

DIGITALAIKART

THE AI JOB HUNT KIT

60 Copy-Paste Prompts That Get You Interviews

Resume · Cover Letters · LinkedIn · Interviews · Salary

Built for the Indian job market — Naukri, LinkedIn, ATS systems, walk-ins, HR rounds

Works with the free tiers of ChatGPT, Gemini and Claude. No subscription needed.

The AI Job Hunt Kit — Digitalaikart Premium Edition

Copyright (c) 2026 Digitalaikart. All rights reserved. No part of this publication may be reproduced, distributed, or transmitted in any form without the prior written permission of the publisher, except for brief quotations in reviews.

How to Use This Kit

This kit gives you **60 ready-made prompts** for the free AI chatbots you already have on your phone — ChatGPT, Gemini, and Claude. You do not need any paid subscription, any coding knowledge, or any technical background.

Every prompt follows the same pattern:

- **Copy** the prompt from the gold box.
- **Replace** everything written in [SQUARE BRACKETS] with your real details. Delete any bracket that does not apply to you.
- **Paste** it into your AI chat and read the output **like an editor** — keep what is true, fix what is not, and make it sound like you.
- **Never** let the AI invent facts, numbers, or experience you do not have. It will happily do so if you let it — and interviews will expose it.

The prompts are written for the Indian job market: Naukri and LinkedIn applications, ATS software used by large Indian employers, walk-in interviews, HR rounds, and salary talks in rupees. They work for freshers, job switchers, and career changers alike.

A note on honesty and privacy

Two rules protect you throughout this kit. First: **AI is your editor, not your author** — everything you send out must be true. Second: **never paste private or confidential information** into an AI chat — no Aadhaar or PAN numbers, no passport details, no current salary slips, no NDA-protected work, no client names you are not allowed to share. Free AI chats may use your conversations to improve their models, so share only what you would post publicly.

What's Inside

Nine parts. Sixty prompts. One complete job hunt system.

Part 1 — The 2026 Job Hunt

How hiring actually works now, and why the old way of applying fails.

Part 2 — Your Free AI Toolkit

The three free AI chatbots, which one to use for what, and the 4-part formula that powers every prompt in this kit.

Part 3 — Resume Prompts (14)

From a blank page to an ATS-proof, achievement-driven resume — including a full review pipeline.

Part 4 — Cover Letters and Emails (10)

Tailored cover letters, follow-ups that actually get replies, referral requests, and polite exit emails.

Part 5 — LinkedIn Prompts (8)

Headlines, About sections, and profile audits that make recruiters find you.

Part 6 — Interview Prompts (16)

Mock interviews on demand, STAR answers, company-specific preparation, walk-in drills, and English practice.

Part 7 — Salary and Offers (6)

Research your market rate, negotiate with a script, and compare offers without regret.

Part 8 — Startups, Internships and Freelancing (4)

Cold messages that founders reply to, and internship applications that stand out.

Part 9 — The 7-Day Job Hunt Sprint

A day-by-day plan that turns these 60 prompts into a working system — plus the 5-minute application tailor and the weekly review.

PART 1

The 2026 Job Hunt

Why qualified people get rejected in seconds — and how to fix it.

In this part

- The three gates every application crosses
- The one rule that decides everything: AI is your editor, not your author
- Why generic AI output gets you rejected

The Three Gates

Before a human being seriously reads your application at most mid-size and large employers, it typically crosses up to three gates:

- **Gate 1 — The ATS.** Applicant Tracking System software (Naukri Resdex, LinkedIn Recruiter, and company career sites all run on similar systems) scans your resume for the exact skills and keywords in the job description. No match, no human.
- **Gate 2 — The pile.** Popular roles attract hundreds of applications. Recruiters skim each resume for a few seconds before deciding to read further.
- **Gate 3 — The human.** A real person finally reads what survived — and is now trained to spot generic, copy-pasted AI writing instantly.

Most rejections happen at Gates 1 and 2 — before anyone judges your actual ability. That is a **presentation problem, not a talent problem**, and it is exactly what the prompts in this kit fix.

The One Rule

People who get results from AI treat it as an **editor and coach**, not a ghostwriter. The AI sharpens what is true about you. It rewrites your real experience with strong verbs, matches it to the job description, and rehearses you for tough questions. What it must never do is invent. One fabricated number in an interview — "you said you grew sales 40%, how?" — ends your candidacy.

Why Generic AI Fails

Recruiters now read thousands of AI-drafted resumes. Certain words — *leverage, synergy, robust, spearheaded, passionate about excellence* — and perfectly uniform bullet points signal "generated, not earned." Prompt 09 exists specifically to strip this language out. Your goal is output that sounds like a sharp, specific human — because it is one, edited by AI.

PART 2

Your Free AI Toolkit

Three free chatbots are all you need. Zero rupees, zero code.

In this part

- ChatGPT, Gemini, Claude — which one for which task
- The 4-part prompt formula behind every prompt in this kit
- How to work around free-tier message limits

The Big Three, Free

All three major AI assistants offer genuinely useful free tiers that run in any browser or phone app. They all handle every prompt in this kit:

- **ChatGPT** (chat.openai.com or the app) — the all-rounder: drafting, rewriting, role-play, and mock interviews.
- **Gemini** (gemini.google.com) — strong for research because it searches Google live: company news, interview experiences, market rates.
- **Claude** (claude.ai) — excellent for long documents: paste a full resume plus a long job description and it keeps track of everything.

Free tiers limit how many messages you can send in a window, and the exact limits change often. If you hit a limit in one app, continue in another — the prompts work in all three. For a job hunt, that is effectively unlimited free help.

The 4-Part Prompt Formula

Every prompt in this kit is built from four parts. Once you see the pattern, you can write your own variations for any situation:

- **Role:** "You are a senior technical recruiter at an Indian IT services company." This sets the perspective and the standards.
- **Context:** your real details — the job description, your resume text, your situation. The more specific the input, the better the output.
- **Task:** one clear job — "rewrite these bullets", "ask me questions one at a time", "score this resume out of 10".
- **Format:** how you want the answer shaped — word limits, tables, numbered lists, "flag anything unclear with [ASK]".

If any AI answer disappoints you, do not give up — reply to it. "Make it shorter." "Sound less formal." "Give me 3 more options." The follow-up message is where good output becomes great output.

PART 3

Resume Prompts

From blank page to interview-generating resume. 14 prompts.

In this part

- P01 to P14: duty rewrites, ATS matching, fresher builds, audits, and the master pipeline
- Works for freshers, experienced professionals, and career switchers

Prompt 01 — The Duty-to-Achievement Rewrite

When to use: Every bullet in your resume says "responsible for" something. This fixes that.

the Indian job market. Rewrite each of my job duties below as an action verb, mention the scale (team size, budget, users, volume), and end with a number, insert [ADD METRIC] where a number would go. Never invent numbers or accomplishments. Keep each bullet under

[PASTE 5-10 OF YOUR CURRENT RESUME BULLETS OR ROUGH NOTES]

Make it yours: Run this first. Most Indian resumes are duty lists; recruiters shortlist achievement lists. Fill every [ADD METRIC] with an honest number, even a small one: "a team of 4" and "around 200 customers a day" count.

Prompt 02 — The ATS Keyword Match

When to use: Before applying to any job on Naukri, LinkedIn, or a company site.

[JD]

MY RESUME: [PASTE YOUR RESUME TEXT]

Make it yours: Do this for every serious application — it takes 3 minutes and is the single highest-ROI prompt in this kit.

Prompt 03 — The Professional Summary Generator

When to use: The 3 lines at the top of your resume decide whether the rest gets read.

COPY THIS PROMPT

Write 3 different professional summaries for my resume, each 40-60 words. My background: [YEARS] years as a [ROLE] in [INDUSTRY]. My strongest skills: [2-3 SKILLS]. My best achievement: [ONE SPECIFIC RESULT WITH A NUMBER IF POSSIBLE]. Target role: [TARGET JOB TITLE]. Variation 1: direct and numbers-first. Variation 2: skills-first for a career switch toward [NEW FIELD, IF APPLICABLE]. Variation 3: short and punchy, under 35 words. Confident tone, no cliches like "passionate" or "results-driven", no first person.

Make it yours: Freshers: replace "years of experience" with your degree, projects, and internships. One real project beats ten adjectives.

Prompt 04 — The Resume Weak-Points Audit

When to use: Before you send your resume anywhere. Find the problems recruiters see in 5 seconds.

COPY THIS PROMPT

You are a harsh hiring manager at [COMPANY TYPE, e.g., a top Indian IT services firm / a funded startup / a private bank] reviewing resumes for a [TARGET ROLE]. Here is my resume: [PASTE RESUME]. Score it out of 10, then: (1) List the 5 things that would make you reject me, in order of severity; (2) For each, give the exact fix; (3) Tell me which single fix would most increase my interview rate; (4) Flag any sentence that sounds AI-generated or generic. Be blunt — I would rather be hurt now than rejected later.

Make it yours: Run this after you finish editing, not before. Then fix, and run it once more.

Prompt 05 — The Fresher Resume Builder

When to use: You have no work history. You still have a resume to build. Start here.

WHAT YOU

Internships or part-time/family work: [DETAILS, OR SAY NONE]

Skills I actually

Make it yours: Include family-shop or data-entry work — honestly framed, it shows work ethic. Never list Class 10 marks unless the employer specifically asks; skip the photo.

Prompt 06 — The Career-Switch Repositioner

When to use: Moving from one field to another and worried your resume reads like the old field.

COPY THIS PROMPT

I am switching careers from [CURRENT FIELD] to [TARGET FIELD]. Here is my current resume: [PASTE RESUME]. Here is a typical job description in my target field: [PASTE JD IF AVAILABLE]. Reposition my resume: (1) Rewrite my professional summary so my transferable skills lead; (2) Reorder and rewrite my bullets so experiences that matter for [TARGET FIELD] come first and use its vocabulary; (3) Tell me honestly which parts of my background will still look like a mismatch, and suggest one line for each that bridges it (training, self-study, side projects); (4) Suggest 2 quick credibility builders (a free certification or a small portfolio project) that close the biggest gap. Everything must remain factually true about me.

Make it yours: The bridge line matters: "completed a 6-week self-directed course in X" converts a mismatch into a story of momentum.

Prompt 07 — The Plain-English Polish

When to use: Your resume is in Hinglish, rough English, or your notes are a mess. Fix the language, keep you.

COPY THIS PROMPT

Polish my resume text into professional but simple English suitable for Indian and global employers. Improve grammar and clarity, use strong action verbs, keep sentences short. Do not add content I do not have, do not change any facts, numbers, or job titles. Flag any sentence where you were unsure what I meant with [CHECK]. Here is my text: [PASTE YOUR RESUME OR ROUGH NOTES].

Make it yours: Also use this for cover letters and LinkedIn messages — any text you drafted in a mix of languages.

Prompt 08 — The Achievement Quantifier

When to use: You think you have no numbers. You almost certainly do. This finds them.

COPY THIS PROMPT

I am a [ROLE] in [INDUSTRY] in India. Ask me 10-12 short, specific questions that uncover measurable results from my everyday work — things like volumes handled, time saved, errors reduced, people trained, money earned or saved, customers served. Ask the questions one at a time, wait for my answer, then at the end turn my answers into 5-7 quantified achievement bullets for my resume. Use only my real answers — if a number is a rough estimate, mark it as "approximately".

Make it yours: Answer honestly even if numbers feel small. "Served ~80 customers daily" is a real metric; "handled customers" is nothing.

Prompt 09 — The De-Robotizer

When to use: You used AI to write your resume. Now it sounds like AI wrote your resume. Strip the tells.

COPY THIS PROMPT

Review the text below and rewrite it so it reads like a sharp human professional wrote it. Remove AI-sounding words and phrases: leverage, synergy, robust, spearheaded, delve, landscape, cutting-edge, passionate about, results-driven, dynamic professional. Replace vague claims with concrete, specific statements. Vary sentence length and structure so bullets do not all follow the same pattern. Keep all facts, numbers, and achievements exactly as they are. Flag anything that still sounds fake. Here is my text: [PASTE YOUR RESUME OR COVER LETTER TEXT].

Make it yours: Run this as the LAST step on every AI-assisted document before it goes out.

Prompt 10 — The Fresher Project Section Builder

When to use: For freshers, projects are the experience section. Make them read like work, not homework.

COPY THIS PROMPT

Turn my college/personal projects into resume bullets that read like professional work. For each project give me 2-3 bullets covering: what I built, the tools I used, what problem it solved, and any measurable outcome (users, downloads, marks, accuracy, hours saved — mark estimates as approximate). Also give one line per project to say in interviews when asked "what was hard about it?". My projects: [DESCRIBE EACH PROJECT IN 2-3 ROUGH LINES].

Make it yours: Hackathons, class assignments you went beyond, and a website you built for a relative's shop all count. List them all honestly.

Prompt 11 — The Internship and Trainee Bullet Upgrader

When to use: You did an internship where you "observed and learned". Here is how to present it.

COPY THIS PROMPT

I did an internship as a [ROLE] at [COMPANY/TYPE OF COMPANY] for [DURATION]. What I actually did: [LIST EVERYTHING, HOWEVER SMALL — ATTENDED MEETINGS, MADE SHEETS, SHADOWED CALLS, TESTED FEATURES]. Rewrite these as strong resume bullets that show initiative and real contribution without exaggerating my level of responsibility. Mark anything that would misrepresent what I did, and suggest an honest but stronger alternative for it.

Make it yours: "Shadowed 15 client calls and independently handled 3 follow-ups" is honest and impressive. "Managed key client relationships" is neither.

Prompt 12 — The ATS Format Check

When to use: Great content still dies if the software cannot read the file.

COPY THIS PROMPT

You are an ATS compatibility checker. I will describe my resume's formatting: [DESCRIBE: COLUMNS OR SINGLE COLUMN? TABLES? PHOTOS? GRAPHICS? FONTS? SECTION HEADINGS AND THEIR EXACT NAMES? FILE FORMAT?]. Based on how Indian employer ATS systems parse files, tell me: (1) Which formatting choices are likely to break parsing or hide my content; (2) The exact fixes; (3) A recommended simple structure and standard section heading names (e.g., "Work Experience" not "My Journey"); (4) Whether I should submit as PDF or Word for job portals, and why.

Make it yours: Rule of thumb: single column, no text boxes, standard headings, no photo, and always keep a plain .docx version for portals that ask.

Prompt 13 — The Employment Gap Framing

When to use: A gap in your resume is scaring you more than it scares employers. Frame it honestly.

COPY THIS PROMPT

I have an employment gap in my resume: [WHEN TO WHEN, AND THE REAL REASON — HEALTH, FAMILY, EXAMS, LAYOFF, COULD NOT FIND A ROLE, OTHER]. My field: [FIELD]. Years of experience before the gap: [N]. Help me: (1) Write an honest 1-2 line explanation I can put in my cover letter or LinkedIn About section; (2) Prepare a 3-sentence spoken answer for "why the gap?" in interviews — factual, no apology, ending with what I am ready to do now; (3) List skills or certifications I can honestly say I worked on during the gap (from what I actually did — tell me what counts and what does not); (4) Tell me what NOT to say. Keep everything truthful and non-defensive.

Make it yours: Employers care whether the gap has an honest story and whether you are ready now. Both of those you control.

Prompt 14 — The Master Resume Review Pipeline

When to use: The full-service pass: run this when your resume must be perfect for a dream application.

me expert. We will improve my resume in stages. Stage 1: I paste my
esses and wait. Stage 2: I confirm; you rewrite the professional
rbs and my real metrics. Stage 3: I paste the target job description; you
section for this specific role. Stage 4: you run a final pass removing
g unverifiable, then give me a 10/10 score with reasons. Rules: never
real number with [ADD METRIC], and wait for my confirmation between

[PASTE RESUME]

Make it yours: This one conversation can replace a paid resume-writing service. Give it your full target JD and 30 minutes.

PART 4

Cover Letters and Emails

Applications that read like a person wrote them. 10 prompts.

In this part

- P15 to P24: cover letters, follow-ups that get replies, referrals, and graceful exits
- Email templates for Naukri, LinkedIn, and recruiter WhatsApp conversations

Prompt 15 — The Tailored Cover Letter

When to use: Only for roles you actually want. One page, 200-250 words, zero cliches.

COPY THIS PROMPT

Write a cover letter of 200-250 words for the [JOB TITLE] role at [COMPANY]. My background: [2-3 SENTENCES WITH YOUR STRONGEST RELEVANT POINTS]. My most relevant achievement: [ONE SPECIFIC RESULT]. Reference something specific about the company: [A PRODUCT, PROJECT, OR FACT YOU GENUINELY ADMIRE OR RESEARCHED]. Rules: professional but human tone, no flattery, no "I am writing to express my interest", no repeating my resume word for word, first sentence must make them want the second. End with a confident one-line close, not a begging one.

Make it yours: Change the company-specific line for every application. A letter that could go to any company goes to no company.

Prompt 16 — The Cold Recruiter Email

When to use: You found a recruiter or hiring manager. Here is how to be impossible to ignore politely.

COPY THIS PROMPT

Write a short, confident cold email to a recruiter or hiring manager at [COMPANY] about a [TARGET ROLE] position (or a potential opening). About me: [1-2 SENTENCES: CURRENT ROLE, YEARS, ONE KEY ACHIEVEMENT]. Why them: [ONE SPECIFIC REASON — THEIR PRODUCT, A POST THEY MADE, THE TEAM]. Structure: subject line under 8 words; opening line that says exactly who I am and what I want; 2-3 sentences on my fit with one proof point; a clear, low-pressure ask (a 10-minute call). Under 120 words total. No "hope this email finds you well".

Make it yours: Send Tuesday to Thursday morning in their timezone. Follow up once after 5-7 days with Prompt 17 — no more.

Prompt 17 — The Application Follow-Up

When to use: You applied 5-7 days ago. Silence. This is what you send instead of nothing.

COPY THIS PROMPT

Write a polite, short follow-up email about my application for the [JOB TITLE] role (application [DATE/REFERENCE IF ANY]). Tone: professional, not anxious, not demanding — I am adding value, not chasing. Structure: 1 line reminding who I am and the role; 1 line reaffirming strong fit with [ONE NEW POINT NOT IN MY APPLICATION — e.g., a relevant certification finished or an achievement I did not mention]; 1 line asking if they need anything else from me; a clean sign-off. Under 80 words. Subject: "Following up — [ROLE] application".

Make it yours: One follow-up is persistence; three is pressure. If the second goes unanswered, use Prompt 19 and move your energy to new applications.

Prompt 18 — The Post-Interview Thank-You

When to use: Same-day email after any interview. Not old-fashioned — it is your last impression.

COPY THIS PROMPT

Write a thank-you email I will send within hours of my interview today for the [JOB TITLE] role at [COMPANY]. Interviewer: [NAME, TITLE]. Two things we discussed that went well: [TOPIC 1], [TOPIC 2]. One moment where I could have answered better: [TOPIC] — give me one graceful sentence that briefly strengthens or corrects that answer. Structure: thanks; the two discussion points showing I listened; the small reinforcement; enthusiastic close. Under 100 words, warm and human, not formal-stiff.

Make it yours: The correction line is powerful: it shows self-awareness. Keep it to one sentence — this is a thank-you, not a second interview.

Prompt 19 — The Breakup Email

When to use: Three weeks of silence after interviews. This closes the loop — and sometimes reopens it.

COPY THIS PROMPT

Write a final, graceful email after [X WEEKS] of no response following my [INTERVIEW STAGE] for [JOB TITLE] at [COMPANY]. Tone: professional, zero bitterness, high self-respect. Content: assume I may still be interested if they return; ask once for a status or decision; state that I am continuing my search meanwhile; thank them for the time invested. Under 70 words. Give me 2 subject line options.

Make it yours: This email regularly gets replies like "so sorry, we are finalizing this week" — silence is often disorganization, not rejection.

Prompt 20 — The Referral Request

When to use: Referrals convert far better than cold applications. Here is how to ask without awkwardness.

COPY THIS PROMPT

Write a LinkedIn message requesting a referral at [COMPANY] for the [JOB TITLE] role (job ID/link: [IF AVAILABLE]). The person: [HOW YOU KNOW THEM — COLLEGE SENIOR, EX-COLLEAGUE, CONNECTION, OR STRANGER WITH SHARED BACKGROUND]. Include: a 1-line greeting referencing our connection; 2 lines on my fit (my background: [SUMMARY]) with the job link; a direct but easy-to-refuse ask — "if you are comfortable referring, I can send my resume; totally fine if not". Under 90 words. Warm, brief, respectful of their time.

Make it yours: Make the referrer's job zero-effort: attach your resume and the exact job link in the very next message after they say yes.

Prompt 21 — The Recruiter WhatsApp or Naukri Reply

When to use: A recruiter messaged you. You have minutes, not days. Reply right, every time.

COPY THIS PROMPT

A recruiter messaged me on [WHATSAPP/NAUKRI/LINKEDIN] saying: [PASTE THEIR MESSAGE]. I am [interested / unsure / not interested but want to keep the door open]. Write a reply that: responds quickly and professionally; shows I read their message; asks for the 2-3 details I need before deciding (budget range, location, notice period); and signals seriousness without sounding desperate. If I am unsure, keep options open politely. Under 60 words, WhatsApp-appropriate (short lines, no essays).

Make it yours: Ask about the budget range early and politely — it saves everyone weeks if the role cannot match your current salary.

Prompt 22 — The Application Email with Attachments

When to use: Applying by email to a posted address. Get the basics perfect.

COPY THIS PROMPT

Write an email applying for the [JOB TITLE] position at [COMPANY], source: [WHERE YOU SAW IT]. My attached resume: [1-LINE SUMMARY OF YOUR BACKGROUND]. Structure: a subject line in the format they requested, or "Application for [JOB TITLE] — [YOUR NAME]" if none; a 3-4 line email body (not a full cover letter): who I am, my single strongest fit point [ACHIEVEMENT], what is attached, availability for a call; correct professional sign-off with phone number. Under 90 words.

Make it yours: Name your files properly before attaching: FirstName_LastName_Resume.pdf — not resume_final_v7(1).pdf.

Prompt 23 — The Interview Reschedule

When to use: Life happened. Reschedule like a professional, not a flake.

COPY THIS PROMPT

Write an email to reschedule my interview for the [JOB TITLE] role at [COMPANY], scheduled for [DATE/TIME]. My reason: [BRIEF TRUE REASON — KEEP IT SIMPLE]. Include: apology in one line without over-apologizing; my continued strong interest in one line; 2-3 specific alternative slots I am available; my phone number. Under 80 words. Give me a subject line that ensures it gets read today.

Make it yours: Send it as early as humanly possible. Same-day cancellations by email look like ghosting unless you call too.

Prompt 24 — The Graceful Withdrawal

When to use: You took another offer, or realized the role is wrong. Exit without burning the bridge.

COPY THIS PROMPT

Write a withdrawal email for the [JOB TITLE] role at [COMPANY], currently at [STAGE OF PROCESS]. Reason: [ACCEPTED ANOTHER OFFER / ROLE NOT A FIT / PERSONAL]. Include: thanks for their time and the specific [STAGE] they invested; my withdrawal stated clearly and early enough to be respectful; a one-line door-left-open close if genuine (e.g., would love to stay connected for future roles). Under 80 words. No over-explaining, no guilt.

Make it yours: India's hiring world is small and well-networked. The recruiter you ghost today is at your dream company in two years.

PART 5

LinkedIn Prompts

Make recruiters find you instead. 8 prompts.

In this part

- P25 to P32: headlines, About sections, visibility posts, and a full profile audit
- Your profile is a 24/7 application that works while you sleep

Prompt 25 — The Headline Rewrite

When to use: The default headline is your job title wasted. Get 5 real options.

COPY THIS PROMPT

Write 5 LinkedIn headline options for me. My situation: [CURRENT ROLE/TITLE] at [COMPANY OR OPEN TO WORK], with [KEY SKILL 1], [KEY SKILL 2], [KEY SKILL 3], targeting [TARGET ROLE]. Rules: under 220 characters; option 1 = role + value statement; option 2 = role + industries I serve; option 3 = skills-first for a career switch; option 4 = a credible achievement with a number [ONE REAL ACHIEVEMENT]; option 5 = simple keyword-dense version for recruiter search. No emojis, no buzzwords like "ninja" or "guru".

Make it yours: Recruiters search LinkedIn by keywords, not titles. "Financial Analyst | FP&A; | Python | IFRS Reporting" is found; "Finance Enthusiast" is not.

Prompt 26 — The About Section Rewrite

When to use: The About section is not a bio. It is your pitch, in first person, to a stranger.

COPY THIS PROMPT

Rewrite my LinkedIn About section. My details: [ROLE, YEARS, INDUSTRY]. What I actually do day to day: [2-3 SENTENCES]. Proudest work: [ONE SPECIFIC ACHIEVEMENT]. What I want next: [TARGET ROLE]. Tone: first person, confident, human — like a smart colleague talking, not a resume. Structure: a 1-line hook, 2 lines on what I do and for whom, 2 lines of proof, 1 line on what I am looking for, 1 line inviting contact. Under 150 words. No "I am passionate about".

Make it yours: First person, full sentences, one clear call to action at the end: "open to [X] roles — my inbox is open."

Prompt 27 — The Experience Section Rewrite

When to use: Your LinkedIn job entries can beat your resume entries. Here is how.

COPY THIS PROMPT

Rewrite my LinkedIn experience section for my role as [TITLE] at [COMPANY]. What I did: [ROUGH BULLETS OR NOTES]. Give me: a 2-line role summary paragraph (what the team does and my part in it), 4-6 achievement bullets with metrics where I have them [MARK ESTIMATES AS APPROXIMATE], each under 20 words. Slightly more readable and less formal than resume bullets, but still results-focused. Invent nothing.

Make it yours: Unlike your one-page resume, LinkedIn has no length pressure — use your best 5 bullets from every significant role, not your top 3.

Prompt 28 — The Skills Order and Endorsement Plan

When to use: The skills section drives recruiter search filters. Order it deliberately.

COPY THIS PROMPT

Here are all my skills: [LIST EVERYTHING]. My target role: [TARGET ROLE]. Tell me: (1) Which 15 skills to list on LinkedIn and in what order (search-relevant first); (2) Which 3 should be pinned as top skills; (3) Which skills from my list to drop because they dilute my profile for the target role; (4) A simple plan to get endorsements: who to ask (colleagues from which past roles) and a short message template I can send them.

Make it yours: Endorsement message template matters: "Working on my profile for [X] roles — would you mind endorsing [SKILL]? Endorsed you back for [THEIR SKILL]!"

Prompt 29 — The Recruiter Connection Note

When to use: Blank connection requests to recruiters get ignored. 200 characters decide.

COPY THIS PROMPT

Write 3 LinkedIn connection-request notes (under 200 characters each) to send to a recruiter at [COMPANY/TARGET COMPANIES]. My background: [1-LINE]. Note 1: direct and role-focused (I am targeting [ROLE] and admire [COMPANY THING]). Note 2: warm through a shared connection or background ([SHARED DETAIL]). Note 3: value-first (I noticed their post about [TOPIC] and add a one-line insight). None should ask for a job in the first message.

Make it yours: The connection note gets you accepted; the follow-up conversation (Prompt 16 style) gets you the interview. Two separate moves.

Prompt 30 — The Visibility Post Drafts

When to use: Posts keep you top of mind in your network. You do not need to be a writer.

COPY THIS PROMPT

Draft 3 short LinkedIn posts to build my professional visibility while job hunting. My field: [FIELD]. My recent real material (pick what applies): [A PROJECT RESULT, A LESSON LEARNED AT WORK, A TOOL I STARTED USING, A COURSE I FINISHED]. Post 1: a short lesson learned, storytelling style, ends with a question. Post 2: a mini how-to or list (5 tips style) from my experience. Post 3: a milestone post (course finished / project shipped) with gratitude, humble tone. Each under 120 words, simple English, no hashtags beyond 2-3, no corporate buzzwords.

Make it yours: One post a week is enough. Hiring managers do read profiles of people who show up in their feed for the right reasons.

Prompt 31 — The Open-to-Work Post

When to use: Telling your network you are looking. The post that works is humble, specific, and easy to share.

COPY THIS PROMPT

Write a LinkedIn post announcing I am open to [TARGET ROLE] opportunities. My background: [2 LINES]. What I am looking for: [ROLE TYPES, LOCATION PREFERENCE, REMOTE OK?]. What I bring: [2-3 PROOF POINTS WITH NUMBERS IF POSSIBLE]. Tone: positive and forward-looking, never desperate, one touch of personality. Structure: a strong honest opening line (not "I never thought I would write this post"); background; what I am seeking; how people can help (tag, share, or DM); thanks. Under 150 words. Also give 3 lines I can put in the comments for my own post with my location and role for sharability.

Make it yours: Turn on "Open to Work" visible-to-recruiters in settings regardless — the green ring matters more than the post.

Prompt 32 — The Full Profile Audit

When to use: Run this before anything else on your profile. Fix once, benefit everywhere.

the Indian job market. I will paste my profile details (headline, About, a [TARGET ROLE] candidate: (1) Rate each section out of 10; (2) The ten text for each; (3) What recruiters searching for [KEYWORDS] would e makes me look like that I do not want to look like; (5) anner, custom URL, location, open-to-work). Be direct. My profile

[PASTE EVERYTHING YOU CAN SEE ON YOUR PROFILE]

Make it yours: Do this before Prompt 25-31 so you fix the foundation first, then polish the sections.

PART 6

Interview Prompts

Rehearse until nothing surprises you. 16 prompts.

In this part

- P33 to P48: mock interviews, STAR answers, company prep, walk-ins, group discussions, English practice
- The AI is the interview coach that never gets tired of you

Prompt 33 — The Mock Interview (Friendly Mode)

When to use: The night before any interview. Practice beats preparation notes.

COPY THIS PROMPT

You are a friendly but honest interviewer for a [JOB TITLE] position at a [COMPANY TYPE] in India. Conduct a realistic mock interview with me. Ask one question at a time, wait for my answer, and after each answer give me: one thing that worked, one thing to improve, and a stronger rewritten version of my answer in 2-3 lines. Start with "tell me about yourself", then mix role-specific, behavioral, and situational questions. Ask me 8-10 questions, then give a final verdict with my 2 weakest areas. My background for context: [2-3 LINES AND YOUR RESUME IF PASTEABLE].

Make it yours: Do this out loud, not silently in your head. Speaking answers exposes weaknesses that reading hides.

Prompt 34 — The "Tell Me About Yourself" Builder

When to use: The first question of every interview. You will be asked it this month. Build it once, properly.

COPY THIS PROMPT

Build my 60-second "tell me about yourself" answer. My background: [DEGREE/CURRENT ROLE, YEARS OR FRESHER]. My strongest skill: [SKILL]. My proof: [ONE SPECIFIC ACHIEVEMENT WITH A NUMBER]. The role: [JOB TITLE] at [COMPANY]. Structure: (1) who I am professionally in one sentence; (2) my most relevant strength with proof in two sentences; (3) why this company and role specifically in one sentence [ADD ONE GENUINE REASON]; (4) what I want next in one sentence. Rules: do not start with my name, do not recite my whole resume, under 150 words, spoken-natural English, active voice only. Then give me a 20-second short version for phone screens.

Make it yours: Rehearse until it is 45-60 seconds of speaking. Time yourself. Most candidates ramble to 3 minutes and lose the room.

Prompt 35 — The STAR Answer Builder

When to use: For every "tell me about a time when" question. One strong method, every time.

COPY THIS PROMPT

Help me build a STAR answer for this interview question: "[PASTE THE BEHAVIORAL QUESTION]". My relevant experience: [DESCRIBE THE SITUATION IN YOUR OWN ROUGH WORDS — DO NOT WORRY ABOUT STRUCTURE]. Format my answer as: Situation (1 sentence of context), Task (1 sentence of my responsibility), Action (2-3 sentences of what I specifically did — use "I" not "we"), Result (1 sentence, quantified if possible). Constraints: under 200 words total, flag where a real number belongs with [ADD METRIC], make the Action section sound like my decision-making, and end with one line connecting the experience to the [TARGET ROLE] I am interviewing for. Then ask me 2 tough follow-up questions an interviewer might ask about this story.

Make it yours: Build 4-5 STAR stories covering: a conflict, a failure, a leadership moment, a deadline crunch. They combine to answer 90% of behavioral questions.

Prompt 36 — The Question Predictor

When to use: The most under-used advantage: know what is likely to be asked before you walk in.

COPY THIS PROMPT

I have an interview for [JOB TITLE] at [COMPANY] in [INDUSTRY] on [DATE, OR WITHIN DAYS]. Job description: [PASTE JD]. My background: [3-4 SENTENCES]. Give me: (1) The 8 most likely questions for THIS role at THIS company — based on the JD's emphasis and typical practice for this company type, not generic questions; (2) 3 technical or domain questions the JD implies; (3) The one question I am most likely to struggle with given my background, and how to handle it honestly; (4) Two smart questions I should ask them that show strategic thinking (not salary/leave questions); (5) One genuine fact about [COMPANY] I can naturally mention to show I researched them.

Make it yours: Search the web for "[COMPANY] interview experience [ROLE]" on Gemini/Perplexity first, then feed what you find into this prompt.

Prompt 37 — The "Why Should We Hire You?" (Fresher Edition)

When to use: The trap question for freshers: no experience, must still be the answer.

COPY THIS PROMPT

I am a fresher interviewing for [JOB TITLE] at [COMPANY]. My honest assets: [DEGREE, PROJECTS, INTERNSHIPS, SKILLS, ANY ACHIEVEMENT]. Build my answer to "why should we hire you?": (1) Reframe my lack of experience honestly as low cost-to-train plus current knowledge; (2) Lead with my [BEST PROJECT/INTERNSHIP] as proof I can learn and deliver; (3) Connect 2 of my skills to what the JD emphasizes: [PASTE KEY JD REQUIREMENTS]; (4) Close with genuine energy for this specific company. Under 120 words, spoken style, zero cliches ("I am a fast learner" is banned — show it instead through a specific example of how quickly I learned something real).

Make it yours: The formula: freshers compete on evidence of learning speed, not on experience. One project with a real outcome is that evidence.

Prompt 38 — The "Why This Company?"

When to use: Because "it is a great company with a great culture" ends interviews.

COPY THIS PROMPT

Build my answer to "why do you want to work here?" for [COMPANY] for the [JOB TITLE] role. What I actually know and like about them: [PRODUCTS YOU USE, NEWS YOU READ, VALUES FROM THEIR SITE, PEOPLE YOU KNOW THERE — WRITE WHATEVER YOU GENUINELY HAVE, EVEN IF LITTLE]. My career goal: [1 SENTENCE]. Structure: one specific honest hook about them; one line on how the role fits my direction; one line on what I would enjoy contributing. Under 100 words. Then tell me: 2 quick research moves I should make in the next 24 hours to strengthen this answer with real material.

Make it yours: If you truly know nothing about the company, spend 20 minutes on their website and news before this prompt — that homework is the answer.

Prompt 39 — The Weakness Answer

When to use: The question everyone lies on and everyone hears the same lie through.

COPY THIS PROMPT

Build my "what is your greatest weakness?" answer. My genuine weaknesses (pick the safest to discuss): [LIST 2-3 REAL ONES — e.g., public speaking, saying yes to too much, getting stuck in details, limited experience with X TOOL]. The role: [JOB TITLE]. Choose the least dangerous for this role and build: (1) The weakness stated plainly, no humblebrag ("I am a perfectionist" is banned); (2) One real sentence of context on how it has actually affected me; (3) The specific steps I am taking to manage it; (4) One line of early proof it is improving. Under 90 words, honest tone. Then tell me which of my listed weaknesses I should NEVER volunteer in an interview for this role and why.

Make it yours: Never pick a weakness that is a core requirement of the job. Accountant saying "detail-orientation" = rejected.

Prompt 40 — The Strengths With Proof

When to use: "I am hardworking and dedicated" — said everyone, convinced no one.

COPY THIS PROMPT

Build my "what are your strengths?" answer for a [JOB TITLE] interview. My real strengths: [LIST 3 HONEST ONES WITH ANY EXAMPLE YOU CAN THINK OF, HOWEVER SMALL]. For each: (1) name it in fresh words (not "hardworking"); (2) prove it with one specific real example; (3) connect it to something in the JD: [PASTE 3-4 KEY JD REQUIREMENTS]. Give me the full 3-strength version (under 150 words) and a short 1-strength version for quick answers. Mark every [ADD METRIC] where a real number belongs.

Make it yours: The proof sentence is the whole answer. A strength without a story is a claim; with a story, it is a fact.

Prompt 41 — The HR Round Rapid Prep

When to use: Freshers' HR rounds are surprisingly standardized. Prepare the predictable in 30 minutes.

COPY THIS PROMPT

I am a fresher with an HR round tomorrow for a [JOB TYPE] role at a [COMPANY TYPE — e.g., Indian IT services firm]. Prepare me: (1) The 10 questions HR rounds for freshers almost always ask (relocation, bond/service agreement, marks, backlogs, gap, higher studies plans, salary, shift work, why not higher studies, family background); (2) For each, what HR is actually checking; (3) My best honest answer structure given my situation: [YOUR SITUATION IN 3-4 LINES — MARKS, RELOCATION OK?, ANY BACKLOGS/GAPS, HIGHER STUDIES PLANS YES OR NO]; (4) The 3 questions I should ask HR. Keep answers short and natural, not scripted-sounding.

Make it yours: For the "higher studies?" question, have one honest settled sentence. Hedging sounds like "I leave in 8 months."

Prompt 42 — The Concept Explainer

When to use: Any technical topic, at exactly the level you need — from "what even is it" to interview-crisp.

COPY THIS PROMPT

Explain [CONCEPT/TECHNOLOGY/TOPIC] for my [JOB TITLE] interview at [COMPANY] in 4 levels: (1) one simple sentence with a real-world analogy; (2) a 5-line explanation a smart non-expert would follow; (3) the interview-ready version: crisp, technically correct, 100 words, with the 2 terms interviewers expect to hear; (4) the 3 most common follow-up questions on this topic with short strong answers. Then quiz me: ask me 3 questions to check I really understood, and correct my answers.

Make it yours: If you struggle at level 3, iterate: "explain the part about [X] again more slowly." Do not walk into an interview with level-1 understanding of your resume's keywords.

Prompt 43 — The Strict Mock (Critique Mode)

When to use: Friendly practice has a limit. When the interview is in 48 hours, switch to strict.

COPY THIS PROMPT

You are a strict, senior interviewer at [COMPANY TYPE] for [JOB TITLE]. This is my final rehearsal. Ask me questions one at a time. After each answer: score it 1-10, point out exactly what was weak (vagueness, rambling, no example, no number, defensive tone), and give the improved 3-line version. Do not soften feedback. If my answer is a 6 or below, ask a follow-up that presses the weak spot. After 8 questions, give: overall readiness 1-10, the 2 habits that will sink me, and my single most important fix before [INTERVIEW DAY]. My resume/background: [PASTE OR SUMMARIZE].

Make it yours: Run Prompt 33 earlier in the week for confidence; run this one last. One strict rehearsal is worth three comfortable ones.

Prompt 44 — The Questions to Ask Them

When to use: "Any questions for us?" — the free points most candidates throw away.

COPY THIS PROMPT

I am interviewing for [JOB TITLE] at [COMPANY]. Generate 10 smart questions I can ask the interviewer, grouped: (1) about the role's real work (what success looks like in 6 months, biggest current challenge); (2) about the team and manager (how the team works, what happened to this opening); (3) about growth (how performance is measured, learning culture). Mark the 3 best for a final round. Exclude anything answerable from their website (lazy), anything about salary/leaves (too early), and anything that sounds rehearsed-smart but is actually empty. Also give one graceful question about the next steps in the process.

Make it yours: Asking "what does success in this role look like in 6 months?" makes the interviewer visualize you in the role. That question alone is worth it.

Prompt 45 — The Walk-In 10-Minute Drill

When to use: Walk-in interviews are decided in the first two minutes. Prepare the two minutes.

COPY THIS PROMPT

I have a walk-in interview tomorrow for [ROLE TYPE — e.g., IT support / BPO / sales / operations] at [COMPANY]. Give me a 10-minute final drill: (1) My 30-second self-introduction draft based on: [YOUR 2-LINE BACKGROUND] — high energy, spoken-English, simple words; (2) The 5 most likely first-round questions for this role type with 2-line answer frames; (3) 3 things selectors notice in the first 2 minutes (greeting, posture, clarity) with a quick checklist; (4) What to carry: [tell me the standard list for Indian walk-ins]; (5) One line to say if asked "why should we take you?" Then run a rapid 5-question round with me right now — one at a time, correct me after each.

Make it yours: For walk-ins: reach early (before the queue), carry 5 printed resume copies, and rehearse your intro out loud on the way.

Prompt 46 — The Group Discussion Prep

When to use: GD rounds filter for thinking and speaking under pressure. Both are trainable tonight.

COPY THIS PROMPT

I have a group discussion round for [COURSE/COMPANY — e.g., MBA admission / B-school / corporate selection] on [TOPIC IF KNOWN, OR typical current topics]. Prepare me: (1) How GDs are actually scored (content, structure, listening, entry, behavior — not volume); (2) A 4-step framework for structuring any GD point in 30 seconds; (3) 3 strong opening statements I can adapt to most topics; (4) Full sentences for entering the discussion politely mid-noise; (5) What to do if I know nothing about the topic; (6) The 5 mistakes that get people eliminated (interrupting, monologue, attacking, hogging airtime, silence). Then run a mini-GD: give me a topic, let me give 2 points, critique them.

Make it yours: In a GD, 3 well-timed contributions beat 10 interruptions. The scorer's pen moves for quality and listening, not loudness.

Prompt 47 — The English Practice Partner

When to use: You know the answer. It dies between your brain and your mouth in English. Fix exactly that.

COPY THIS PROMPT

You are my English practice coach for job interviews. I will type my interview answers as roughly as I think them — in Hinglish or broken English, exactly how they come out of my head. For each answer: (1) Rewrite it in clean, simple, professional English — short sentences, common words, nothing fancy; (2) Show me the 3 key phrases from it I should memorize, not the whole script; (3) Point out one English mistake I keep repeating. Start now by asking me: "tell me about yourself" — I will answer in my rough English, you coach. Continue for 10 answers.

Make it yours: Practice saying the corrected versions out loud, 3 times each. Interview English is a muscle, and it only grows through the mouth, not the eyes.

Prompt 48 — The Salary Question Handling

When to use: HR asks your expectation early. What you say in that moment either protects or caps your offer.

COPY THIS PROMPT

I am in an interview process for [JOB TITLE] at [COMPANY] in [CITY]. My current salary: [CURRENT CTC, OR FRESHER]. My target: [TARGET RANGE]. HR has asked / will ask my salary expectation. Give me: (1) A polite deflection line for the early rounds that keeps the conversation going without me naming a number first; (2) If pressed, a fair-range answer framed around market data for this role-experience combination; (3) One line that anchors my value to my achievements before any number; (4) What NOT to say (my current CTC details too early, a hard single number, anything apologetic); (5) 2 lines for handling "that is above our budget". Keep it natural spoken English, 2-3 sentences per answer.

Make it yours: Rule: whoever names the first number anchors the negotiation. Deflect politely in early rounds; you negotiate seriously only when they want you — that is leverage.

PART 7

Salary and Offers

Get paid what the role is worth, with a script. 6 prompts.

In this part

- P49 to P54: market research, negotiation scripts, counter-offers, offer comparison, appraisals, resignations

Prompt 49 — The Market Rate Research

When to use: Before naming any number, know the field. Research like an analyst, not a guesser.

COPY THIS PROMPT

Act as my salary research assistant for the Indian market. Role: [JOB TITLE]. My experience: [YEARS/SKILLS/EDUCATION]. Cities I would work in: [CITIES/REMOTE]. Current CTC: [AMOUNT OR SRESHER]. Search current Indian market data and summarize: (1) The typical salary range for this role at this experience level in these cities — small companies vs large; (2) What factors push candidates to the top of that range (skills, certifications, domain); (3) Where I realistically fall in the range and what would move me up; (4) A target range I can quote with confidence. Cite where the numbers come from and tell me what to verify myself. If data is thin for my exact niche, say so rather than inventing precision.

Make it yours: Cross-check any number with 1-2 live sources (job postings with ranges, salary-discussion sites) before you quote it. Never quote a range you cannot defend.

Prompt 50 — The Negotiation Script

When to use: You have the offer. Now the most profitable 10 minutes of your career.

COPY THIS PROMPT

I have a job offer for [JOB TITLE] at [COMPANY]: offered [OFFER DETAILS — CTC, COMPONENTS, LOCATION]. My research says the range is [RANGE FROM P49]. My leverage: [ANY COMPETING OFFER / SPECIFIC SCARCE SKILLS / CURRENT ROLE DETAILS]. Build my negotiation: (1) A phone-call script — enthusiastic about the role BEFORE discussing money, then a polite, confident ask for [TARGET] anchored to my value; (2) An email version if they prefer written; (3) 3 likely responses (yes / partial / "that is our max") and my reply to each; (4) What else is negotiable if cash is fixed (joining bonus, title, review timing, remote days, learning budget); (5) One line to ask for time to decide without losing momentum. Tone: warm, firm, never adversarial.

Make it yours: Negotiate after they want you and before you sign — the offer letter is the last moment of maximum leverage you will ever have with this employer.

Prompt 51 — The Counter-Offer Email

When to use: The written counter. Short, warm, specific — and always anchored to value.

COPY THIS PROMPT

Write a counter-offer email for the [JOB TITLE] offer from [COMPANY]. Offer received: [DETAILS]. My counter: [NUMBER OR RANGE] based on [MARKET DATA / COMPETING OFFER / MY SCARCE SKILLS OR ACHIEVEMENT]. Structure: genuine enthusiasm for the role and team (2 lines); my counter with a one-line reason rooted in value, not need; flexibility signal (open to discussing structure — bonus, review timing); a clear next step. Under 150 words. Not begging, not ultimatum. Give me a subject line.

Make it yours: Never counter with "I need more because my expenses..." Employers pay for your value to them; your costs are invisible to them.

Prompt 52 — The Two-Offer Decision Matrix

When to use: Two offers, one decision, family WhatsApp full of opinions. Decide like an engineer.

COPY THIS PROMPT

I have two job offers. Offer A: [COMPANY, ROLE, CTC, LOCATION, GROWTH, ANY DETAILS]. Offer B: [SAME DETAILS]. My priorities, honestly ranked: [e.g., LEARNING > MONEY > STABILITY > LOCATION — RANK YOURS]. My 5-year direction: [WHAT YOU WANT TO BE DOING]. Build: (1) A decision matrix scoring both offers on my ranked priorities; (2) The 3 questions this matrix hides that I must answer honestly; (3) What a 5-year view says that a 1-year view misses; (4) The non-recoverable risks of each choice; (5) Your recommendation with reasoning — and what would need to be true for the other offer to win.

Make it yours: Weight learning and manager quality heavily early in your career — a 20% salary difference compounds far less than a 2x growth rate.

Prompt 53 — The Appraisal and Hike Conversation

When to use: The negotiation you have from a position of strength — inside your current company.

COPY THIS PROMPT

I have my appraisal conversation in [TIMEFRAME]. My role: [ROLE, SINCE WHEN]. My year's real contributions: [LIST WITH NUMBERS WHERE POSSIBLE — PROJECTS, SAVINGS, REVENUE, EXTRA RESPONSIBILITY TAKEN]. Market rate for me now: [FROM P49]. Help me: (1) Build a one-page case for a raise structured as business impact, not effort or personal need; (2) A talking script for the conversation with my manager; (3) 3 likely objections and my responses; (4) If the hike is capped, 3 non-cash asks worth requesting (title, budget, training, flexible work); (5) What never to say (threats, comparisons with colleague salaries, personal financial problems).

Make it yours: Bring receipts, not feelings: a one-page list of your year's measurable impact changes a "you did your job" conversation into a "what do we do to keep you" one.

Prompt 54 — The Resignation Email

When to use: How you leave is remembered longer than how you arrived. Exit clean.

COPY THIS PROMPT

Write a professional resignation email. My notice period per policy: [DURATION]. Last working day: [DATE]. Reason I am leaving (keep private, for your framing): [NEW ROLE / HIGHER STUDIES / PERSONAL / DO NOT WISH TO STATE]. Structure: clear statement of resignation with last working day; gratitude for the opportunity in one genuine line; commitment to a smooth handover (offer to document and transition); no negativity, no salary/emotional content. Under 120 words. Also give: a short version to tell my manager verbally first, and a LinkedIn farewell post draft (positive, forward-looking, gracious).

Make it yours: Tell your manager in person or on a call BEFORE the email goes out. The email is the record; the conversation is the respect.

PART 8

Startups, Internships and Freelancing

The unadvertised doors. 4 prompts.

In this part

- P55 to P58: founder DMs that get replies, internship applications, first freelance clients, alumni networking

Prompt 55 — The Startup Founder Cold DM

When to use: Startups hire people who show up already contributing. A DM is your resume there.

COPY THIS PROMPT

Write a cold DM (LinkedIn or email) to the founder of [STARTUP NAME], which does [WHAT THE STARTUP DOES]. I am a [YOUR ROLE/BACKGROUND] who genuinely [USED THEIR PRODUCT / READ THEIR FOUNDER'S POST / NOTICED A SPECIFIC THING — BE HONEST ABOUT WHAT]. What I could contribute: [SPECIFIC SKILLS RELEVANT TO THEIR PROBLEM]. Structure: one line showing I actually know their company; one line of honest specific praise or a genuinely useful observation [e.g., a small suggestion or a bug or a content idea]; two lines on who I am and what I could do for them; one easy ask (a 10-minute chat about [SPECIFIC AREA]). Under 90 words. No "I would love to pick your brain".

Make it yours: Founders reply to people who reduce their load, not increase it. One real observation about their product is worth more than any cover letter.

Prompt 56 — The Internship Application

When to use: Internshala, LinkedIn, or direct: stand out among hundreds of identical applications.

COPY THIS PROMPT

Write an internship application for [ROLE, e.g., marketing / development / design] at [COMPANY]. I am a [YEAR, e.g., 2nd-year] [DEGREE] student at [COLLEGE]. My relevant proof: [PROJECTS, SOCIETY WORK, PRIOR INTERNSHIPS, SKILLS — WHATEVER YOU HONESTLY HAVE]. Structure: subject line with role and college; 3-line opening that connects MY specific work to THEIR specific work (what they do: [ONE LINE]); 3-4 lines on my proof with one concrete example; one line on availability (hours/week, months, remote/relocation); clean close. Under 130 words. If I have no direct experience, give me a version that turns my [PROJECT/COURSEWORK] into relevant evidence honestly.

Make it yours: Apply within 48 hours of a posting going live and follow up in 5 days with one line + your availability. Speed is a filter in internship hiring.

Prompt 57 — The First Freelance Client Pitch

When to use: Your first client will come from a message, not a marketplace ranking. Send the message.

COPY THIS PROMPT

Write a pitch to a potential freelance client: a [TYPE OF BUSINESS — e.g., local boutique, coaching center, clinic, restaurant] that needs [SERVICE YOU OFFER — e.g., Instagram content, a website, data entry automation, design]. I am a [YOUR BACKGROUND]. My honest proof: [ANY PROJECT, EVEN PERSONAL/FAMILY/COLLEGE ONE]. Structure: one line showing I looked at their business specifically [SOMETHING REAL YOU NOTICED]; one line on the problem I noticed I can fix; two lines on what I would do for them concretely; my offer: [e.g., FIRST SMALL TASK FREE / FIXED LOW STARTING PRICE]; one low-pressure ask. Under 100 words, WhatsApp-appropriate.

Make it yours: First client rule: start with one small paid-or-free task, deliver brilliantly, then ask for the bigger engagement plus a testimonial.

Prompt 58 — The Alumni and Senior Networking Message

When to use: Your college alumni network is the highest-conversion job channel you have. Most people never message.

COPY THIS PROMPT

Write a LinkedIn message to [WHO: A SENIOR FROM MY COLLEGE / SOMEONE FROM MY HOMETOWN / A PROFESSIONAL I ADMIRE IN MY FIELD] who works at [TARGET COMPANY] as [THEIR ROLE]. I am [MY SITUATION IN 1 LINE]. Ask for guidance, not a job: request 10 minutes to hear about their path and [ONE SPECIFIC THING: THEIR TEAM'S WORK / HOW THEY MOVED INTO X / WHAT SKILLS MATTER IN Y]. Structure: the genuine connection line; why them specifically; the small specific ask; an easy out ("completely understand if you are busy"). Under 70 words. Then give me a 2-line follow-up to send after they reply.

Make it yours: People help people who ask for advice. The referral usually comes in the second conversation — after you have thanked them for the first.

PART 9

The 7-Day Job Hunt Sprint

Turn 60 prompts into a working system this week.

In this part

- The day-by-day plan
- P59: the 5-minute application tailor
- P60: the weekly review
- The rules that make the sprint work

The Day-by-Day Plan

Day 1 — Foundation. Run P04 (audit) and P32 (LinkedIn audit). Fix your resume with P01, P03, P09. Build your master resume — the complete, honest, achievement-driven version you will tailor from all week.

Day 2 — LinkedIn presence. P25 (headline), P26 (About), P27 (experience), P28 (skills). Turn on Open-to-Work for recruiters. Your profile now works for you while you sleep.

Day 3 — Pipeline. Shortlist 15-20 roles across Naukri, LinkedIn, and company sites. Apply to 5 with P59 (the 5-minute tailor) on each — every application tailored, zero generic blasting. Track them in one sheet: company, role, date, status, follow-up date.

Day 4 — Interviews begin. Build your "tell me about yourself" with P34. Build 4 STAR stories with P35. Run one friendly mock with P33 — out loud.

Day 5 — Keep applying, start following up. 5 more applications with P59. Send P17 follow-ups for everything older than 5-7 days. Send 3 networking messages with P20 or P58.

Day 6 — Deep prep for your best shot. For your strongest live application: P36 (predict questions), P42 for any shaky concept on your own resume, P44 (your questions for them), and end with one P43 strict mock.

Day 7 — Review and recharge. Run P60 (the weekly review). Adjust. Rest. The sprint repeats — with better materials every single week.

The Rules That Make It Work

- **Quality over volume:** 5 tailored applications beat 50 generic ones. The gate is relevance, not luck.
- **Follow up once:** it doubles your visibility; twice becomes pressure.
- **Honesty is a strategy, not just ethics:** everything you write must survive an interview question about it.
- **Track everything** in one sheet — the follow-up dates alone will win you interviews others forget to convert.

Prompt 59 — The 5-Minute Application Tailor

When to use: Your daily driver. Every serious application, tailored in 5 minutes flat.

COPY THIS PROMPT

You are my application tailoring assistant. JOB DESCRIPTION: [PASTE JD]. MY MASTER RESUME: [PASTE MASTER RESUME]. Give me, ready to paste: (1) A tailored professional summary for this exact role; (2) My 5 most relevant bullets for this JD, reordered and keyword-matched to the JD's exact phrasing (only where true); (3) The first 3 lines of a cover letter referencing something specific about this company [COMPANY NAME]; (4) A quick verdict out of 10 on my fit for this role, so I do not waste days on a 4/10. Never invent experience or skills.

Make it yours: Bookmark this one. Tailoring is the highest-return 5 minutes in the entire job hunt.

Prompt 60 — The Weekly Job Hunt Review

When to use: Every Sunday. 10 minutes. The difference between effort and a system.

Give me this week's numbers: applications sent [N], tailored vs generic
recruiter replies [N], interviews [N], rejections [N], networking messages [N].
The most — applications to replies, or interviews to offers; (2) The one
specific prompt from this kit that moves it; (3) Whether my target roles
are going wrong; (4) One process fix. Be direct and quantitative. My numbers:

[FILL IN YOUR NUMBERS]

Make it yours: Numbers, not feelings. "Bad week" hides a 2x jump in recruiter replies; only the sheet tells you the hunt is working.

You now hold a complete system.

Sixty prompts. Nine parts. Every stage of the Indian job hunt — from blank page to signed offer. The candidates competing with you are using AI too. The ones who win are the ones using it deliberately, honestly, and well. That is now you.

THE AI JOB HUNT KIT

A Digitalaikart Premium Edition — September 2026

digitalaikart
