the exact fix

Reason shown	What it actually means	Fix
Document not acceptable	The document type is not on UIDAI's list, or is expired	Use a document from the current list in the Appendix; check the validity date
Name in document does not match	The document spells it differently from your request	The document must carry the exact spelling you are asking for
Blurred or unreadable	Photograph instead of scan, or low resolution	Scan at 300 dpi, crop to the page, keep it under the portal size limit
Incomplete document	Front page only, or the address page missing	Upload the full document including the page with your name and address
Address proof not in your name	A relative's bill submitted as your own	Use the Head of Family route instead
Date of birth mismatch	The document's date differs from the request	Correct the document first; do not request a date the document does not show
Biometric authentication failed	Fingerprints not matching at the counter	Ask for iris authentication; carry a second ID
Request already in process	A previous update is still pending	Wait for it to complete, then file
Photograph rejected	Old photo, or a photo of a photo	Ask for a fresh photograph at the centre during the same visit

PART 4

PAN: Correcting It The 2026 Way

New form, new fees, two authorised portals — and one rule about matching

Until 31 March 2026, a PAN correction was a generic request that treated every applicant the same. From 1 April 2026 it is a specific form with specific fields, under Rule 158(12) of the Income-tax Rules, 2026, read with section 262(4) of the Income-tax Act, 2025. The practical difference: the form now asks for your father's name **and** your mother's name, and makes you choose which one prints on the card. Fill it carelessly and you have created a new mismatch.

Which form, which portal

You need	Form	Where
Correction in an existing PAN (individual, HUF)	PAN CR-01	Protean eGov or UTIITSL, online or at a PAN centre
Correction in an existing PAN (company, firm, trust, other)	PAN CR-02	Protean eGov or UTIITSL
A brand-new PAN (resident individual)	Form 93	Protean eGov or UTIITSL
A brand-new PAN (non-individual Indian entity)	Form 94	Protean eGov or UTIITSL
A brand-new PAN (foreign individual, OCI)	Form 95	Protean eGov or UTIITSL
A brand-new PAN (foreign non-individual)	Form 96	Protean eGov or UTIITSL

Both Protean (formerly NSDL e-Gov) and UTIITSL are authorised by the Income Tax Department. You may use either, regardless of who issued your original PAN. The old advice to 'use the same portal that issued your PAN' is not a requirement — but it does help, because your record and acknowledgement history sit there.

The rule that decides everything: match Aadhaar

Since 1 April 2026, PAN identity details must align exactly with Aadhaar during verification, and Aadhaar is not always accepted as standalone proof of date of birth in a correction. Two consequences follow.

- **Do not improve your PAN spelling.** If Aadhaar says SONIYA, do not correct PAN to SONIA because it looks better. It will fail verification. Correct Aadhaar first if the spelling is genuinely wrong.
- **Carry a date-of-birth document.** Even with Aadhaar, keep a birth certificate or matriculation certificate ready for a date-of-birth correction.

Step by step on Protean, the paperless route

1. Open the Protean PAN services page and choose **Changes or Correction in Existing PAN Data** as the application type.
2. Enter applicant category, name, date of birth, email, mobile, citizenship and your existing PAN. Accept the consent checkbox and submit.

3. Note the **token number** that arrives by email. Click through to the form. If the session times out, the token lets you resume instead of starting again.
4. Choose **Submit digitally through e-KYC and e-Sign**. This is the fastest and cheapest route and it needs no courier, no notary and no photo pasting.
5. Decide whether you want a physical card. If yes, you will need the last four digits of your Aadhaar.
6. Tick only the fields you are correcting. Every extra tick is an extra document and an extra reason to be rejected.
7. Enter your contact details. On the paperless route your address is fetched from Aadhaar — this is why Aadhaar has to be correct first.
8. Upload the supporting documents, photograph and signature as required.
9. Review the Aadhaar details. You will be asked for the first eight digits during the review step; the e-KYC flow authenticates against UIDAI.
10. Pay and save the acknowledgement number. Screenshot it, and email it to yourself.

> **Why the e-KYC route wins**
> It costs less, it needs no courier, and the data is pulled from UIDAI rather than typed by you — which removes the single largest source of new errors. Use it unless you are correcting something e-KYC cannot carry, such as a photograph that fails the automated check.

What each correction actually requires

Correction	Documents to carry
Name (including after marriage)	Proof of identity in the new name, plus name-change proof — marriage certificate, divorce decree or gazette notification
Date of birth	Birth certificate, matriculation certificate or passport. Aadhaar alone may not be accepted for this field
Address	Fetched from Aadhaar in paperless mode; otherwise a utility bill, bank statement or rent agreement not older than three months
Mobile number or email	Nothing extra — entered in the form and verified by OTP
Photograph or signature	A recent colour photograph and a signature inside the box, not touching the edges
Father's / mother's name and which prints	Proof of identity of the parent, and a clear choice of which name prints on the card

The fee table, with nothing hidden

Submission mode	What you get	Fee (incl. taxes)
Paperless, e-KYC and e-Sign	Physical PAN card, dispatched within India	₹101
Physical documents	Physical PAN card, dispatched within India	₹107
Either mode	Physical PAN card, dispatched outside India	₹1,011 to ₹1,017
Paperless, e-KYC and e-Sign	e-PAN by email only, no physical card	₹66

Submission mode	What you get	Fee (incl. taxes)
Physical documents	e-PAN by email only, no physical card	₹72
Reprint only, no change of details	Physical PAN card within India	₹50

Fees are set by the service providers and are revised from time to time, so confirm the amount on the payment screen before you pay. The fee is non-refundable whether the application is approved or rejected — which is the practical reason to get the documents right the first time.

Tracking, and what a rejection means

You get a 15-digit acknowledgement number. Track it on the portal you applied through, or send **NSDLPAN followed by the acknowledgement number to 57575** for Protean applications. Protean's helpline is 020-27218080; UTIITSL's is 033-40802999. Both are call-centre numbers, not premium lines — if a 'PAN agent' gives you a different number, you are being routed to a private shop.

Rejection reason	The real cause	What to do
Name does not match proof	Spelling in the document differs from the form	Reapply with the exact spelling from the document
Date of birth proof not accepted	Aadhaar submitted alone for a DOB change	Attach a birth certificate or matriculation certificate
Photograph not as per specification	Wrong size, background or a scanned print	Use a fresh photograph against a plain light background
Signature outside the box	Signed over the border or too large	Sign again inside the box, in black ink
Application already exists	A pending correction against the same PAN	Wait for the first to close; two live requests block each other
PAN quoted is wrong	Transposed digits	Recheck against the e-PAN, not the plastic card
Address proof in another name	Relative's document used	Submit a document in your own name
Parent's name mismatch	Father's or mother's name differs from their own records	Use the spelling exactly as on the parent's PAN

Getting the e-PAN afterwards

Once the correction is approved, download the e-PAN free — from the income tax e-filing portal, or from Protean or UTIITSL using your PAN and acknowledgement number. The e-PAN is the version every verification system reads. Keep the PDF, not a screenshot; a screenshot has no digital signature and some portals reject it.

If you never had a PAN, or lost the number

Use **Know your PAN** on the e-filing portal with your name, date of birth and the mobile number registered against the PAN. If you never had one, apply with Form 93 (resident individual) through Protean or UTIITSL, using the same paperless e-KYC route. If you are a minor, the PAN is applied in the minor's name with a parent as representative — and note that a PAN issued against a parent's Aadhaar must be linked to the child's own Aadhaar once the child turns 18.

PART 5

Linking And Reactivation

The ₹1,000 challan, the 30-day rule, and what stays blocked meanwhile

This part applies only if your Link Aadhaar Status check said 'not linked' and you are not in an exempt category. There is no shortcut, no waiver and no agent who can make it cheaper. The fee is set in Rule 158(10) of the Income-tax Rules, 2026 at ₹1,000, and the reactivation timeline is set in Rule 162(2).

Step 1 — Pay the ₹1,000 correctly

The single most common expensive mistake is paying ₹1,000 to a person instead of paying it as a challan. The department only recognises the challan. Follow this exact path.

1. Go to incometax.gov.in and click **Link Aadhaar** in the quick links.
2. Enter your PAN and Aadhaar number, then click **Continue to Pay Through e-Pay Tax**.
3. Enter your PAN, confirm it, and give a mobile number to receive the OTP.
4. Verify the OTP. You are redirected to the e-Pay Tax page.
5. Click **Proceed** on the Income Tax tile.
6. Select the relevant assessment year, then the payment type **Other Receipts (500)**.
7. Choose the sub-type **Fee for delay in linking PAN with Aadhaar**. The amount of ₹1,000 is pre-filled. Do not edit it.
8. Pay by net banking, UPI, debit card or at a bank counter, and save the challan receipt — the CIN is what you need next.

> **Wait before you link**
> The payment usually takes 4 to 5 days to reflect against your PAN. If you submit the link request immediately after paying, it can fail with a 'fee not received' error, and people then pay a second time. Keep the challan, wait five clear days, then submit the link request.

Step 2 — Submit the link request

Return to **Link Aadhaar**, enter PAN and Aadhaar, and complete the request, quoting the challan details. If your name, date of birth and gender match between the two systems, it goes through. If it does not, you get a mismatch error — and that is not a payment problem, it is a record problem. Go back to Part 3 or Part 4, correct the record, and try again with the same challan.

Step 3 — The 30 days

Under Rule 162(2), your PAN becomes operative within 30 days from the date you intimate the Aadhaar number after paying the fee. Not the same day. Not the next day. Plan around 30 days, and re-run the Link Aadhaar Status check weekly rather than daily.

What is blocked while you wait, and what you can still do

Blocked	Still possible
Refund of any tax due under the Act	Filing a return — filing is allowed, the refund is what waits
Interest on that refund for the inoperative period — this is lost permanently	Claiming TDS credit once the PAN is operative again
Normal TDS rates — deduction moves to the higher rate under section 206AA	Asking your deductor to correct the rate after reactivation
Normal TCS rates — collection moves to the higher rate under section 206CC	Opening a bank account, if the bank accepts other KYC — but expect friction

Two practical notes. First, the higher TDS is not lost money — it is a cash-flow problem that gets settled when you file your return, provided the PAN is operative by then. Second, a bank that refuses a transaction because of an inoperative PAN is following its own KYC policy, not the Income-tax Act; ask for the refusal in writing and take it to the branch head rather than arguing at the counter.

If the link keeps failing

Error	Cause	Fix
Name does not match	Spelling, initials or surname order differ	Correct PAN to match Aadhaar (Part 4). Do not change Aadhaar to match PAN
Date of birth does not match	One system holds a different date	Correct the wrong record first, then retry
Gender does not match	M or F differs	Aadhaar gender update at a centre, ₹75
Aadhaar number not found	Typo, or an Aadhaar that was never generated	Recheck the number; if never generated, enrol first
Fee not received	Challan not yet posted	Wait 4 to 5 days and retry with the same CIN

Delinking, and the minor-PAN case

Delinking is not a self-service option. It is considered only where the PAN holder has no Aadhaar at all, or where the PAN belongs to a minor and the Aadhaar quoted was the parent's. In those cases you apply to your Jurisdictional Assessing Officer. Everyone else should link, because there is no alternative route around Rule 162.

PART 6

Six Real Cases, Solved End To End

Find the one that sounds like you, and follow the order

The general rules in Parts 3 to 5 are correct, but nobody's life is general. These six cases cover the mismatches that account for most of the failures, with the exact order of operations for each. The order matters more than the speed.

Case 1 — Married woman whose surname changed

The situation. Aadhaar still says PRIYA NAIR. PAN says PRIYA NAIR. The bank has PRIYA MENON because the account was updated after marriage. A mutual fund KYC is rejected, and the PAN-Aadhaar link is fine but the bank will not accept the PAN.

1. Do **not** start at the bank. The bank is the copy; the base record has to change first.
2. Aadhaar name update at a centre, ₹75. Carry the marriage certificate and a photo identity in the old name. If the certificate carries your photograph it can stand alone.
3. Wait for the Aadhaar update to be approved. Then PAN correction under PAN CR-01, ₹101 on the paperless route, using the marriage certificate as name-change proof.
4. Download the new e-PAN. Only now go to the bank, the mutual fund and the insurer, with the new e-PAN, the new e-Aadhaar and the marriage certificate.

Timeline and cost. Roughly 3 to 8 weeks end to end; about ₹176 in government fees plus a centre visit. Doing it in the wrong order costs a second round of everything.

Case 2 — Date of birth printed wrong in both records

The situation. Aadhaar and PAN both say 01/01/1990 — the classic placeholder an agent typed when the real date was not known. Your matriculation certificate says 14/08/1989. Every insurance and pension calculation is now wrong.

1. Get a birth certificate. If it exists, order a copy from the municipal registrar. This is the document UIDAI treats as legal proof, and it is the one that ends the argument.
2. Aadhaar date of birth update at a centre, ₹75. Remember: **one change, lifetime**. Do not file until the birth certificate is in your hand.
3. Then PAN correction under PAN CR-01 with the birth certificate attached. Aadhaar alone may not be accepted for a date-of-birth correction.
4. Then update the bank, the insurer and your employer's HR record, in that order.

> **Do not test the system with a guess**
> People file a date-of-birth update 'to see if it works'. That consumes the one allowed change and leaves them with a worse record. If your document is not ready, do not file.

Case 3 — You have a single name, no surname

The situation. Your name is a single word. Aadhaar prints it as one word. PAN has a dot, or a blank surname field, or a repeat of the same word. Forms online reject the application because the surname

field is mandatory.

- In Aadhaar, a single name is stored as a single name. There is no requirement to invent a surname, and inventing one creates a mismatch with every other document.
- In PAN CR-01, use the same single word in the surname field and leave the first name blank, or use the exact structure the form allows — then verify the printed preview before paying.
- Where a bank or an airline insists on two words, ask for the record to be created as 'FNU' (first name unknown) rather than splitting your name.
- If your documents genuinely disagree — passport has one word, PAN has two — correct PAN to match the passport and Aadhaar, not the other way round.

Case 4 — Initials on one record, full name on the other

The situation. PAN says R K SHARMA. Aadhaar says RAJESH KUMAR SHARMA. Every automated check fails, but no human thinks it is a real problem — which is why it stays broken for years.

This is a minor correction, not a name change. No gazette is needed. Correct PAN to the expanded form under PAN CR-01, with Aadhaar as the proof of identity, because Aadhaar already carries the full name. The reverse — shortening Aadhaar to initials — is possible only as a minor correction and is a bad idea, because banks and passport systems prefer the full form.

Case 5 — NRI or OCI holder

The situation. You are an Indian citizen working abroad, or an OCI cardholder. You have a PAN from your time in India. A bank in India has frozen your account pending KYC.

- A non-resident is in the exempt category for PAN-Aadhaar linking under Notification 37/2017, so the ₹1,000 fee and the inoperative-PAN consequences do not apply to you.
- If you hold an OCI card and are not an Indian citizen, you are also outside the linking requirement.
- Your KYC problem is different: it is about the address and the mobile number on record. A non-resident mobile cannot always receive Indian OTPs, and a foreign address often cannot be verified against an Indian address proof.
- Fix the Aadhaar mobile number first if you can — through the app if the old number is alive, otherwise at a centre during your next visit. Then ask the bank for its NRI re-KYC form rather than the resident one.
- For a PAN correction as an NRI, passport is mandatory as proof of identity, and the fee for a card dispatched outside India is ₹1,011 to ₹1,017.

Case 6 — Your child has turned 18

The situation. A PAN was taken for your child years ago, using your Aadhaar as the representative. The child is now 18 and starting to file returns. The PAN is flagged, or the bank refuses the account.

1. The child's own Aadhaar must be linked to that PAN. A PAN linked to a parent's Aadhaar has to be corrected once the holder is an adult.
2. If the child's biometrics were captured before age 15, complete the mandatory biometric update at a centre — free for the 15 to 17 window, and the 7 to 15 waiver runs to 30 September 2027.
3. Correct the PAN so the name and date of birth match the child's Aadhaar exactly, using PAN CR-01.
4. If delinking is genuinely required because the PAN carries a parent's Aadhaar, apply to the Jurisdictional Assessing Officer — this is one of the few cases where delinking is considered at all.

PART 7

Downstream: Bank, Employer, Refunds

A corrected PAN does not travel. You have to carry it.

This is where most people stop, and where the problem quietly comes back six months later. The Aadhaar and PAN are now correct. Every copy taken before today is still wrong. There is no automatic sync between UIDAI, the Income Tax Department, your bank and your employer — and there is not meant to be.

The bank: re-KYC, not a new account

Banks hold your details in CKYC, the central registry. Updating the branch screen does not always update CKYC, which is why a corrected PAN can still fail at another bank.

1. Ask specifically for **re-KYC** and for the CKYC record to be updated — not for a 'detail change'.
2. Carry the new e-PAN, the new e-Aadhaar, and one address proof. If the address changed, carry the proof that matches the new Aadhaar address.
3. Do the re-KYC through Aadhaar OTP where the bank offers it; it is faster and it authenticates against UIDAI directly.
4. Ask for a written acknowledgement or a reference number. Without one, there is no evidence you did it.
5. Check the result in a month by trying a small transaction or asking for the updated CKYC record.

The employer: payroll and Form 16

Your employer deducts TDS against the PAN in its payroll master. If that PAN was inoperative for part of the year, tax was deducted at the higher rate, and your Form 16 will show it.

- Give HR and payroll the corrected e-PAN in writing, with the date from which it applies.
- Ask payroll to confirm the PAN in the next Form 24Q before the quarter closes — not after.
- If higher TDS was already deducted, the excess is claimed when you file your return. Ask payroll for a corrected Form 16 if the PAN itself was wrong in the records.
- If you changed jobs mid-year, both employers need the corrected PAN, or the credit will be split against two different numbers.

Form 26AS and AIS: when the credit does not appear

Form 26AS and the Annual Information Statement are built from the PAN that the deductor quoted. A TDS credit that is missing is almost always a deductor error, not a portal error.

1. Download 26AS and AIS from the e-filing portal and find the entry that is missing or short.
2. Identify the deductor — employer, bank, or a client who deducted TDS.
3. Ask the deductor to file a correction statement for that quarter, quoting the correct PAN.
4. If the deductor does not act, raise a grievance on the e-filing portal with the deductor's TAN and the payment details.

5. Do not file a return claiming a credit that is not in 26AS and hope it is accepted. Either the credit is corrected first, or the return is revised after it is.

Demat, mutual funds and insurance

These three hold the oldest snapshots, because accounts opened a decade ago were never revisited. Each has its own KYC record and its own re-validation process.

Institution	What to ask for	Watch out for
Demat (depository participant)	KYC re-validation with the corrected PAN	A frozen demat account blocks selling, not just buying
Mutual funds / RTA	Folio-level KYC update, not just the account	Each folio can carry a different PAN; check every folio
Insurer	Policy record correction with the new PAN	A nominee's PAN also needs to be correct for a claim
Credit card issuer	KYC refresh with the new PAN	An inoperative PAN can trigger a card block without warning

The order of operations, one last time

Aadhaar, then PAN, then link, then bank, then employer, then investments, then insurance. If you reverse any two of the first three, you will redo work. If you skip the last four, the problem returns — not immediately, but at the worst possible moment, which is usually a claim, a refund or a house purchase.

PART 8

The Trap List

Ten ways people lose money on a ₹75 job

Everything in this book can be done for under ₹1,300 in government fees. Every year people pay ten times that to intermediaries who do the same thing, or do nothing. These are the traps, in the order you are likely to meet them.

1. The ₹2,500 'PAN correction agent'

A WhatsApp or Telegram contact offers to fix your PAN for ₹2,000 to ₹5,000. The actual government fee is ₹101 on the paperless route. They fill the same form you can fill. Some take the money and disappear; some submit a form with the wrong documents and consume your one allowed date-of-birth change.

2. Charging for a free Aadhaar document update

Document updates through myAadhaar are free until 14 June 2027. A cyber cafe charging ₹300 to 'upload your document' is charging for five minutes of typing on a free portal — and holding your Aadhaar OTP while they do it.

3. The phishing 'Link PAN' link

An SMS or WhatsApp message says your PAN will be deactivated in 24 hours and gives a link. The page looks like the e-filing portal and asks for your PAN, Aadhaar and OTP. Nothing is deactivated that fast, and the department does not send links. Type incometax.gov.in yourself, every time.

4. Overcharging at the Aadhaar counter

The permitted charges are ₹75 for a demographic update and ₹125 for a biometric update. 'Typing charges', 'form charges' and 'urgent charges' are not UIDAI fees. Ask for a receipt; a genuine centre issues one.

5. Paying the ₹1,000 to a person, not as a challan

The ₹1,000 must be paid as a challan under Other Receipts (500), sub-type 'Fee for delay in linking PAN with Aadhaar', and the CIN is what proves it. Money sent to a person's UPI account is not a payment to the government and cannot be traced to your PAN.

6. 'Improving' the PAN spelling

PAN must match Aadhaar exactly. Correcting PAN to a nicer spelling while Aadhaar still carries the old one guarantees a failed verification and a wasted fee.

7. Filing a date-of-birth change without the document

Date of birth can be changed once. Filing with an affidavit when UIDAI wants a birth certificate risks a rejection, and a rejection still costs you the attempt in practice because the record gets locked during processing.

8. Sharing the Aadhaar OTP or the app PIN

The Aadhaar app PIN and every OTP are the keys to your identity. No UIDAI official, bank official or agent needs them. Anyone who asks is either committing fraud or about to.

9. Submitting a photograph of a document

A phone photo of a certificate is a leading cause of 'document not readable' rejections. Scan at 300 dpi, crop to the page, and check the portal's file-size limit before uploading. A rejected upload can cost you a centre visit and a fresh fee.

10. Fixing a record for someone else without authority

You cannot correct a spouse's, parent's or child's Aadhaar or PAN just because you handle their paperwork. Aadhaar updates need the holder's biometrics at the counter, and a PAN correction needs their signature or a valid authorisation. Doing it 'on their behalf' with a friend at the counter is how families end up with two mismatched records instead of one. An adult child can help an elderly parent by booking the visit, preparing the folder and paying the fee — not by signing as them.

> **The one-line test**
>
> If someone asks for money to do something this book describes, ask them one question: which form, which portal, and what is the government fee? A genuine helper answers instantly. Anyone who cannot name the form is guessing with your identity.

PART 9

Your 30-Day Plan

A calendar, two printable checklists and the escalation ladder

The work is small but it is sequenced, and the sequence is what most people get wrong. Thirty days is realistic, and most of it is waiting for UIDAI and the PAN portal rather than working.

Days	What you do	What you need ready
1 to 3	Complete the audit in Part 2. Run the Link Aadhaar Status check. Write down every mismatch.	e-Aadhaar, e-PAN, bank statement
4 to 7	Order any missing document — birth certificate, marriage certificate, address proof. This is the long pole.	Registrar or municipal office, or your family's document file
8 to 14	File the Aadhaar update — online if it is address, document or mobile; at a centre if it is name, date of birth or gender.	Originals plus photocopies, ₹75
15 to 21	Once Aadhaar is approved, file the PAN correction under PAN CR-01 on the paperless route.	New e-Aadhaar, ₹101
22 to 25	If your PAN was not linked, pay the ₹1,000 challan. Wait five clear days.	PAN, Aadhaar, net banking or UPI
26 to 28	Submit the Link Aadhaar request with the challan details. Track the PAN correction.	Challan CIN
29 to 30	Start the downstream updates — bank re-KYC first, then employer, then investments.	New e-PAN, new e-Aadhaar

Checklist 1 — Before you file anything

☐ I have downloaded the current e-Aadhaar, not used an old printout.

☐ I have downloaded the current e-PAN, not read the plastic card.

☐ I have run the Link Aadhaar Status check and written down the result.

☐ I know whether an Aadhaar update is already pending.

☐ I have identified the exact field that differs, character by character.

☐ I have decided whether Aadhaar is wrong or PAN is wrong — not both by assumption.

☐ I have the supporting document in hand, not ordered.

☐ I know my remaining update limits: name twice, gender once, date of birth once.

Checklist 2 — Before you pay

☐ The fee I am paying matches the table in this book — ₹75, ₹125, ₹101, ₹107 or ₹1,000.

☐ I am paying on a UIDAI or Income Tax Department domain, typed by me, not clicked from a message.

☐ For the ₹1,000, I am paying as a challan under Other Receipts (500), not to a person.

☐ I have saved the acknowledgement number, URN, token number or CIN.

☐ I have photographed the acknowledgement and emailed it to myself.

☐ I have not shared an OTP or my Aadhaar app PIN with anyone.

☐ I know what the next step is and how long it should take.

Fee budget worksheet

Item	Amount	Your case
Aadhaar demographic update at centre	₹75	
Aadhaar biometric update	₹125	
Aadhaar document update online	Free until 14 June 2027	
PAN correction, paperless with physical card	₹101	
PAN correction, e-PAN only	₹66	
PAN reprint only	₹50	
PAN-Aadhaar linking fee	₹1,000	
Total for a typical name-mismatch case (Aadhaar ₹75 + PAN ₹101)	₹176	
Total if linking is also pending	₹1,176	

The escalation ladder

Use these in order. Each step exists because the one before it failed, and each needs the reference number from the step before.

1. **Aadhaar:** the portal or app status check, then the centre, then UIDAI on **1947**, then **help@uidai.gov.in** with your URN.
2. **PAN:** the portal's tracking, then Protean on **020-27218080** or UTIITSL on **033-40802999** with your acknowledgement number.
3. **Tax and refunds:** the e-filing portal grievance module, then your Jurisdictional Assessing Officer through the e-filing 'Know your AO' tool.
4. **Bank:** the branch, then the bank's nodal officer for KYC, then the RBI's complaint portal if the bank has given you a written refusal.
5. **Anything stuck across departments:** CPGRAMS, the centralised public grievance portal, quoting every reference number you have.

Four templates you can copy

Every downstream correction fails for the same reason: the request was verbal. A written request with a reference number is what gets acted on. These four cover almost everything. Replace the bracketed parts, attach the documents named, and keep the acknowledgement.

1 · Letter to your bank for re-KYC and CKYC update

To: The Branch Manager, [Bank name], [Branch and city] Subject: Request for re-KYC and CKYC record update — Account [number] Dear Sir/Madam, My KYC details on record do not match my corrected identity records. I request you to update my record and the CKYC registry with the following, and to confirm in writing. Name as per Aadhaar : [exact name] Date of birth : [DD/MM/YYYY] PAN : [PAN] Mobile : [number] Address : [exact address as on e-Aadhaar] Enclosed: self-attested e-Aadhaar, e-PAN, and address proof. Please issue an acknowledgement number for this request. [Name] · [Mobile] · [Email] · [Date]

2 · Email to payroll after a PAN correction

To: payroll@[company].com ; Cc: hr@[company].com Subject: Corrected PAN for TDS — [Employee ID] Dear Payroll Team, My PAN has been corrected and is now [new PAN], matching my Aadhaar. The earlier PAN on my payroll record was [old PAN / had a name mismatch]. Please update my payroll master before the next Form 24Q filing for Q[X], and confirm the PAN reflected in my Form 16 for FY [year]. Attached: e-PAN (digitally signed PDF), e-Aadhaar. [Name] · [Employee ID] · [Date]

3 · Email to a deductor whose TDS credit is missing

To: [deductor's accounts or finance email] Subject: TDS credit not reflecting in Form 26AS — PAN [PAN], FY [year], Q[X] Dear Sir/Madam, TDS of Rs [amount] deducted on [payment date] against invoice [number] is not appearing in my Form 26AS against PAN [PAN]. The TAN quoted was [TAN]. I request you to file a correction statement for Q[X] of FY [year] with the correct PAN, and to share the revised Form 16A. Kindly confirm the date of filing. Attached: payment advice, bank statement extract, and Form 26AS extract. [Name] · [PAN] · [Date]

4 · Escalation to UIDAI when an update is stuck

To: help@uidai.gov.in Subject: Aadhaar update pending beyond 90 days — URN [URN] Dear Sir/Madam, I filed an Aadhaar update request on [date] at [centre name and code / myAadhaar]. The URN is [URN]. The status still shows as in process after [X] days. Details: Aadhaar [last 4 digits only], update type [name / address / DOB], and the document submitted was [document name]. I request you to review the request and confirm the status. I have not filed a second request, to avoid a duplicate application. [Name] · [Mobile registered with Aadhaar] · [Date]

How to use these

Send from the email or mobile number that is registered with your Aadhaar or your bank, not a new one — most systems reject or delay a request from an unknown contact. Save the sent copy and the acknowledgement number in the same folder as your e-Aadhaar and e-PAN. If the matter escalates, those two numbers are your entire case.

If you remember only five things

1. **Aadhaar is the base record.** PAN must match it, not the other way round.
2. **Do the audit before the form.** Twelve minutes of comparison saves a second fee.
3. **Date of birth is a one-time change.** Do not file without the birth certificate.
4. **The ₹1,000 is a challan, not a payment to a person.** Other Receipts (500), and keep the CIN.
5. **A corrected PAN does not travel.** Bank, employer, demat, insurer — each needs telling.

PART 10

Seventeen Questions People Actually Ask

Short answers, no hedging, based on the rules as they stand today

1. Can I do all of this without visiting an Aadhaar centre?

No. Address, document, mobile and email updates can be done online. Name, gender and date of birth need a centre visit, an operator and a document checked at the counter. Biometric updates also need the centre.

2. My Aadhaar has no mobile number registered. What now?

The app cannot help, because it needs a SIM linked to your Aadhaar. Visit a centre and ask for a demographic update to add the mobile number — ₹75. Once it is registered, everything else becomes possible online.

3. Will correcting my PAN change the PAN number?

No. A correction under PAN CR-01 changes the details on the record, not the number. The PAN number stays the same for life, which is exactly why a wrong spelling on it causes so much trouble.

4. After marriage, do I need a new PAN?

No. It is a correction, not a new application. Change the name in Aadhaar first, then file PAN CR-01 with the marriage certificate as name-change proof.

5. My PAN is inoperative. Can I still file my return?

Yes, filing is not blocked. What is blocked under Rule 162(3) is the refund, the interest on it, and normal TDS and TCS rates. File on time to avoid late fees, and let the refund wait for reactivation.

6. Is the ₹1,000 linking fee charged every year?

No. It is a one-time fee under Rule 158(10), triggered because the link was not made by 30 June 2023. Once paid and linked, it does not recur.

7. I paid the ₹1,000 but linking still fails. Did the payment not go through?

Usually the payment is fine and the records do not match. The portal will say the fee was not received if the challan has not posted yet — that takes four to five days. If it says name, date of birth or gender mismatch, the problem is the record, not the money.

8. Can I link my PAN to a family member's Aadhaar?

No. The Aadhaar must belong to the PAN holder. The one narrow exception is a minor's PAN applied against a parent's Aadhaar, which must be corrected once the holder turns 18 — and delinking in that case goes through the Jurisdictional Assessing Officer.

9. Higher TDS was already deducted because of my inoperative PAN. Is that money lost?

No, it is deferred. Once the PAN is operative, the excess appears as a credit and is settled when you file your return. What you do lose is the interest on any refund for the period the PAN was inoperative.

10. My Aadhaar update has been pending for 60 days. What should I do?

Nothing yet. UIDAI allows up to 90 days. At 90 days, escalate with your URN to help@uidai.gov.in or 1947. Do not file a second request in the meantime — duplicates get rejected and can lock the record.

11. The bank says my PAN is invalid, but the portal says it is operative.

The bank is reading its own CKYC record, which is a copy taken earlier. Ask specifically for re-KYC and a CKYC update, in writing, with the new e-PAN attached.

12. Can an agent get my Aadhaar or PAN fixed faster?

No. There is no expedited channel, no priority queue and no official intermediary for either. Anyone promising speed is either guessing or charging for a form you can fill yourself.

13. Does an Aadhaar update change my Aadhaar number?

No. Only the details change. The number stays the same for life, and the same number is what every linked system holds.

14. My marksheet and my birth certificate show different dates of birth. Which one wins?

UIDAI treats the birth certificate as the legal proof of date of birth. Fix the school record separately — do not file an Aadhaar change against the marksheet when a birth certificate exists.

15. I am 80 or older, or an NRI. Do I have to link?

No. Residents of Assam, Jammu & Kashmir and Meghalaya, non-residents, people who were 80 or older during the previous year, and non-citizens are outside the inoperative-PAN consequences under Notification 37/2017.

16. Can I change my date of birth online?

No. It needs a centre visit and a document. It is also the one field with a lifetime limit of one change, so prepare the document before you go.

17. Is the e-PAN acceptable as ID, or do I need the plastic card?

The e-PAN is a valid, digitally signed document and is accepted for KYC. Keep the PDF rather than a screenshot, because a screenshot has no digital signature and some portals reject it.

APPENDIX

Official Links, Fees And Helplines

Screenshot this page and keep it

Where to do what

Task	Official address
Aadhaar updates, status, e-Aadhaar	myaadhaar.uidai.gov.in
Aadhaar information, document list, FAQs	uidai.gov.in
Aadhaar app	Play Store package in.gov.uidai.pehchaan; App Store id 6744029871
PAN correction, new PAN	Protean eGov PAN services, or UTIITSL
Link Aadhaar Status, Link Aadhaar, e-Pay Tax	incometax.gov.in
e-PAN download, Form 26AS, AIS, grievances	incometax.gov.in, after login
Central government grievances	pgportal.gov.in

Every fee in one place

Service	Fee
Aadhaar enrolment	Free
Aadhaar demographic update at a centre	₹75
Aadhaar biometric update at a centre	₹125
Aadhaar document update on myAadhaar	Free until 14 June 2027
Aadhaar email update in the app	Free until 31 December 2026
PAN correction, paperless, card in India	₹101
PAN correction, physical documents, card in India	₹107
PAN correction, e-PAN only	₹66 (paperless) / ₹72 (physical)
PAN reprint with no change	₹50
PAN correction, card outside India	₹1,011 to ₹1,017
PAN-Aadhaar linking after 30 June 2023	₹1,000

Helplines

Who	Number
UIDAI	1947
UIDAI email	help@uidai.gov.in
Protean PAN services	020-27218080
UTIITSL PAN services	033-40802999
Protean PAN status by SMS	Send NSDLPAN <15-digit acknowledgement> to 57575

The 12 dates that decide your case

Date	What it means
1 July 2017	PANs allotted on or before this date had to be linked with Aadhaar
30 June 2023	The deadline; missing it triggers the ₹1,000 fee under Rule 158(10)
31 December 2025	Deadline for PANs issued against an Aadhaar Enrolment ID
1 January 2026	Unlinked Aadhaar-Enrolment-ID PANs became inoperative
20 March 2026	Income-tax Rules, 2026 notified (Notification 22/2026)
1 April 2026	New Act and Rules in force; PAN CR-01 and CR-02 apply
13 May 2026	UIDAI extends free document updates on myAadhaar
14 June 2027	Free document update window closes
31 December 2026	Free email update in the Aadhaar app closes
30 September 2027	Biometric fee waiver for ages 7 to 15 closes
30 days	Time for an inoperative PAN to become operative after linking, Rule 162(2)
90 days	Maximum UIDAI processing time for an update request

Plain-English glossary

Term	Meaning
URN	Update Request Number — the reference for an Aadhaar update you filed
EID	Enrolment ID — the 28-digit number from your original enrolment slip
CIN	Challan Identification Number — proof that the ₹1,000 was paid to the government
CKYC	Central KYC registry — where banks and financial institutions store your KYC record
Inoperative PAN	A PAN that exists but cannot be used for refunds or normal TDS rates until Aadhaar is linked
AIS	Annual Information Statement — the department's view of your financial year
26AS	Tax credit statement — the TDS and TCS credited against your PAN

Term	Meaning
HoF	Head of Family — the route that lets a family member's address proof support your Aadhaar address

One last thing

The whole of this book costs less than ₹1,300 in government fees if you do it yourself. The reason people do not is not difficulty — it is the order. Do the audit, fix Aadhaar, then PAN, then link, then everything downstream. That order is the product.

Aadhaar + PAN Fix Playbook 2026-27 · Digitalaikart · Facts verified 4 November 2026 against UIDAI and Income Tax Department sources. Fees and processes change; re-check the official links before paying. Not legal or tax advice.
