DIGITALAIKART

The AI Prompt Pack for Indian Advocates & Law Firms

100+ copy-paste prompts and the safe-use system for legal practice in 2026

2026 EDITION · UPDATED OCTOBER 2026

The one rule that governs everything: **AI drafts — you verify.**

FAISAL FAYAZ LONE

IMPORTANT NOTICE

Read This First

This pack is a set of drafting aids and a working method. It is not legal advice, and it is not a substitute for your own judgement as an advocate. The prompts in this pack are written to make a general-purpose AI assistant **safer and faster to use**, not to make it an authority on Indian law.

Generative AI tools do not know Indian law reliably. They are excellent at language — structure, tone, first drafts, summaries, translation — and unreliable on statutory detail, current case law and citations. A model will state a repealed provision with confidence and will invent a judgment that reads perfectly. Treat every citation, section number and proposition that comes out of an AI tool as **unverified until you have checked it against an authenticated source.**

> **The single rule of this pack**
>
> AI drafts — you verify. The AI is the junior who never gets to file anything on their own. Every word that leaves your office is yours, and the responsibility for it is yours alone.

Prices, tool names, statutory references and case-law positions in this pack were verified in October 2026. Law and software both move. Before you rely on any figure or reference, check it against the current official source. Where the pack says VERIFY, it means it.

Nothing in this pack should be pasted into a consumer AI tool if it contains privileged, confidential or client-identifying material. Chapter 9 sets out the de-identification method.

WHAT IS INSIDE

Contents

1. Why AI Is Now Standard in Indian Legal Practice

2. The One Rule: AI Drafts, You Verify

3. The Three Traps — and How to Escape Each

4. The Safe-Use System: Eight Rules

5. The Tool Stack for Indian Lawyers (October 2026)

6. The Prompt Formula (R–T–C–C–F–V)

7. The Prompt Library — 105 prompts across ten jobs

8. The BNS / BNSS / BSA Transition Cheat-Sheet

9. Confidentiality, Privilege and the DPDP Act, 2023

10. The AI Use Policy for Your Chambers (fill-in template)

11. The 30-Day Adoption Plan

12. The Red-Flag Checklist and Quick Reference

> **How to use this pack on day one**
>
> Read Chapters 2, 3 and 4 (about fifteen minutes). Paste the Standing Instruction from Chapter 6 into your AI tool. Then open Chapter 7, pick the job you are doing today, and run that prompt. Verify the output. File it.

CHAPTER 1

1. Why AI Is Now Standard in Indian Legal Practice

The Indian bar is one of the largest in the world and AI has already arrived in it. The Ministry of Law and Justice told the Rajya Sabha that **20,13,081 advocates** are registered across the country; the Bar Council of India estimates that roughly **17 lakh** of them practise actively. The working bar is heavily district-level — on most estimates eighty to ninety per cent practise at the district tier — and around eighty per cent work in a regional language rather than English. Industry surveys in 2026 put consumer-AI use among Indian legal professionals at roughly three in every four. Adoption is not the question any more. Discipline is.

The pressure behind that adoption is volume. More than **5 crore cases** sit pending across Indian courts, a figure the National Judicial Data Grid refreshes daily and which stood at about 5.4 crore in May 2026. Court infrastructure is being rebuilt around digital workflows — eCourts Phase III alone carries a ₹7,210 crore outlay. A profession this large, this busy and this newly digital is going to use AI whether or not anyone writes a rule about it.

What AI is genuinely good at

- **Language work.** Turning your notes into a structured first draft, fixing the register of a client letter, compressing a document you have already read, and restructuring a badly organised file.
- **Volume work.** Summarising a large set of documents, building a chronology, extracting dates and amounts, and comparing two versions of an agreement.
- **Orientation.** Giving you the shape of an unfamiliar area of law so that you know what to research properly — not so that you can skip the research.
- **Translation.** Moving between English and the language your client actually speaks, which matters to a bar that works largely in the vernacular.

What AI is not good at

- **Indian statutory detail.** Models are frequently out of date on Indian amendments and will state a repealed provision as current law.
- **Citations.** Assume every citation is wrong until you have checked it against an authenticated source.
- **Judgement about your client.** That is your job, and it is not delegable.

> **Why this pack exists**
>
> The gap is not “should I use AI”. The gap is “how do I use it without committing professional misconduct”. That question now has a hard answer from the Supreme Court of India, and Chapter 2 sets it out.

CHAPTER 2

2. The One Rule: AI Drafts, You Verify

On 2 July 2026 the Supreme Court of India (Narasimha and Aradhe JJ) set aside orders of the NCLT and NCLAT after finding that they relied on judgments that did not exist and on fabricated passages attributed to genuine citations. The Court declared that it is **professional misconduct for an advocate to cite such judgments without verification**, and a serious lapse for a judge to rely on them. A decision tainted by even "an iota" of fake or hallucinated material, it held, is "no decision in the eyes of the law". The Court adopted a "zero-tolerance mode" and directed the Bar Council of India to constitute a committee to frame guiding principles and the disciplinary consequences that follow a breach.

The Court was careful to add that the ruling "shall have no bearing on the rightful use of AI". The prohibition is on **presenting or relying on fake material as though it were precedent** — not on using AI. That is the line this pack is built around.

The same year, in the same direction

When	What happened
July 2026	Delhi High Court set aside an income-tax appellate order after finding it relied on six non-existent citations, and warned that strict action, including disciplinary action, should follow the citation of non-existent judgments.
July 2026	Supreme Court released draft 'Regulations for Use of Artificial Intelligence (AI) in Courts, 2026' for public consultation — permitting AI for legal research, citation verification, summarisation, translation, transcription, drafting assistance and case administration, while requiring disclosure whenever AI is used to prepare a filing.
June 2026	The Bar Council of India told Parliament that advocates must verify all AI-generated legal research and cannot shift responsibility for fake citations or fabricated judgments to technology.
January 2026	Bombay High Court imposed costs on a party for placing fake case law in written submissions, noting the tell-tale formatting of raw AI output.
September 2025	Delhi High Court saw a petition withdrawn after it was shown to quote paragraphs 73 and 74 of a judgment that contains only 27 paragraphs.

> **What this means in practice**
>
> Using AI is permitted. Filing an unverified AI output is not. Your verification step is not optional politeness — it is the difference between assistance and misconduct. Every prompt in this pack is written to keep you on the right side of that line.

CHAPTER 3

3. The Three Traps — and How to Escape Each

Trap 1 — The hallucinated citation

A language model does not look anything up. It predicts the next word. A citation it produces is a plausible-looking string, not a retrieved document. It can give you a real report name, a real-looking volume and page, a real-sounding party name, and a paragraph number that does not exist in the judgment. The Supreme Court's 2026 order found exactly this mix: some citations to judgments that never existed, and some to genuine judgments with fabricated passages attributed to them.

Escape: never take a citation from an AI tool. Get the citation from an authenticated source (SCC Online, Manupatra, or the court's own record), then read the paragraph you intend to rely on. Ask the AI to give you the *search terms* instead of the case, and find the case yourself.

Trap 2 — The repealed-code trap

On 1 July 2024 the Bharatiya Nyaya Sanhita, 2023 replaced the Indian Penal Code, 1860; the Bharatiya Nagarik Suraksha Sanhita, 2023 replaced the Code of Criminal Procedure, 1973; and the Bharatiya Sakshya Adhiniyam, 2023 replaced the Indian Evidence Act, 1872. Every section number the profession had memorised moved. "420" is now Section 318 of the BNS, and "302" is now Section 103. A model trained before or around the change will still say IPC 420 as though nothing happened — and the repeal is not retrospective, so the **date of the conduct** decides which code you cite.

Escape: tell the AI, in the standing instruction, never to present a repealed provision as current law. Then check the mapping yourself on the cheat-sheet in Chapter 8 and against the official text before you draft the pleading line.

Trap 3 — The confidentiality and privilege leak

A consumer AI tool is not your chambers. Material you paste may be stored, reviewed or used to improve the model, depending on the settings. Privileged advice, client-identifying facts, unredacted documents and settlement positions should not be pasted into a consumer chatbot. The Bar Council of India's 2026 circular on digital ethics, confidentiality and misuse of AI-generated material points the same way, and the Digital Personal Data Protection Act, 2023 adds a statutory layer on top.

Escape: de-identify before you prompt. Strip names, addresses, account numbers, dates of birth and any detail that could identify the client, keep the legal question intact, and run the de-identification prompt in Chapter 7 (G9) first. Chapter 9 gives the full method.

> **A one-line test before every paste**
>
> If this passage were read aloud in open court tomorrow, would my client be harmed? If the answer is anything other than a clear no, de-identify it first.

CHAPTER 4

4. The Safe-Use System: Eight Rules

Rule 1 — AI for language, never for law.

Use it to structure, draft, rewrite, summarise and translate. Do not use it as the source of the law. The statute and the case come from an authenticated source; the prose comes from the AI.

Rule 2 — Verify every citation, every time.

No citation reaches a court, a client or an opinion without your having opened the source and read the paragraph. If you cannot find it, it does not exist.

Rule 3 — Never paste privileged or identifying material into a consumer tool.

De-identify first. Keep a client’s identity, documents and settlement position out of the chat.

Rule 4 — Give the AI a standing instruction that forbids invention.

Paste the Standing Instruction from Chapter 6 at the start of every session. It forces the model to say VERIFY instead of guessing.

Rule 5 — Fix the applicable code by the date of the conduct.

Ask which Sanhita applies before you draft a single pleading line. Pre-1 July 2024 conduct stays under the IPC, the CrPC and the Evidence Act.

Rule 6 — Disclose AI use where the forum requires it.

The draft AI-in-courts regulations contemplate disclosure when AI has been used to prepare a filing. Watch for the notified rules in your court and comply with them.

Rule 7 — Keep the human sign-off, and make it a named human.

One person in the chambers reads the output and takes responsibility for it. That person’s name goes on the file note.

Rule 8 — Log what you used.

A short entry in the matter file — tool, task, what you verified, who signed off — is your defence if the output is ever questioned.

CHAPTER 5

5. The Tool Stack for Indian Lawyers (October 2026)

You do not need an expensive stack to work safely. Most Indian practices need three things: a free place to find judgments, an authenticated place to verify them, and one general assistant for the language work. Everything else is an upgrade you buy when your volume justifies it.

Layer 1 — Find (free)

- **Indian Kanoon** — the default starting point. Full-text search across Supreme Court, High Court and tribunal judgments. Free. Its AI layer (Prism) adds upload-and-chat and a counter-argument generator.
- **Official sources** — court websites, the National Judicial Data Grid, India Code, and the Gazette, for the authoritative text and the current version of a statute.

Layer 2 — Verify (authenticated)

- **SCC Online** and **Manupatra** — the two databases the profession treats as authenticated for citation. This is where a citation becomes safe to file.
- **CaseMine** — builds on Indian case law with AI-driven case recommendation, citation mapping and its AMICUS AI assistant (a more powerful ‘Advanced’ model was launched in March 2026). Useful when you are tracing how a line of authority developed.
- **LegitQuest, Jhana, Vidur, Bharat.Law** — India-specific legal AI for research, drafting and compliance. Evaluate on the specific hour of your week each one removes.
- **Kanoon-AI** — an Indian legal assistant with a free plan and a paid tier around ₹499 a month, covering research, drafting and document analysis.

Layer 3 — Draft and summarise (general assistants)

These do the language work. Prices below are the India figures current in October 2026 and include GST where the vendor bills in rupees; vendors bill in US dollars for some plans, so the effective rupee cost moves with the exchange rate. Verify before you subscribe.

Tool and plan	India price (Oct 2026)	Notes
ChatGPT Go	₹399 / month	Entry tier; enough for drafting and summarising.
ChatGPT Plus	₹1,999 / month	Higher limits, deep research, image and coding tools.
ChatGPT Pro	from ₹10,699 / month	Power tier; rarely needed for solo practice.
Google AI Plus	₹399 / month	Entry tier; includes storage and Gemini features.
Google AI Pro	₹1,950 / month	Fuller Gemini access, deep research, larger storage.

Tool and plan	India price (Oct 2026)	Notes
Claude Pro	₹1,999 / month (India app store) or $20 on the web	Strong on long-document analysis.
Perplexity Pro	₹1,999 / month (India app store) or $20 on the web	Research-flavoured; still verify every source it shows.
Microsoft 365 Personal	₹689 / month	Bundles Copilot with Office and 1 TB of storage.
Grok SuperGrok	₹2,900 / month (India app store)	Optional; not a legal tool.

A realistic stack for a solo advocate

Indian Kanoon (free) + one general assistant on the cheapest paid tier (₹399) + whatever authenticated database your library, bar association or college already gives you access to. That covers most day-to-day work. Spend your effort on learning to prompt well and to verify fast, not on buying software.

CHAPTER 6

6. The Prompt Formula (R–T–C–C–F–V)

A legal prompt is not a question. It is an instruction with six parts. Give the AI all six and the output stops being generic.

Part	What it is	Example
R — Role	Who the AI should act as	“You are drafting for an Indian advocate.”
T — Task	The single job you want done	“Draft a reply to a Section 138 notice.”
C — Context	The de-identified facts	“Cheque dated 3 May, dishonoured for insufficient funds.”
C — Constraints	The rules and limits	“Do not invent citations. Use only the facts given. Mark unknowns VERIFY.”
F — Format	The shape of the output	“Numbered paragraphs, formal register, one page.”
V — Verify	The verification instruction	“End with a list of everything I must check.”

The Standing Instruction — paste this first, every time

▶ Standing Instruction (keep this in a note and paste it at the top of every chat)

Standing instruction to paste at the start of every session: “You are assisting an Indian advocate. Work only from the text and facts I give you, plus general drafting skill. Do NOT invent case names, citations, section numbers, dates or paragraph references. If you are unsure about a section number, a citation, or the current position of law, write the word VERIFY and tell me exactly what I must check. Never present a repealed provision (the IPC, the CrPC or the Indian Evidence Act) as current law. Flag anything that may have changed after your training. Your output is a draft, not legal advice.”

Two habits that do most of the work

- **Ask for the questions, not the answers.** “What must I prove?” and “what are the issues?” are safe. “Give me the case law” is not.
- **Make it say VERIFY.** If the model is allowed to say “I am not sure”, it will guess less. Reward that.

The prompt that saves the most time

Paste the document you have already read and ask for a summary with paragraph references. Compression is low-risk when you can check it against a text you already hold — and it is where the hours actually go.

7. The Prompt Library

Every prompt below is written to be copied and used as it stands, with the square brackets filled in from your own matter. Paste the Standing Instruction first, then the prompt. Read the output as a draft from a fast junior — useful, but never filed without your check. Anything the output says about a section number, a citation or the current position of law is to be verified.

> **Rule 36 reminder**
>
> The Bar Council of India Rules bar an advocate from soliciting work or advertising, directly or indirectly (Rule 36, Part VI, Chapter II). A 2008 amendment lets you place basic information — name, contact details, qualifications, enrolment number and areas of practice — on a website, and nothing more. The client-communication prompts in Section F are for **existing clients** and case work. Do not use AI to write promotional content, reels, endorsements or anything that could read as solicitation.

A. Legal Research & Case-Law

▶ Research roadmap — without citations

I will describe a legal issue. Give me a research roadmap, not answers: (1) the statutes and chapters most likely to apply, named by title only; (2) the legal questions I must answer; (3) the ingredients or tests I will need to establish; (4) ten search strings I can run on Indian Kanoon, SCC Online and Manupatra. Do not give me any case name or citation — I will find the authorities myself. Issue: [describe].

▶ Explain a provision from its own text

Here is the exact text of a provision: [paste the bare-act text]. In plain English: (1) what it says; (2) the ingredients a court would look for; (3) the punishment or consequence; (4) what it does not cover; (5) three practical situations it would and would not apply to. Do not cite any case law and do not state anything beyond this text.

▶ Element checklist for an offence or a claim

For [offence or cause of action] under [Act and section], give me a numbered checklist of every element I must prove, and for each element list the kind of evidence that would satisfy it. Add a short list of the standard defences and what the defence must show. Do not invent citations; mark any point you are unsure of as VERIFY.

▶ Which code applies — the date-of-conduct rule

My client’s conduct or the cause of action is dated [date]. Tell me: (1) whether the Bharatiya Nyaya Sanhita, 2023 or the Indian Penal Code, 1860 applies, and why; (2) the same for procedure (BNSS or CrPC) and evidence (BSA or the Indian Evidence Act); (3) what the savings clauses say about matters already pending on 1 July 2024. Flag every point I must verify against the statutory text.

▶ Distinguish two provisions

Explain the difference between [provision 1] and [provision 2] in a table: scope, ingredients, punishment or remedy, who can invoke it, limitation, and a one-line example of when each is the right choice. Base this only on the statutory text I paste: [paste texts].

▶ Issue-spotting on my facts

Here are the facts of my matter: [paste a clean, de-identified summary]. List every legal issue, civil and criminal, that could arise; for each, name the area of law and the question to be answered. Do not give conclusions or citations — I want a complete issue map so nothing is missed.

▶ Argument map for my side

I act for [party] in a [type of matter]. Facts: [paste]. Build an argument map: the three strongest propositions in my favour, the finding of fact or law each depends on, and the order in which I should present them. Leave a blank line under each proposition where I will insert the verified authority.

▶ The strongest case against me

I act for [party]. Here are my facts and my intended arguments: [paste]. Now act as opposing counsel. Give me the five strongest counter-arguments, the facts or documents that would hurt me most, and the questions I would be asked if the bench is sceptical. Be blunt. No citations.

▶ Weakness audit of the other side

Here is the other side’s case as I understand it: [paste]. Identify the gaps in their pleadings, the elements they have not proved, any limitation or procedural defect, and the inconsistencies between their documents and their version. Rank the weaknesses by how useful each is to me.

▶ Search-term builder

I need to research [issue] on Indian Kanoon, SCC Online and Manupatra. Give me: (1) 15 keyword combinations; (2) 8 phrases likely to appear in the headnote of a relevant judgment; (3) the statutory phrases to search; (4) how to narrow by court and by year. No case names or citations.

▶ Summarise a judgment I paste

Here is the full text of a judgment: [paste]. Summarise it in this order — facts, the questions decided, the holding, the reasoning, the ratio (the rule that binds), any obiter, and the directions. Quote the paragraph numbers from the text I gave you. Do not add any authority that is not in this text.

▶ Ratio versus obiter extractor

From the judgment text below, separate what is binding ratio from what is obiter or observation, and explain why for each. Then state the proposition in one sentence I could use in submissions, with the paragraph number from the text. Text: [paste].

▶ Cite-check the formatting of my list of authorities

Here is my list of authorities: [paste]. Reformat every entry in a consistent Indian citation style (party names, year, report, volume, page or SCC OnLine reference). For each entry, add a note saying whether the citation looks complete, incomplete or unusual. Do not correct or invent any citation — only flag what I must verify.

▶ What changed in the new code

Compare [old provision] with [new provision]. Tell me: (1) whether it is a simple renumbering or a substantive change; (2) any new sub-section, ingredient or punishment; (3) the practical effect on pleading and on bail. Base this only on the two texts I paste: [paste].

B. Notices & Replies

▶ Section 138 NI Act — demand notice

Draft a statutory demand notice under Section 138 of the Negotiable Instruments Act, 1881. Facts: drawer [name], drawee [name], cheque no. [x] dated [date] for ₹[amount] drawn on [bank], presented on [date], dishonoured on [date] with the return memo reading [reason], debt for [purpose]. Use a firm but professional tone, state the 15-day demand, and warn of prosecution. Leave placeholders in square brackets for anything I have not given you.

▶ Reply to a Section 138 notice

Draft a reply to the Section 138 notice I paste below. Deny liability on the grounds in my instructions: [grounds]. Reserve all rights, do not admit the debt, and raise any jurisdictional or procedural defect I have listed. Keep it to the point. Notice: [paste].

▶ Money recovery demand notice

Draft a demand notice for recovery of ₹[amount] due under [invoice / agreement / oral contract] dated [date]. Set out the transaction, the amount due, the part-payments received, the interest if any, and a 15-day deadline, and state that I will file a summary suit / commercial suit if not paid. Facts: [paste].

▶ Reply denying a money claim

Reply to the demand I paste below denying the claim. My grounds are: [grounds]. Set out my version of the transaction in chronological order, deny each specific allegation, and close by inviting the claimant to prove the debt. Notice: [paste].

▶ Consumer notice to a seller or service provider

Draft a notice under the Consumer Protection Act, 2019 to [opposite party] for [defect / deficiency in service]. Set out the purchase or service, the amount paid, the defect, the loss and mental agony, the relief sought and a 15-day deadline before I approach the District Commission. Facts: [paste].

▶ Reply to a consumer notice

Reply to the consumer notice below. My position: [position]. Address each allegation, place on record the documents that support me, offer or refuse the relief sought, and reserve the right to contest. Keep the tone professional. Notice: [paste].

▶ Civil defamation notice

Draft a notice for civil defamation against [person] for the statement published on [date / platform]: [text of statement]. Identify the imputation, how it lowers my client's reputation, who it reached, and demand an unconditional apology, takedown and damages, with a 15-day deadline. Facts: [paste].

▶ Reply to a defamation notice

Reply to the defamation notice below. My grounds are: [truth / fair comment / good faith / no publication to a third party / no imputation]. Set out the defence briefly without admitting anything, and reserve rights. Notice: [paste].

▶ Tenancy — notice to quit

Draft a notice to quit for a tenancy governed by [the applicable State Rent Act or the Transfer of Property Act, 1882, Section 106]. Facts: premises [address], monthly rent ₹[x], tenancy from [date], grounds [non-payment / personal need / expiry]. Give the statutory period of notice and demand vacant possession. State the governing law I should check.

▶ Reply to an eviction notice

Reply to the eviction notice below. My grounds: [no valid notice / statutory protection / rent paid / grounds denied]. Point out any defect in the notice period or in the grounds, and reserve rights. Notice: [paste].

▶ Notice for return of documents or property

Draft a notice demanding return of [documents / original title deeds / vehicle / goods] in the possession of [person] since [date]. Set out how the items came to be with them, the demand already made, and a 15-day deadline, warning of criminal and civil proceedings. Facts: [paste].

C. Pleadings & Petitions

▶ Suit for recovery of money — plaint

Draft a plaint for recovery of ₹[amount] before the [Court] at [place]. Use the structure: cause title, jurisdiction and valuation, parties, the transaction in chronological paragraphs, the cause of action and its date, limitation, the relief clause and the verification. Facts: [paste]. Leave placeholders where I have not supplied details.

▶ Written statement with preliminary objections

Draft a written statement on behalf of [defendant] to the plaint I paste below. Open with preliminary objections (maintainability, jurisdiction, limitation, non-joinder), then give a paragraph-wise reply admitting, denying or putting the plaintiff to proof on each paragraph, then my affirmative defence, and close with the prayer and verification. Plaint: [paste].

▶ Regular bail application

Draft a bail application under the Bharatiya Nagarik Suraksha Sanhita, 2023 for [accused] in FIR No. [x] dated [date] under Sections [sections] of the BNS, 2023 at Police Station [name]. Cover: the accused’s details, the offence and punishment, custody period, the grounds for bail (parity, investigation complete, no flight risk, no tampering, medical or family grounds), the triple test, and the prayer. Facts: [paste]. Confirm the correct BNSS section for bail and mark it VERIFY.

▶ Anticipatory bail application

Draft an anticipatory bail application under Section 482 of the BNSS, 2023 (formerly Section 438 CrPC) for [applicant] apprehending arrest in FIR No. [x] under Sections [sections] of the BNS. Set out the apprehension, the false implication, the grounds on the parameters settled by the Supreme Court, the conditions the applicant is willing to abide by, and the prayer. Verify the section number before filing. Facts: [paste].

▶ Maintenance application

Draft an application for maintenance under Section 144 of the BNSS, 2023 (formerly Section 125 CrPC) on behalf of [wife / child / parent]. Cover the relationship, the neglect or refusal to maintain, the applicant’s need, the respondent’s income and capacity, the quantum sought with a monthly-expense table, and the prayer. Facts: [paste].

▶ Criminal complaint case

Draft a complaint under Sections 175 and 223 of the BNSS, 2023 for the offence of [offence] under Section [x] of the BNS. Set out the parties, the facts in chronological order, the delay and its explanation if any, the list of witnesses, the list of documents, the prayer for process, and the verification. Facts: [paste]. Flag anything to verify.

▶ Petition to quash an FIR or proceedings

Draft a petition under Section 528 of the BNSS, 2023 (formerly Section 482 CrPC) to quash [FIR / criminal proceedings] in [case]. Set out the facts, the grounds (no offence made out on the face of the record, civil dispute given a criminal colour, abuse of process, settled dispute), the legal parameters, the prayer and an interim-stay request. Facts: [paste].

▶ Divorce petition

Draft a petition for divorce under Section 13 of the Hindu Marriage Act, 1955 on the ground of [cruelty / desertion / adultery]. Set out the marriage and its solemnisation, the parties, the events relied on in chronological paragraphs, the attempts at reconciliation if any, the cause of action and limitation, the relief (decree of divorce and any consequential relief), and the verification. Facts: [paste].

▶ Motor Accident Claims petition

Draft a claim petition under the Motor Vehicles Act, 1988 before the Motor Accident Claims Tribunal at [place]. Cover the accident (date, place, vehicles, FIR), the deceased or injured person’s age, income and dependants, the medical expenses, the heads of compensation claimed, the documents relied on, and the prayer. Facts: [paste].

▶ Consumer complaint

Draft a consumer complaint under the Consumer Protection Act, 2019 before the District Commission at [place]. Set out the complainant and opposite party, the purchase or service, the defect or deficiency, the unfair trade practice if any, the pecuniary jurisdiction, the limitation and condonation if any, the relief claimed, and the list of documents. Facts: [paste].

▶ Affidavit in support of an application

Draft an affidavit in support of my application for [relief]. Include the deponent’s details, the statements of fact in numbered paragraphs based only on what I give you, the list of documents, and the verification clause. Facts: [paste]. Do not add any fact I have not supplied.

▶ Rejoinder or replication

Draft a rejoinder to the written statement I paste below. Reply only to the new matters raised in the written statement, reiterate my case briefly, and avoid repeating the plaint. Written statement: [paste].

▶ Amendment application

Draft an application for amendment of [plaint / written statement / petition] under Order VI Rule 17 of the Code of Civil Procedure, 1908. Set out the amendment sought, why it is necessary for deciding the real question in controversy, why it could not have been made earlier, that no new cause of action is introduced, and the prayer. Facts: [paste].

D. Contracts & Agreements

▶ Mutual non-disclosure agreement

Draft a mutual non-disclosure agreement between [party A] and [party B] for [purpose]. Cover definitions of confidential information and its exclusions, obligations of confidentiality, permitted disclosures, term and survival, return or destruction, remedies including injunction, and dispute resolution seated in [city] under Indian law. Keep the language tight and practical.

▶ Leave and licence or rent agreement

Draft a leave and licence agreement (or rent agreement) for premises at [address]. Cover the parties, the term, the licence fee and deposit, the escalation, the maintenance and utility liability, permitted use, the obligations of each side, the notice period, the condition of the premises, and the registration and stamp duty I must check for [State]. Facts: [paste].

▶ Service or consultancy agreement

Draft a service agreement between [client] and [service provider] for [services]. Cover the scope and deliverables, the fees and payment schedule, the term and termination, confidentiality, intellectual property ownership, representations and warranties, indemnity, limitation of liability, and dispute resolution. Make the scope and the IP clause specific.

▶ Employment contract

Draft an employment contract for the post of [role] at [company]. Cover the appointment and duties, the remuneration and benefits, the working hours and leave, confidentiality, IP assignment, non-solicitation, the notice period and termination, and the governing law. Flag the clauses I must align with the applicable labour codes and the [State] Shops and Establishments law.

▶ Loan or hand-loan agreement

Draft a loan agreement between [lender] and [borrower] for ₹[amount] at [interest rate] per annum, repayable by [date]. Cover the disbursement, the interest and the method of computation, the repayment schedule, the security or guarantee if any, the events of default, and the recovery rights. Flag the interest and documentation points I must check against the law.

▶ Partnership deed

Draft a partnership deed for a firm to carry on [business] at [place]. Cover the partners, the capital contribution, the profit-sharing ratio, the duties and restrictions, the bank and signing authority, the admission and retirement of partners, the dissolution, the arbitration clause, and the registration I must do under the Indian Partnership Act, 1932.

▶ Vendor or supply agreement

Draft a supply agreement between [buyer] and [supplier] for [goods]. Cover the specifications, the order and acceptance process, the price and price-variation, delivery and risk, inspection and rejection, warranties, liquidated damages, payment terms, termination, and dispute resolution. Make the quality and rejection clauses enforceable.

▶ Sale deed — draft skeleton

Draft the skeleton of a sale deed for immovable property at [address]. Cover the parties and their antecedents, the recitals of title, the extent and boundaries, the consideration and mode of payment, the delivery of possession, the representations on title and encumbrance, the indemnity, and the registration and stamp duty for [State]. Leave the schedule of property as a placeholder.

▶ Contract risk review

Review the contract I paste below from the point of view of [my client]. Produce a risk table: clause reference, what it says, the risk to my client, how serious it is (high / medium / low), and a suggested redraft. Then list the clauses that are missing altogether. Contract: [paste].

▶ Clause library — indemnity and liability

Draft three options for an indemnity and limitation-of-liability clause in a [type] contract, from mild to strong for [my client], with a one-line note on when to use each. Keep them short, precise and enforceable under Indian law. Add a note on the caps, exclusions and carve-outs I should consider.

▶ Clause library — termination and force majeure

Draft a termination clause (for cause and for convenience, with cure periods and consequences) and a force majeure clause suited to a contract performed in India, including what counts as a force majeure event, the notice and mitigation duties, and the right to terminate on prolonged force majeure.

▶ Plain-English contract summary for the client

Turn the contract below into a one-page plain-English summary for my client, who is not a lawyer. Cover: what the deal is, what my client must do, what the other side must do, the money, the term and how it ends, the main risks, and the three things my client must not do. No legal jargon. Contract: [paste].

E. Court Filings & Submissions

▶ Synopsis and list of dates

Draft a synopsis for my [petition / appeal] in [case]. Write it in four short paragraphs: the parties and the subject, the order or proceeding challenged, the grounds in brief, and the relief sought. Then draft the list of dates and events in a two-column table from the chronology I give you. Facts: [paste].

▶ List of dates and events

From the facts and documents I paste below, build a list of dates and events in two columns (date and event), strictly chronological, one event per row, with the document reference for each. Do not add any event that is not in my material. Facts: [paste].

▶ Index and paper-book compilation

Prepare an index for a paper book in [case]. From my list of documents below, produce a table: serial number, description of the document, page numbers (leave blank), and a column for my remarks. Group the documents logically (pleadings, evidence, orders, authorities). Documents: [paste].

▶ Written submissions

Draft written submissions for [case] on behalf of [party]. Structure: a short introduction, the facts in brief, the issues, the submissions under each issue, and the prayer. Under each submission leave a clearly marked gap where I will insert the verified authority. Facts and issues: [paste].

▶ Skeleton arguments

Prepare skeleton arguments for a hearing in [matter]. Give me a numbered list of propositions, each in one sentence, with a blank line beneath for the authority and the paragraph I will cite. Then list the two weakest points in my case and how I will deal with them.

▶ Compilation of authorities with propositions

Here is my list of authorities with the propositions I take from them: [paste]. For each, write a clean entry: the case name, the citation as I have given it, and the proposition in one or two sentences, in a form I can hand to the court. Do not alter or add any citation; mark any entry that looks incomplete as VERIFY.

▶ Condonation of delay application

Draft an application for condonation of delay of [number] days in filing [appeal / application]. Set out the dates, the reason for the delay in a truthful and specific manner, the settled principles on a liberal approach to condonation, that the delay is not deliberate, and the prayer. Facts: [paste].

▶ Exemption application

Draft an application seeking exemption from filing [certified copies / original documents / typed copies] in [case]. State the reason, what is being filed instead, and the undertaking to file the originals when directed. Keep it to one page. Facts: [paste].

▶ Note for arguments

Prepare a note for arguments in [matter]. Give me: the brief facts, the issues, my propositions with gaps for authorities, the anticipated questions from the bench and short answers, and the relief I will press. Base this only on the material I paste: [paste].

▶ Court-fee and valuation note

For my [suit / petition] for [relief] before the [Court] at [place], prepare a note on the valuation and the court fee. Explain the basis of valuation for the relief sought, the provision of the Court Fees Act that applies, and the amount payable. Tell me clearly which figures I must verify with the court fee calculator of [State].

▶ Covering letter to the registry

Draft a covering letter to the registry of the [Court] for filing my [document]. List the documents enclosed, refer to the case number, and request the registry to place the matter before the court. Keep it formal and to one page. Details: [paste].

F. Client Communication

▶ Plain-language explanation of the case

Explain the current position in my client’s matter in plain English for a person with no legal background. Cover: what the dispute is about, what has happened so far, what happens next, what my client must do and by when, and what the likely timeline is. Avoid jargon; where you must use a legal term, explain it in one line. Facts: [paste]. Do not promise any outcome.

▶ Engagement letter

Draft an engagement letter for a new client. Cover the scope of work, what is included and excluded, the fee basis and payment terms, the expenses, the client’s duties to give instructions and documents, the confidentiality undertaking, the conflict-of-interest position, and the right of either side to end the engagement. Details: [paste].

▶ Fee note or invoice description

Write the professional description for a fee note for the work I describe below, broken into dated line items, each with a short non-confidential description and the amount. Keep the descriptions professional and free of privileged detail. Work: [paste].

▶ Written status update

Write a short written status update to my client. Cover: what happened since the last update, the next date or step, what I am doing, what the client must do, and any decision the client must take. Keep it under 250 words, warm and clear. Facts: [paste].

▶ Short WhatsApp update

Write a two-line WhatsApp update to my client on [matter]. Professional, brief and clear, telling them the next date or step and anything they must do. No legal advice, no promises about the result. Facts: [paste].

▶ Explaining litigation risk and timelines

Explain to my client, in plain English, the realistic risks and timelines in a matter of this kind. Cover: what could go wrong, why the outcome cannot be guaranteed, the likely stages and a range of time for each, and the cost implications of each stage. Base this on general experience, not on promises. Facts: [paste].

▶ Explaining a settlement offer

The other side has offered [terms]. Write a note to my client that sets out the offer neutrally, the strengths and weaknesses of continuing, the costs and time of continuing, and the points my client should weigh. Do not advise for or against; give the client a clear framework to decide. Facts: [paste].

▶ Pre-litigation options note

Before we issue notice, write a short options note for my client. Set out the available routes (negotiation, mediation, arbitration, notice, court), what each involves, the time and cost of each, and the consequences of choosing it. Close with the information I need from the client to recommend a path. Facts: [paste].

▶ Closing or handover note

Write a closing note to my client at the end of the matter. Summarise what was achieved, the final position, what documents I am returning, what my client should keep safely, any follow-up or compliance duty, and the file-retention position. Facts: [paste].

▶ Delivering bad news sensitively

Write a message to my client conveying [the adverse development] in a way that is honest, calm and respectful. State the position plainly, explain what it means, set out the options now open, and say clearly what I will do next. Do not soften it into ambiguity. Facts: [paste].

G. Evidence & Document Analysis

▶ Summarise a large document set

I will paste a set of documents. Produce a summary table: document, date, author, what it establishes, and the issue it relates to. Then list the documents that contradict each other. Work only from the text I paste; do not infer facts that are not there. Documents: [paste].

▶ Build a timeline from documents

From the documents below, build a strictly chronological timeline with columns for date, event, and the document it comes from. Flag any gap in the chronology and any date that conflicts with another. Documents: [paste].

▶ Extract key dates and amounts

From the text below, extract every date, amount, reference number and party name into a table, with the exact line or page it came from. Do not calculate or round anything; give the figures exactly as they appear. Text: [paste].

▶ Compare two versions of an agreement

Compare these two versions of an agreement and produce a table of every difference: clause, version A, version B, and whether the change is substantive or cosmetic. Then list the changes that most affect my client. Version A: [paste]. Version B: [paste].

▶ Find inconsistencies in witness statements

Here are two or more statements. Produce a table of inconsistencies: the point, what each statement says, and the paragraph reference. Then list the questions I should put in cross-examination to bring out each inconsistency. Statements: [paste].

▶ Deposition or cross-examination summary

Summarise the deposition below: the witness, the points admitted, the points denied, the answers that help me, the answers that hurt me, and the admissions I can rely on. Give the page or question reference for each. Deposition: [paste].

▶ Electronic evidence certificate checklist

Prepare a checklist for the certificate required for electronic records under Section 63 of the Bharatiya Sakshya Adhiniyam, 2023 (formerly Section 65B of the Indian Evidence Act). List the details the certificate must carry, who must sign it, and the common defects that get electronic evidence excluded. Mark the exact statutory wording as VERIFY.

▶ Due-diligence document request list

Prepare a due-diligence document request list for a [transaction type]. Group it by corporate, financial, contractual, litigation, regulatory, property and employment. Make each item specific and add a note on why it matters. Deal: [paste].

▶ Privilege check before pasting

Here is the text I plan to paste into an AI tool: [paste]. Before I do, identify every item that is privileged, confidential or identifying of a client, and rewrite the passage in a de-identified form that keeps the legal question intact. List what you removed.

H. Translation & Vernacular Work

▶ Translate a judgment summary into Hindi

Translate the following judgment summary into clear, formal Hindi suitable for a client. Keep the legal terms accurate, keep section numbers and citations in English numerals, and do not add or omit anything. Text: [paste].

▶ Translate client instructions from Hindi to English

Translate the following client instructions from Hindi into English for my case file. Keep the meaning exact, preserve names, dates and amounts as given, and mark any phrase you are unsure of. Text: [paste].

▶ Draft a notice in Hindi

Draft the notice I describe below in formal Hindi suitable for a legal notice. Keep the structure of a standard notice (parties, facts, demand, deadline, warning) and use the correct Hindi legal register. Facts: [paste].

▶ Simplify a provision into simple Hindi

Explain the provision I paste below in simple Hindi that a person with no legal training can follow. Give a one-line summary, then the ingredients or requirements, then two everyday examples. Provision: [paste].

▶ Bilingual affidavit

Prepare an affidavit in English with a Hindi translation beneath each paragraph. Keep the numbering identical in both languages and keep names, dates and amounts as I give them. Facts: [paste].

▶ Localise a client letter

Rewrite the letter below in [language] in a warm, respectful register suitable for a client. Keep all dates, amounts and section references exactly as in the original. Letter: [paste].

I. Compliance, Memos & Opinions

▶ Legal opinion structure

Prepare the structure of a written legal opinion on [question]. Give me the headings: the instructions and the question, the facts assumed, the documents reviewed, the statutory framework, the analysis, the conclusion, the qualifications and the caveats. Then draft the introduction and the conclusion only, from the material I paste: [paste].

▶ Compliance checklist for a statute

Prepare a compliance checklist for a business under [statute]. List each obligation, who it applies to, the threshold or trigger, the form or filing, the frequency, the due date and the penalty for default. Mark every item I must verify with the department as VERIFY.

▶ Regulatory update tracker

Build a tracker template for regulatory changes affecting [sector]. Columns: date of notification, authority, change, provision affected, action required, owner, deadline, status. Then, from the material I paste, fill in the rows. Material: [paste].

▶ Due-diligence memo

Draft a due-diligence memo on [target] for [transaction]. Structure: scope and limitations, documents reviewed, findings by head (corporate, contracts, litigation, regulatory, property, employment), red flags, and the items requiring further enquiry. Findings: [paste].

▶ Risk memo for the client

Draft a risk memo for my client on [decision]. Set out the decision, the legal risks (ranked), the factual assumptions, the regulatory exposure, the reputational risk, and the mitigation for each risk. Close with the information still needed. Facts: [paste].

▶ Board or management note

Draft a note to the board on [proposal]. Cover the background, the legal position, the options with their risks and costs, the recommended option with reasons, and the approvals required. Keep it to two pages and business-like. Facts: [paste].

▶ POSH policy draft

Draft the outline of an internal committee and prevention-of-sexual-harassment policy under the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013. Cover the definitions, the internal committee, the complaint and inquiry process, the timelines, the confidentiality duty, and the annual report. Flag the statutory timelines as VERIFY.

▶ DPDP Act compliance note

Prepare a compliance note on the Digital Personal Data Protection Act, 2023 and its Rules for a business that [describe processing]. Cover the lawful basis, the notice and consent, the data-principal rights, the security and breach duties, the retention, and the penalties. Mark every provision reference as VERIFY.

▶ Statutory interpretation memo

Prepare a note on how to interpret [provision]. Set out the literal, purposive and harmonious approaches, the internal and external aids I can use, and the presumptions that apply. Apply each approach to my facts: [paste]. Do not invent authorities; leave a gap for the case law I will insert.

J. Practice Management

▶ Matter file — AI use log

Create an AI-use log entry for my matter file. Columns: date, tool and version, task, the prompt summary, what the AI produced, what I verified and how, what I changed, and the name of the person who signed off. Give me a filled example row from the task I describe: [paste].

▶ Chambers AI use policy

Draft a one-page AI use policy for my chambers. Cover the permitted uses, the prohibited uses (no privileged material on consumer tools, no unverified citations), the verification protocol, the confidentiality rule, the disclosure duty, the record-keeping, and the consequences of breach. Keep it enforceable and short.

▶ Client intake form

Draft a client intake form for a [type] practice. Include the client and opposite-party details, the nature of the matter, the key dates and limitation, the documents held, the conflict check, the fee basis agreed, and the consent to the engagement. Leave blanks for the client to fill.

▶ Hearing preparation checklist

Prepare a hearing preparation checklist for [matter]. List the documents to carry, the propositions to argue, the authorities to keep ready with paragraph numbers, the anticipated questions with short answers, the interim applications to move, and the instructions to the client on attendance. Facts: [paste].

▶ Intern or junior task brief

Draft a task brief for an intern on [task]. Set out the objective, the background in two paragraphs, the documents to read, the specific questions to answer, the format and length of the output, the deadline, and the standard I expect on verification of citations.

▶ Fee estimate note

Prepare a fee estimate note for a prospective client for [matter]. Break the work into stages, give an estimate for each, explain what is not included, and state clearly that the estimate is not a cap and may change with the course of the matter. Details: [paste].

▶ Weekly practice review

Prepare a weekly review template for my practice. Sections: matters heard and their outcome, deadlines met and missed, fees billed and outstanding, new enquiries, files needing action, and the top three priorities for next week. Give me a filled example from my notes: [paste].

▶ Knowledge-base note

Turn the material I paste below into a reusable knowledge-base note for my chambers on [topic]. Structure: the question, the short answer, the statutory framework, the practical steps, the pitfalls, and the authorities I have verified. Material: [paste].

▶ Email triage and reply drafts

Here are the emails in my inbox today: [paste]. Sort them into urgent, needs a reply, and for information. For the urgent and reply items, draft a short professional reply I can edit. Do not commit me to anything I have not told you to accept.

▶ Office SOP or checklist

Draft a standard operating procedure for [process] in my office (for example, filing, service of notice, or maintaining the cause list). Set out the steps in order, who does each, the checks before completion, and the common mistakes to avoid.

CHAPTER 8

8. The BNS / BNSS / BSA Transition Cheat-Sheet

These are the mappings advocates use most often. The new codes run to 358 sections (BNS), 531 (BNSS) and 170 (BSA). Some entries are simple renumberings; others are substantive changes, and a few old sections were reorganised into sub-sections. **Always read the new provision before relying on the correspondence**, and always verify the number against the official text before it goes into a pleading.

Criminal offences — IPC to BNS

IPC	BNS	Subject
34	3(5)	Acts done by several persons in furtherance of common intention
120B	61(2)	Punishment for criminal conspiracy
302	103(1)	Punishment for murder
304	105	Culpable homicide not amounting to murder
304A	106	Causing death by negligence
304B	80	Dowry death
307	109	Attempt to murder
323	115(2)	Punishment for voluntarily causing hurt
354	74	Assault or criminal force to a woman with intent to outrage her modesty
376	64	Punishment for rape
379	303(2)	Punishment for theft
406	316(2)	Punishment for criminal breach of trust
420	318(4)	Cheating and dishonestly inducing delivery of property
498A	85 (definition in 86)	Cruelty by a husband or his relatives
506	351(2) / (3)	Punishment for criminal intimidation

Procedure and evidence

Old provision	New provision	Subject
CrPC 125	BNSS 144	Order for maintenance of wives, children and parents
CrPC 154	BNSS 173	Information in cognizable cases (the FIR)
CrPC 438	BNSS 482	Direction for grant of bail to a person apprehending arrest

Old provision	New provision	Subject
CrPC 482	BNSS 528	Saving of the inherent powers of the High Court
Evidence Act 65B	BSA 63	Admissibility of electronic records

The date-of-conduct rule, in one line

The repeal is not retrospective. An offence committed before 1 July 2024 is still dealt with under the IPC, and proceedings pending on that date continue under the CrPC, by virtue of the savings in the repealing provisions. Which code you cite turns on **when the conduct happened**, not on when the complaint was filed.

How to write the pleading line

▶ The safe citation line

For conduct on or after 1 July 2024, write the new provision first and the old one in brackets for the reader's convenience, for example: "Under Section 318(4) of the Bharatiya Nyaya Sanhita, 2023 (formerly Section 420 of the Indian Penal Code, 1860)". Note the sub-section: BNS 318(4) is the seven-year, non-bailable provision that corresponds to the old 420, while BNS 318(2) is a three-year, bailable offence. Citing "BNS 318" alone leaves both the punishment and the bail position ambiguous.

CHAPTER 9

9. Confidentiality, Privilege and the DPDP Act, 2023

Confidentiality is the oldest duty in the profession and the newest risk in the tool. The question is not whether an AI vendor is trustworthy; it is whether you can show that you took reasonable care of your client's material. Two duties sit on top of each other here: your professional duty of confidence, and the statutory duties under the Digital Personal Data Protection Act, 2023.

Never paste these into a consumer AI tool

- Privileged communications between you and your client, or advice you have given.
- Client-identifying facts: names, addresses, phone numbers, Aadhaar or PAN numbers, account numbers, dates of birth.
- Unredacted agreements, notices, pleadings or medical records that carry identifying detail.
- Your settlement position, your fee negotiation, or anything that would harm the client if it surfaced.
- Anything a court order or a confidentiality undertaking forbids you from disclosing.

The de-identify-then-prompt method

- **Step 1.** Extract the legal question from the matter. "Is a notice under this clause valid?" not "Is our notice to Mr X valid?"
- **Step 2.** Replace every identifier with a neutral label: Party A, Party B, the Landlord, the Employee, the Bank.
- **Step 3.** Keep the material facts and the numbers that matter to the legal test; drop the ones that identify.
- **Step 4.** Run the privilege-check prompt (Chapter 7, G9) on your draft text before you paste it.
- **Step 5.** Where the matter is sensitive, use a tool and settings that do not train on your data, or work on a firm-controlled system.

The DPDP Act, 2023 — what it adds

The Act and its Rules impose duties on anyone who determines the purpose and means of processing personal data. In a legal practice that means: a lawful basis for processing, a notice and consent where consent is the basis, respect for the data principal's rights, reasonable security safeguards, breach notification duties, and limits on retention. Penalties run into crores for serious breaches. Mark the specific provisions as VERIFY and check the current Rules before you draft a compliance note.

> **The chambers answer**
>
> Write a short AI use policy (Chapter 10), make every member of chambers sign it, and keep a matter-level log of AI use. A documented, reasonable process is the best protection you have.

10. The AI Use Policy for Your Chambers

Copy this page, fill in the blanks, and have every advocate, intern and staff member sign it. It is deliberately short so that it is actually read.

Chambers AI Use Policy

Chambers: _____ Effective from: _____

1. Purpose. This policy governs the use of generative AI tools in this chambers. Its aim is to capture the benefit of these tools while protecting clients, confidentiality and the chambers' duty to the court.

2. Permitted uses. AI may be used for legal research *orientation*, first drafts, rewriting, summarising documents we already hold, translation, transcription and case administration.

3. Prohibited uses. No member shall (a) file or rely on any citation, section number or proposition without verifying it against an authenticated source; (b) paste privileged, confidential or client-identifying material into a consumer AI tool; (c) use AI to solicit work or advertise, contrary to Rule 36 of the Bar Council of India Rules; (d) allow an AI output to leave the chambers without a named human sign-off.

4. Verification protocol. Every citation is checked against SCC Online, Manupatra or the court record. Every statutory reference is checked against the current official text. The applicable code (BNS/BNSS/BSA or IPC/CrPC/Evidence Act) is fixed by the date of the conduct.

5. Confidentiality. Material is de-identified before it is used in any AI tool, using the method in Chapter 9. Sensitive matters are handled on a system that does not train on the data.

6. Disclosure. Where the forum requires disclosure that AI was used to prepare a filing, it will be made.

7. Record-keeping. A short AI-use log entry is made in each matter file.

8. Responsibility. The advocate who signs the document is responsible for its contents, without exception.

9. Consequences. A breach of this policy is dealt with as a matter of internal discipline and, where the law requires, reported to the appropriate authority.

Signed: _____ Date: _____

CHAPTER 11

11. The 30-Day Adoption Plan

Thirty days is enough to make safe AI use a habit rather than a novelty. Do not try to change everything at once. Work through one week at a time.

Week 1 — Set the ground rules

Paste the Standing Instruction into a note you keep open. Adopt the chambers AI use policy (Chapter 10) and have everyone sign it. Choose your three tools: a finder, a verifier and one general assistant. Run two low-risk prompts — a document summary and a plain-English client note.

Week 2 — Make verification a reflex

Every AI output this week ends with a verification pass. Pick one citation the AI gave you and try to find it in an authenticated database. Learn where the verification genuinely takes time and where it is instant. Build your own short list of the databases you trust.

Week 3 — Put the prompts to work

Run at least one prompt from each of the ten sections in Chapter 7 on a live matter. Keep the ones that save you time and edit the rest. Start the matter AI-use log so the record builds itself.

Week 4 — Systematise and train

Write your own five house prompts, specific to your practice area, and save them as a shared note. Do a one-hour session with your juniors on the three traps in Chapter 3. Review the month: which prompts earned their place, which did not.

The habit that matters most

If you build only one habit from this pack, build this one: **no citation leaves your office without your having opened the source.** Everything else is convenience. This is the thing that protects your licence.

CHAPTER 12

12. The Red-Flag Checklist and Quick Reference

Run this checklist before any AI-assisted work leaves your chambers. It takes under a minute and it is the whole pack in one page.

Check	Done
The Standing Instruction was pasted at the start of the session.	
No privileged, confidential or client-identifying material was pasted into a consumer tool.	
Every citation in the output has been opened in an authenticated source and the paragraph read.	
Every section number has been checked against the current official text.	
The applicable code (BNS/BNSS/BSA or IPC/CrPC/Evidence Act) was fixed by the date of the conduct.	
No repealed provision is presented as current law anywhere in the draft.	
No figure, date or name was added by the AI that I have not verified.	
The output does not solicit work or advertise, contrary to Rule 36.	
A named human has read the final output and takes responsibility for it.	
A short AI-use log entry has been made in the matter file.	

Quick reference — the three sentences to remember

> **1**
>
> AI is a fast junior with perfect language and no memory of Indian law. Give it the language work.

> **2**
>
> No citation leaves your office until you have opened the source. Citing an unverified AI precedent is professional misconduct.

> **3**
>
> De-identify before you prompt. The client’s identity and the client’s confidence never go into a consumer chatbot.

Thank you for reading. If this pack saved you time, tell us — and watch for the next Digitalaikart playbook.
