DIGITALAIKART

PREMIUM INDIA PLAYBOOK · 2027-28 SEASON EDITION

DIGITALAIKART ORIGINAL

The Preschool Admissions Engine

100 AI prompts and 12 ready templates for Indian play schools, preschools and daycares

WHAT IS INSIDE

- Enquiry replies that arrive in minutes
- Fees a parent can trust on one page
- Instagram and WhatsApp, twenty minutes a week
- Teachers, ratios and safety paperwork
- The visit, designed minute by minute
- Google and local search, at zero cost
- Parent messages for the hard weeks
- The register and the four numbers that matter

100 PROMPTS | 10 PARTS | 8 APPENDICES | 12 TEMPLATES

Verified against NCPCR Regulatory Guidelines for Private Play Schools · Delhi Directorate of Education foundational-stage circulars · CBSE assessment pattern for 2026-27 · vendor pricing pages, November 2026

Digitalaikart — a brand of UTILITYNEST · digitalkartai.shop

BEFORE YOU START

How to use this pack

You do not have to read this book. You have to open it on the day you need it.

This pack is not a course. It is a set of working documents. Every page is either a prompt you paste into an AI assistant, or a template you fill in once and use for the whole season. The prompts are numbered so that you can find the one you need while a parent is waiting at the gate.

> THE THREE-MINUTE START
>
> 1. Open ChatGPT, Gemini or Claude. The free version is enough for everything in this pack.
> 2. Go to page 9 and copy the Master Context block. Paste it as your first message and send it.
> 3. Pick any prompt, replace every square bracket with your own facts, and send it.

Why there is a rule inside almost every prompt

Each prompt carries its own guardrail, because a preschool cannot afford a confident invention. An AI assistant will happily write a fee, a teacher-to-child ratio, a CCTV retention period, a state rule or a glowing parent testimonial that never happened. The rules in the prompts - do not invent facilities, do not diagnose, do not promise a seat, do not identify a child - are the part of this pack that protects you. Appendix F collects all ten into one checklist you can run in three minutes before anything reaches a parent.

What is verified, and what is yours to verify

Three kinds of fact appear in this pack, and they are treated differently.

Official facts - the NCPCR play school norms, the age structure from the NEP 2020 foundational stage, the Delhi phase-in dates, the CBSE assessment composition - are taken from the published sources and reproduced in the appendices with their scope stated. They still need checking against your own state, because preschool regulation in India is a state subject and moves at different speeds.

Market observations - response-time effects, funnel ranges, the shape of the admission calendar - come from consultants and agencies who publish their work with Indian preschools. They are presented as ranges and patterns, not as guarantees. Your own register will replace them within one season.

Your facts - every fee, timing, ratio, facility and name - come from you. Nothing in this pack fills those in for you, and no prompt should be sent with a bracket still in it.

How the twelve templates fit

Prompts 41 to 50 are not prompts at all in the usual sense. They are the documents a parent takes away: the one-pager, the brochure, the admission form, the document checklist, the welcome pack, the parent handbook, the consent bundle, the website admissions page, the founder's note and the FAQ. Together with the fee sheet in Prompt 31 and the 30-minute visit flow in Prompt 21, they make up the twelve templates in this pack. Run each prompt once, print the output,

correct it by hand, and you have a document set that most Indian preschools never assemble. Reuse it every season with the fee numbers updated.

THE ONE HONEST SENTENCE

Nothing here works if you reply to a parent two days late. A perfect fee sheet sent on Thursday does not save an enquiry that arrived on Monday night. Prompt 1 is the most valuable page in this book, and it costs nothing to use.

CONTENTS

What is inside

PART 1	Enquiry & First Reply	1–10
PART 2	Qualification & the Enquiry Call	11–20
PART 3	The School Visit	21–30
PART 4	Fees, Packages & the Money Conversation	31–40
PART 5	The Brochure, the One-Pager & the Admission Kit	41–50
PART 6	Google Business Profile & Local Search	51–60
PART 7	Instagram, WhatsApp & the Content Engine	61–70
PART 8	Parent Communication All Year	71–80
PART 9	Teachers, Safety & Compliance	81–90
PART 10	Admissions Operations & the Numbers	91–100

APPENDIX H	The One-Page Cheat Sheet
WORKSHEETS	Register, objection bank and the weekly review

THE PROBLEM THIS PACK SOLVES

Where the seats actually go

Almost no Indian preschool has an enquiry problem. Most have a conversion problem.

Preschool consultants who audit Indian schools describe the same four leaks again and again. They are worth reading in order, because the fixes get cheaper as you go down the list.

1. The reply arrives too late

A parent messages at nine in the evening. The school replies the next afternoon, or two days later. By then the parent has visited a competitor. Practitioners who track this report that replying within an hour can multiply conversion several times over. It is the cheapest fix in this book and the one most owners skip, because it depends on a habit rather than a budget.

2. The first call has no script

A parent asks "what is the fee?" and receives a number. The number sounds high with nothing around it, so the parent hangs up. The call that should have ended with a visit slot ended with a figure.

3. The visit is not designed

The parent walks in, sees a classroom, takes a brochure and leaves. Nobody shows the curriculum. Nobody introduces the teacher who would actually teach the child. Nobody explains what happens between nine and twelve, which is the only question the parent is really asking.

4. Nobody follows up

After a visit, most schools send nothing at all. The parent forgets, or visits two more schools, and the school that stayed in touch gets the admission. A four or five message sequence over a week is usually enough - if the messages give something instead of chasing.

> WHAT THIS MEANS IN NUMBERS
>
> If you need thirty seats and your enquiry-to-visit rate is 60% while your visit-to-enrolment rate is 40%, you need roughly 125 enquiries. Drop the visit-to-enrolment rate to 20% - which is what an undesigned visit and no follow-up produce - and the same thirty seats need 250 enquiries. The marketing budget did not change. The seats did. Appendix D is the worksheet for your own numbers.

Why the season in front of you is the right one to fix it

Indian preschool admissions run on a clock: parents research from October, visit through December and January, and decide by March. That means the work in this pack has a deadline, and it is not a soft one. It also means that the 2027-28 season has a specific commercial opening: from that session, Delhi schools introduce Lower KG and Upper KG as formal classes under the NEP foundational stage, which turns a two-year preschool decision into a three-year one.

Appendix C sets out the published dates. If you can sell a three-year journey and name the schools your batches moved on to, you are answering a question most of your competitors have not noticed.

THE MASTER CONTEXT BLOCK - PASTE THIS FIRST

Copy the block on the next page into your assistant once. Then every prompt in this pack already knows your school, your programmes, your fees and your rules, and you only fill in the brackets that change.

SETUP

The Master Context block

Fill this in once, paste it as your first message, and keep it in a note on your phone.

PASTE THIS · REPLACE EVERY BRACKET

You are my admissions and communications assistant for an Indian preschool. Use only the facts below. If something is missing, ask me instead of guessing. Never invent a fee, a facility, a ratio, a certification, a review or a rule. Never promise a seat, a discount or an outcome for a child. Never diagnose a child or suggest a treatment. Never name a competitor. Write in simple, warm Indian English unless I ask for Hinglish.

SCHOOL: [NAME], [LOCALITY], [CITY], running since [YEAR]
PROGRAMMES AND AGES: [Playgroup 2+, Nursery 3+, LKG 4+, UKG 5+, daycare till X pm]
TIMINGS: [DETAIL] HOLIDAYS: [POLICY]
CLASS SIZE AND RATIO: [NUMBER] children, [NUMBER] teachers, [NUMBER] caregivers
FEES: admission [AMOUNT] one-time, monthly [AMOUNT] for [PROGRAMME], annual [AMOUNT] covering [LIST], transport [AMOUNT] from [AREAS]
WHAT WE HAVE: [CCTV, play area, meals, nap room, transport - only what is true]
WHAT WE DO NOT HAVE: [BE HONEST - this stops the model inventing it]
TEACHERS: [NUMBER], qualifications [LIST], average tenure [YEARS]
SAFETY: [GATE AND PICK-UP RULE, CCTV COVERAGE, FIRST AID, STAFF VERIFICATION]
ADMISSION PROCESS: [FOUR STEPS]
VISIT SLOTS: [DAYS AND TIMES]
SESSION STARTS: [DATE] SEATS LEFT: [BY PROGRAMME]
WHO TO CONTACT: [NAME, ROLE, NUMBER]
MY RULES: no false urgency, no 'best preschool', no 'world-class', no exclamation marks, no emojis beyond one, under [WORD COUNT] words unless I ask for more.

Why this works. Most disappointing AI output is not a model problem; it is a missing-context problem. Once the assistant has your real facts and your real limits in front of it, the same prompt produces something you can send with two edits instead of twenty.

Keep it updated. When your fee changes, change it here first. Half the wrong numbers in school marketing come from a document that was accurate in June.

PART 1

Enquiry & First Reply

PROMPTS 1-10

The first reply decides the season. In the audits that preschool consultants publish, slow replies, no call script, an undesigned visit and no follow-up are the four leaks that lose most enquiries. This part closes the first one: every enquiry answered warmly, correctly and inside the hour, in the parent's own language.

1 The 10-minute WhatsApp first reply

Use when: A parent messages 'Is admission open?' at 9:40 pm. You are replying from your phone.

PROMPT

You are the admissions head of an Indian preschool. Write a WhatsApp reply to a parent enquiry. Keep it under 90 words, warm and specific, no emojis beyond one, no sales language.

School: [SCHOOL NAME], [LOCALITY], [CITY]
Programmes: [Playgroup 2+, Nursery 3+, LKG 4+, UKG 5+]
Timings: [TIMINGS]
Fee range: [FEE RANGE PER MONTH]
Next open day: [DATE]

Parent's message: [PASTE THE MESSAGE]
What I know about the child: [AGE, ANY DETAIL THE PARENT SHARED]

The reply must do five things in this order:
1. Use the parent's name if known, and the child's name if shared.
2. Answer the actual question in the first line.
3. Give one concrete detail that proves a real school is replying (a timing, a teacher's name, a class size).
4. Offer exactly one next step with two time options for a visit.
5. Ask one question that makes replying easy (child's age, or which locality they are in).

Rules: do not invent facilities, awards, ratios or fees I have not given you. Do not say 'best preschool'. Do not use the words 'dear parent'. Do not promise a seat.
Output: the message only, ready to send.

NOTE Send within 10 minutes during the day. If it is after 9 pm, send it anyway and say you will call at 10 am.

2 The Instagram DM to WhatsApp handoff

Use when: A parent comments 'fees?' on a reel, or sends a DM. Instagram is not where admissions close.

PROMPT

You are a preschool admissions head. A parent has messaged on Instagram. Write two short messages.

Message 1 (Instagram DM, under 45 words): acknowledge, answer the one thing they asked, and move the conversation to WhatsApp with a reason that helps them, not us. Give my WhatsApp link as [WHATSAPP LINK].

Message 2 (WhatsApp, under 110 words): the full warm reply with the fee range, the age group, one safety or teaching detail, and two visit slots.

Context:
School: [SCHOOL NAME], [LOCALITY]
Programmes and ages: [LIST]
Monthly fee range: [RANGE]
Instagram message received: [PASTE]
Child's age: [AGE IF KNOWN]

Rules: never post fee details as a public comment reply; say you are sending it privately. Do not invent anything. No pressure words like 'hurry' or 'limited seats' unless I tell you seats are limited.
Output: Message 1, then Message 2.

NOTE If the parent commented publicly, reply publicly with one friendly line and take the rest to DM.

3 The 'fees kitna hai?' answer that does not lose the parent

Use when: The most common question in Indian preschool admissions, and the one most owners answer with a bare number.

PROMPT

You are an admissions adviser for Indian preschools. A parent asked only 'fees kitna hai?' Write three versions of the answer, each under 100 words.

My real numbers:
Admission fee: [ONE-TIME AMOUNT]
Monthly fee: [AMOUNT] for [PROGRAMME]
Annual charges: [AMOUNT] and what they cover: [LIST]
Transport: [AMOUNT OR NOT OFFERED]
What is included: [MEALS / KIT / ACTIVITIES]
What is not included: [LIST]

Version A - WhatsApp, English.
Version B - WhatsApp, Hinglish (Roman script, the way a Pune or Lucknow owner actually types).
Version C - the same answer on a phone call, written as talking points.

Each version must: give the full picture in one message (one-time + monthly + annual), name one thing the fee buys that a cheap competitor does not, and end with a question about the child rather than a push to pay.

Rules: do not hide charges to look cheap. Do not compare with a named competitor. Do not use the word 'affordable' as a substitute for a number.
Output: the three versions with headings.

NOTE Transparency wins here. A parent who learns the annual charge on visit day stops trusting you.

4 The Hinglish reply that sounds like a person

Use when: Most Indian parents under 35 read English fine but relax when you write the way they speak.

PROMPT

You are a warm, professional admissions coordinator at an Indian preschool. Rewrite my English reply in natural Hinglish - Roman script, the way educated Indian parents actually text. Not a translation, a rewrite.

My English reply: [PASTE YOUR REPLY]
City and locality: [CITY, LOCALITY]
Parent's own message, so you can match their tone: [PASTE]

Rules:
- Keep every fact, fee and timing exactly as I wrote it. Change nothing factual.
- No Hindi words that a non-Hindi-speaking parent in Chennai, Kochi or Kolkata would not follow. If my city is outside the Hindi belt, write simple Indian English instead and tell me why.
- No 'ji' at the end of every sentence, no over-familiarity, no emojis beyond one.
- Under 100 words.
Output: the Hinglish version, then one line telling me which version to use for which parent.

NOTE Keep both versions saved as WhatsApp quick replies. Switch by the parent's own first message.

5 The after-hours auto-reply

Use when: Enquiries arrive at 9 pm and 6 am. An unanswered enquiry is a lost enquiry by morning.

PROMPT

You are helping an Indian preschool owner write a WhatsApp Business greeting message and an away message. Parents message at night; the school opens at 9 am.

School: [NAME], [LOCALITY]
Opening hours: [HOURS]
Programmes: [LIST]
Visit slots available: [DAYS AND TIMES]
My mobile for urgent safety matters: [NUMBER]

Write:
1. A greeting message (under 70 words) sent to every new enquiry: welcome, what to expect, ask for the child's age and locality, and give the visit slots.
2. An away message (under 50 words) for 7 pm to 9 am: says when we will reply, gives the brochure link [LINK], and reassures that the message is received.
3. A one-line message for Sunday.
4. A note to me: what must never go into an auto-reply for a school with small children (for example, promising a seat, quoting a final fee, or collecting documents over chat).

Rules: no false urgency, no 'limited seats'. Warm, plain, human.
Output: the four items.

NOTE Set both in WhatsApp Business once. It works every night of the season.

6 The phone call script for whoever picks up

Use when: In most Indian preschools the phone is answered by a teacher, a didi or the owner between classes.

PROMPT

You are training a preschool receptionist in India who has never been taught to handle an admission call. Write a one-page call script she can keep at the desk.

School: [NAME], [LOCALITY]
Programmes and ages: [LIST]
Fee range: [RANGE]
Visit slots: [SLOTS]
Three things that make us different, in plain facts: [LIST - for example, 1:10 teacher ratio, CCTV, trained ECCE staff]

The script must cover:
1. The first 15 seconds (greeting, school name, her name).
2. The five questions she must ask (child's age, locality, which programme, when they want to join, how they heard about us).
3. What to say for 'fees?', 'timings?', 'do you have transport?', 'is there a vacancy in Nursery?'
4. How to end every call: one confirmed visit slot, her name, and what the parent should bring.
5. Three things she must never say (I will check and call you back with no time given; we are the best; a seat is guaranteed).

Write it in short numbered lines a nervous person can read out loud, in simple English.
Output: the script.

NOTE Print it, laminate it, and keep it next to the register. Role-play it twice with the team.

7 The parent who just moved into the locality

Use when: New-to-the-city families convert fastest and decide in days. They have no network and no shortlist.

PROMPT

You are an admissions head at an Indian preschool. A parent has just moved to our locality and knows nobody. Write a reply and a short follow-up plan.

School: [NAME], [LOCALITY], [CITY]
Programmes: [LIST]
What is within walking distance: [PARK, MARKET, LANDMARKS]
Visit slots: [SLOTS]
Transport available in: [AREAS]

Write:
1. A WhatsApp reply (under 110 words) that treats them as new: name the landmark they will recognise, explain the drop-off and pick-up flow, and offer a visit in the next 48 hours.
2. A 'new to the area' note (under 80 words) listing the three practical things a new parent needs to know - timings, transport, and who to call.
3. A three-message follow-up plan over 10 days for a parent who visited but is still deciding.
4. Two questions to ask that reveal whether the child has been in daycare or preschool before.

Rules: no invented landmarks or routes. Ask me to fill anything you do not know.
Output: the four items.

NOTE Ask every new enquiry 'which area are you in?' and log it. It tells you where to spend your ads.

8 The parent comparing you with a chain school

Use when: Kidzee, EuroKids, Klay and Bachpan are on every shortlist. Their marketing department is not your enemy; their standardisation is your opening.

PROMPT

You are a positioning adviser for independent Indian preschools. A parent says: 'We are also looking at [CHAIN NAME] near us. Why should we choose you?'

Our facts: [FEES], [RATIO], [TEACHER TENURE], [OWNER PRESENCE], [CURRICULUM], [SPACE], [TRANSPORT]
What we genuinely do not have: [BE HONEST]

Write:
1. A spoken answer for the visit, 60-90 seconds, that never criticises the chain and instead reframes the choice around what a 3-year-old actually needs.
2. A WhatsApp version under 90 words.
3. Three questions the parent should ask any school, including the chain - questions we can answer well and a large franchise branch often cannot (who teaches my child by name, how many children per teacher, how often the owner is on the floor, how staff turnover is handled).
4. One line for the parent who chooses the chain anyway, so the door stays open for the sibling.

Rules: no disparaging a named brand, no unverifiable claims, no 'we are better'. Facts only.
Output: the four items.

NOTE Never run down a competitor in front of a parent. Ask the questions instead and let the answers work.

9 The 2-year-old enquiry - hold the lead for a year

Use when: A parent of a 2-year-old is not a lost lead. They are next year's Playgroup admission, and nobody else will remember them.

PROMPT

You are an admissions head at an Indian preschool. A parent enquires for a child who is too young for our Playgroup (we take 2+ at [MONTH]). NCPCR play school guidelines bar admission below three in many states, so check what applies here: [WHAT APPLIES IN MY STATE].

Child's age: [AGE]
Programme they asked about: [PROGRAMME]
Distance from school: [AREA]

Write:
1. A reply (under 90 words) that says clearly when the child becomes eligible, explains why the wait is good for the child, and offers a low-commitment next step (a visit, or a monthly parent-toddler session).
2. A 'waiting family' register with the columns I should keep.
3. Three touchpoints over the next 12 months that give value without selling - with the exact month to send each.
4. A short note on what we may and may not say about admission timing and age rules.

Rules: do not promise a seat or a discount for waiting. Do not encourage early admission.
Output: the four items.

NOTE Age rules differ by state. Confirm the rule for your state before you promise anything.

10 The parent who says 'next year'

Use when: Long-fuse leads are the cheapest admissions you will ever get, if you keep them warm without annoying them.

PROMPT

You are a preschool marketing adviser in India. Build a 12-month keep-warm plan for parents who said 'we will join next year'.

School: [NAME], [LOCALITY]
What we can invite them to: [EVENTS, OPEN DAYS, TRIAL MORNINGS, SUMMER CAMP]
Best contact channel: [WHATSAPP / CALL / EMAIL]
Number of such leads I expect: [NUMBER]

Write:
1. A 12-month calendar with one touchpoint per quarter: what to send, why it is useful to a parent, and the exact words for the WhatsApp message.
2. The one event per year that is worth inviting them to, and the invitation text.
3. A 'do not send' list - the five messages that make parents mute you.
4. A simple scoring rule: which of these leads to call first in September, using what I know about them.

Rules: every message must give something (a tip, an event, a checklist), never just 'reminder'. No discounts as bait.
Output: the four items.

NOTE Tag these leads in your phone contacts as 'NEXT-YEAR'. You will forget them otherwise.

PART 2

Qualification & the Enquiry Call

PROMPTS 11-20

A preschool enquiry is not a request for a brochure. It is a parent asking, silently, 'will my child be safe and seen here?' This part gives you the questions that reveal fit in twenty minutes, and the words for the four objections that decide most Indian admissions.

11 The six-question qualification sheet

Use when: You need to know, within one call, whether this family will visit, enrol, and stay.

PROMPT

You are an admissions systems adviser for Indian preschools. Build a six-question qualification sheet for enquiry calls.

School: [NAME], [LOCALITY]
Programmes: [LIST]
Fee range: [RANGE]
Transport areas: [AREAS]
Seats left by programme: [NUMBERS]

For each of the six questions give: the question in the exact words to say, what a good answer sounds like, what a warning answer sounds like, and the one follow-up to ask.

Cover these six areas: the child (age, previous care, any developmental note the parent volunteers), the decision (who decides, when), the geography (locality, commute, transport need), the money (comfort with the fee range, without asking their income), the timeline (joining month), and the trigger (what made them enquire today).

Then add: a 0-3 scoring rule, and the sentence to use when the score is low so the call ends warmly.
Rules: never ask income, caste, religion or the mother's employment status.
Output: the sheet as a table plus the closing sentence.

NOTE Fill this in during the call, not after. Memory rewrites what parents said.

12 The 20-minute discovery call agenda

Use when: An unstructured call turns into a fee negotiation. A structured one ends with a visit booked.

PROMPT

You are an admissions head at an Indian preschool. Write a 20-minute discovery call agenda I can follow with a parent.

Parent: [NAME], child [AGE]
Programmes: [LIST]
Visit slots: [SLOTS]

Structure the call in minutes:
0-2: welcome and permission to ask questions
2-7: the child - routine, previous care, what the parent worries about
7-12: what the family needs - timings, transport, meals, holidays, communication
12-16: our programme explained in the parent's own words, not our brochure language
16-19: the visit - offer two slots, confirm one
19-20: what to bring and what happens next

For each block write: the opening line, the two questions to ask, and the one thing to note down.
Then write: the three sentences that must appear somewhere in the call, and the three that must never appear.
Rules: no scripted monologue longer than 40 seconds. Plain English.
Output: the agenda.

NOTE Book the visit on the call. 'I will send you the slots' loses half of them.

13 The fee conversation without flinching

Use when: Indian parents negotiate because they expect to. The owner who flinches loses either margin or the family.

PROMPT

You are a pricing coach for small Indian preschools. Write the fee conversation for an owner who hates talking about money.

My numbers: admission [AMOUNT], monthly [AMOUNT], annual [AMOUNT] for [WHAT IT COVERS]
What I will not do: [FOR EXAMPLE, no discount on monthly fee]
What I can offer instead: [FOR EXAMPLE, sibling discount, quarterly payment option, one month free on annual payment]

Write:
1. The opening line that states the fee without apology.
2. The answer to 'can you reduce it?' - three sentences, warm, final, and offering the alternative instead of a cut.
3. The answer to 'the school down the road is cheaper' - without naming or insulting them.
4. The answer to 'we will pay monthly only' - with my policy stated kindly.
5. The line to use when the parent goes quiet.
6. A note to me on the one discount that costs you least and buys most loyalty.

Rules: never invent a discount I have not authorised. Never say 'I will ask management' if you are the management.
Output: the six items.

NOTE Decide your discount policy once, in writing, before the season. Then it is a policy, not a fight.

14 The listening prompt that makes parents talk

Use when: Parents choose preschools on feeling. Feeling comes from being heard in the first ten minutes.

PROMPT

You are an early-years admissions trainer in India. Write a set of listening prompts for a school tour or call, so that a nervous owner stops selling and starts hearing.

Child's age: [AGE]
What most parents in my area worry about: [FOR EXAMPLE, food, screen time, crying, safety, English, school readiness]

Write:
1. Ten open questions that get a parent talking about their child, in the exact words to use.
2. For each, the follow-up that goes one layer deeper.
3. Five things to say instead of 'I understand' - specific acknowledgements.
4. A one-page 'what I heard' summary I can send on WhatsApp within an hour of the call, which proves I listened.
5. The trap to avoid: three questions that sound like an interrogation or a screening test.

Rules: no question that could be read as testing the child. NCPCR guidelines bar screening procedures at admission; this must stay a conversation about the family's needs.
Output: the five items.

NOTE The 'what I heard' summary is the single highest-converting message in this pack.

15 Build your own objection bank

Use when: Every preschool hears the same eight objections. Answering them once, well, beats improvising eight times a week.

PROMPT

You are an admissions adviser for Indian preschools. Build an objection bank I can keep at the desk.

My school facts: [FEES], [RATIO], [TIMINGS], [TRANSPORT], [MEALS], [TEACHER EXPERIENCE], [SPACE]
The objections I actually hear: [LIST THEM AS PARENTS SAY THEM]

For each objection write four lines:
- What the parent is really asking.
- The one-sentence answer that addresses the real question.
- The proof I can show (a fact, a photo, a teacher introduction, a parent reference).
- The question that moves the conversation forward.

Then add: the two objections that are actually a 'no' in disguise, and the graceful close for each.
Rules: no invented proof, no comparisons to named schools, no promises about outcomes for the child.
Output: the bank, then the two closes.

NOTE Update it every month with the exact words a parent used. Real phrasing beats theory.

16 'I will discuss with my husband'

Use when: In many Indian families the mother enquires and the father approves. Both need to hear the same facts.

PROMPT

You are an admissions head at an Indian preschool. A mother has visited, liked the school, and said she will discuss it at home. Write the follow-up.

Family context: [WHAT I KNOW]
Programmes: [LIST]
Fee: [NUMBERS]
Visit already done on: [DATE]

Write:
1. A WhatsApp message (under 100 words) to her, with a short summary she can forward - the fees, the timings, the two things she said mattered to her, and the visit date.
2. A one-page 'for the family' note (under 180 words) that answers the questions a father who was not present usually asks: safety, teacher qualification, what the child learns, what happens in the first month, and the total first-year cost.
3. An invitation for a second short visit at a time that suits both parents, including a Saturday option.
4. A note on what not to do - no pressure on the mother, no assumption about who decides.

Rules: respectful of every family structure. No gendered assumptions about who pays.
Output: the four items.

NOTE Send the forwardable summary the same evening. It is what gets read at dinner.

17 The working parent and the daycare question

Use when: The family that needs 8 am to 7 pm care is a different sale from the family that needs three hours.

PROMPT

You are an adviser to Indian preschool-cum-daycare centres. A working couple is enquiring about full-day care for a child of [AGE].

What we offer: preschool [TIMINGS], daycare [TIMINGS], meals [YES/NO], nap room [YES/NO], pick-up flexibility [POLICY], staff ratio in daycare [RATIO], holiday cover [POLICY]

Write:
1. A WhatsApp reply (under 120 words) that answers the real question - what happens to my child between 3 pm and 7 pm.
2. A one-day timeline of the child's day from drop-off to pick-up, in half-hour blocks, that I can send as an image or message.
3. The five questions this couple will ask, with the honest answer for each, including the ones where our answer is 'no'.
4. The fee presentation for daycare: how to show monthly, quarterly and annual without hiding the annual charge.
5. The one policy that prevents most daycare disputes, and how to explain it in two sentences.

Rules: no invented facilities. If we do not have a nap room, say so.
Output: the five items.

NOTE Working parents decide fast and churn fast. Your pick-up and holiday policy sells the seat.

18 The transport and distance objection

Use when: 'It is too far' usually means 'I cannot do this twice a day for two years'.

PROMPT

You are an admissions adviser for an Indian preschool. A parent likes the school but says the distance is a problem.

Distance and route: [KM, AREA]
Transport: [AVAILABLE IN WHICH AREAS, MONTHLY COST]
Drop and pick-up timings: [TIMINGS]
What a parent's day actually looks like with us: [DESCRIBE]

Write:
1. A reply (under 100 words) that solves the real problem - the parent's day - rather than arguing about kilometres.
2. Three concrete options: our transport, a carpool arrangement with existing parents, or a different timing slot. Write the message for each.
3. The honest answer for the parent who lives outside our transport area, including the sibling or next-year option.
4. A short note on how to describe travel time to a parent without overpromising, especially in monsoon.

Rules: never promise a route we do not run. Never estimate traffic times you have not verified.
Output: the four items.

NOTE A 15-minute commute in the rain is an hour. Parents remember the promise, not the weather.

19 The safety conversation

Use when: This is the conversation that decides admissions in 2026. Parents have read the news; they will test you.

PROMPT

You are an early-childhood safety adviser in India. Write the safety conversation for a preschool owner, based on what parents actually ask.

Our safety facts, to be stated exactly: CCTV [WHERE, RETENTION], gate and pick-up [PROCEDURE], staff verification [WHAT WE DO], first aid [WHO IS TRAINED], fire safety [EQUIPMENT, DRILLS], washrooms [ARRANGEMENT], sick-child policy [POLICY], visitor policy [POLICY]
Gaps we honestly have: [LIST]

Write:
1. The 90-second spoken answer to 'how do you keep children safe?' - facts first, no adjectives.
2. The answer to 'can I see the CCTV?' - what we show, what we do not, and why, in a way that builds rather than destroys trust.
3. The answer to 'what happens if a child is hurt?'
4. The answer to 'how do you check your staff?'
5. A one-page 'our safety promise' for the brochure, written so that every line is something we can actually be held to.
6. A note to me: three safety claims schools commonly make that they cannot back up, so I remove them.

Rules: never invent a certification, a police verification process or a CCTV retention period.
Output: the six items.

NOTE Only promise what you can show on a walk-through. Parents ask to see it.

20 The 24-hour recap

Use when: Sent the day after a call, this message does the work of three follow-ups.

PROMPT

You are an admissions head at an Indian preschool. Write a recap message to send within 24 hours of an enquiry call.

Parent: [NAME], child [AGE]
What the parent said they need: [PASTE THEIR WORDS]
What I promised: [LIST]
Next step agreed: [VISIT DATE / CALL BACK / DOCUMENTS]
Programme discussed: [PROGRAMME]
Fee discussed: [NUMBERS]

Write:
1. A WhatsApp recap under 130 words, in this order: their words back to them, what we offer that matches, the exact next step with date and time, and one question.
2. A shorter version for a parent who has gone quiet.
3. The same recap as a two-line SMS for parents who do not use WhatsApp.
4. A note on the one thing never to put in a recap (a promise you have not checked, or a fee you have not confirmed).

Rules: quote the parent accurately. No paraphrasing that flatters us.
Output: the four items.

NOTE This message is also your record. If there is ever a dispute, it is what you will read.

PART 3

The School Visit

PROMPTS 21-30

In Indian preschool admissions the visit is the sale. Everything before it is marketing and everything after it is follow-up. Consultants who audit preschool funnels report that most schools never design the visit at all: a parent walks in, sees a classroom, takes a brochure and leaves. This part designs it.

21 The 30-minute visit flow

Use when: One page, minute by minute, so that every visit feels the same whether the owner is present or not.

PROMPT

You are a preschool admissions consultant in India. Design a 30-minute campus visit flow for a school with small children.

School: [NAME], [LOCALITY]
Staff available for visits: [WHO]
Rooms and spaces: [LIST]
Ratio and class size: [NUMBERS]
Programmes: [LIST]

Write the flow in minutes, with the exact words for each step:
0-3: welcome at the gate, what the parent sees first
3-8: the child is settled with a simple activity while the parent watches
8-18: the classroom walk-through, with three specific things to point out and why each matters to a 3-year-old
18-24: meet the teacher who would actually teach the child, and what the teacher says
24-28: the practical questions - fees, timings, transport, first month
28-30: the close - what to ask, what to hand over, what to write down

Then add: the five things that must never happen on a visit, and the one thing to do if a child cries.
Rules: no scripted sales pitch, no 'world-class' language. Facts a parent can see.
Output: the flow, then the two lists.

NOTE The child must touch something within the first five minutes. That is what the parent remembers.

22 The teacher introduction

Use when: The moment a parent meets the person who will teach their child, the fee stops being a number.

PROMPT

You are an early-years trainer in India. Write a teacher-introduction script for a school visit, for a teacher who is shy about speaking to parents.

Teacher: [NAME], [QUALIFICATION], [YEARS OF EXPERIENCE]
Class: [PROGRAMME, AGE GROUP]
Class size and ratio: [NUMBERS]
One thing this teacher does well: [FOR EXAMPLE, storytelling, toilet training support, settling crying children]

Write:
1. A 60-second introduction in the teacher's own voice, simple English, no jargon.
2. Three things the teacher should show the parent in the classroom, and the one sentence to say about each.
3. The teacher's answer to 'will my child cry?' and to 'how will you handle a child who does not eat?'
4. A note to me on what a teacher must never say to a parent during a visit.
5. The 30-second version for a teacher who freezes.

Rules: no exaggerated claims about outcomes. Warm, specific, honest.
Output: the five items.

NOTE Rehearse this once with each teacher before the season. Nerves read as indifference.

23 The activity station plan

Use when: A child busy with the right activity sells the school better than any brochure.

PROMPT

You are an early-years curriculum adviser in India. Design three simple activity stations for visit days.

Children's ages: [RANGE]
Space available: [AREA]
Materials we already have: [LIST]
Staff available: [NUMBER]
Time a child spends: [MINUTES]

For each station give: the activity, the materials, the setup time, the learning it shows a parent, the exact words a teacher uses to invite the child, and the safety check before it opens.

Then add:
1. The one station to keep for the child who will not leave the parent's lap.
2. A hygiene and clean-up routine between visits.
3. A photo-and-consent rule: what may be photographed during a visit and what may not.
4. A materials list under [BUDGET] rupees.

Rules: no activity needing water, small parts under 3 years, or adult scissors. No screen-based activity.
Output: the three stations plus the four items.

NOTE Rotate stations weekly. Parents who visit twice should not see the same table.

24 The walkthrough narration

Use when: Most owners say 'this is our classroom'. The ones who fill seats say what the parent is looking at and why it matters.

PROMPT

You are a preschool admissions consultant. Write the narration for a classroom walkthrough, for an owner who does not know what to say.

What the parent will see: [DESCRIBE THE ROOM - displays, corners, mats, washroom, play area]
What is deliberately missing: [FOR EXAMPLE, no screens, no desks in rows, no plastic toys]
Ratio and class size: [NUMBERS]
Daily routine: [BRIEF]

Write:
1. Narration for each of six stops, in 2-3 sentences each, that turns a visible detail into a reason. Example shape: 'You see these low shelves - that is so a three-year-old can choose and put back without asking an adult. It is how we build independence in the first month.'
2. The one line to say at the washroom door, because that is where Indian parents look hardest.
3. The honest answer when a parent notices something we lack.
4. A note on the three phrases that sound like every other school, so I stop using them.

Rules: describe only what is actually in my school.
Output: the four items.

NOTE Walk your own school with a parent's eyes once a month. You will find three things to fix.

25 The questions you want parents to ask

Use when: Handing parents a good question list positions you as the honest option and quietly exposes weak competitors.

PROMPT

You are an admissions adviser for Indian preschools. Write a one-page sheet titled 'Ten questions worth asking any preschool' that I can hand to visiting parents.

What we do well and can evidence: [LIST WITH PROOF]
What we do not do: [LIST]

Write ten questions, each followed by a half-line on why it matters. They must be questions a serious parent would ask anyway, and ones where a clear answer tells a family a lot: who will teach my child by name, how many children per adult, what happens when a child is sick, how staff are verified, what the first month looks like, how often parents hear from the school, what the fees are in total for the first year, what the school does when a child is hurt, how screen time is handled, what happens if we want to leave.

Then add: a short note at the bottom - 'These are the questions we are happy to answer. Ask them of every school you visit.'
Rules: no question that is a disguised attack on a named competitor. No claim that we answer all ten perfectly.
Output: the sheet.

NOTE Print on one page, hand it over at the end of the visit with the fee sheet.

26 The visit register

Use when: If you cannot remember who visited last Tuesday, you cannot follow up. And the follow-up is where admissions are won.

PROMPT

You are an admissions systems adviser for Indian preschools. Design a visit register for a school that currently keeps notes in a notebook.

Visits per week in season: [NUMBER]
Who handles follow-up: [PERSON]
Channels used: [WHATSAPP / CALL]
Seats by programme: [NUMBERS]

Give me:
1. The exact columns for a paper register and for a Google Sheet, in the order I should fill them.
2. The five fields that must be filled before the parent leaves the gate.
3. A simple status system (for example: visited, second visit, documents given, seat held, joined, lost with reason) that a non-technical person can maintain.
4. The daily 10-minute routine: who checks what, and when.
5. The weekly report: four numbers only, and what each one tells me.
6. A warning list: the three data-privacy mistakes small schools make with parent details in India.

Rules: keep it usable on paper. No software I have to buy.
Output: the six items.

NOTE Fill it before the parent reaches the gate. After that, memory invents details.

27 The visit with grandparents

Use when: In many Indian families the grandparents vet the school, and their questions are not the parents' questions.

PROMPT

You are an admissions adviser for Indian preschools. Write a version of the visit for a family where grandparents are present and influential.

Family: [WHO IS COMING]
Our facts: [TIMINGS, FOOD POLICY, TRANSPORT, HOLIDAYS, DISTANCE FROM HOME]
Safety facts: [CCTV, GATE, STAFF VERIFICATION]

Write:
1. The five questions grandparents usually ask, and the answer to each in one or two sentences - covering food, cleanliness, the child catching colds, whether the child will be forced to write too early, and who will look after the child personally.
2. A short reassurance line about school readiness that does not promise academic acceleration.
3. How to include the grandparent in the walkthrough so they feel respected rather than managed.
4. A message to send the parents afterwards that repeats the answers, so the family conversation at home has the facts.
5. A note on the one thing to avoid saying to a grandparent who is sceptical about 'play-only' preschools.

Rules: respectful, no ageist language, no promises about the child's future marks.
Output: the five items.

NOTE Give the grandparent one job on the visit, such as meeting the cook or seeing the washroom.

28 The Saturday open day

Use when: One well-run open day can produce more visits than a month of ads.

PROMPT

You are a preschool marketing consultant in India. Plan a 2-hour Saturday open day for admission season.

School: [NAME], [LOCALITY]
Expected families: [NUMBER]
Staff available: [NUMBER]
Budget: [AMOUNT]
Spaces: [LIST]

Write:
1. A minute-by-minute run sheet for the two hours, including arrival, welcome, activity, tour in small groups, Q&A, and the close.
2. The four stations and who runs each.
3. The registration form fields (minimum needed, no intrusive questions).
4. The follow-up sequence for attendees - three messages over 7 days, with the exact words.
5. A pre-event checklist (7 days out, 2 days out, morning of) and a post-event checklist.
6. The three things that make an open day feel unprofessional, so we avoid them.

Rules: no bouncy-castle-and-balloons-as-strategy. Every element must help a parent decide.
Output: the six items.

NOTE Cap attendance. Twenty families you can talk to beats sixty you cannot.

29 The trial morning

Use when: Letting a child spend one morning in the class removes the biggest fear: 'will my child be okay without me?'

PROMPT

You are an early-years adviser in India. Design a trial-morning offer for prospective families.

Child's age: [AGE]
Class timing: [TIMINGS]
Class size: [NUMBER]
Staff: [WHO]
What we can safely allow: [WHAT PARENTS MAY DO - wait outside, sit in the corridor, leave]

Write:
1. The invitation message to the parent, under 90 words, that explains exactly what will happen and what the parent should do.
2. A 15-minute settling routine for the teacher on trial day.
3. The observation note the teacher fills for the parent afterwards - four lines, no evaluation of the child's ability, only what was seen.
4. The parent feedback form: three questions.
5. The conversion message to send the same evening.
6. A note on the consent and safety requirements for a child who is not yet enrolled.

Rules: no assessment of the child, no screening. NCPCR guidelines prohibit screening procedures at admission; the trial must be a settling visit, not a test.
Output: the six items.

NOTE Never let the trial become a test. If a child 'fails' a trial, you have a complaint, not an admission.

30 The same-evening follow-up

Use when: The parent visits three schools in a fortnight. The one who writes first is the one they remember.

PROMPT

You are an admissions head at an Indian preschool. Write the message to send the evening after a school visit.

Parent: [NAME], child [AGE]
What they saw and liked: [PASTE OR DESCRIBE]
What they were unsure about: [DESCRIBE]
Seats left in that programme: [NUMBER OR 'not tracking']
Fee discussed: [NUMBERS]
Next step: [WHAT WE AGREED]

Write:
1. The evening message, under 120 words: reference one specific thing they said, answer the doubt they raised, restate the next step with date, and ask one question.
2. A version for a parent who was quiet throughout.
3. A version for a parent who visited with a competitor the same week.
4. The second follow-up (day 3) and third (day 7), each shorter than the last, each giving something rather than chasing.
5. The line to use when the parent says 'we have decided elsewhere', so the door stays open.

Rules: no guilt, no 'just following up', no invented scarcity.
Output: the five items.

NOTE Write it before you sleep. Next morning the details are already blurred.

PART 4

Fees, Packages & the Money Conversation

PROMPTS 31-40

Fee disputes are the number one reason Indian parents leave a preschool mid-year, and hidden charges are the number one reason they never join. This part builds a fee structure you can defend line by line, and the words for the four money conversations every owner dreads.

31 The transparent fee sheet

Use when: One page that shows every rupee of the first year. It closes more admissions than a discount does.

PROMPT

You are a school finance adviser in India. Build a one-page fee sheet for a preschool.

Programmes and monthly fees: [LIST]
Admission or registration fee: [AMOUNT]
Annual charges and what they cover: [AMOUNT, LIST]
Transport: [AMOUNT BY AREA]
Optional extras: [MEALS, KIT, UNIFORM, ACTIVITY, EVENTS]
Payment options: [MONTHLY / QUARTERLY / ANNUAL]
Late fee policy: [POLICY]

Write the sheet with: a table of first-year total cost per programme, a plain-English explanation of what each charge buys, the payment options with their due dates, what is not included, and the refund position in one line.

Then add:
1. A short note on how to present the annual charge so it does not feel like a surprise.
2. The one-sentence answer to 'why is the admission fee non-refundable?'
3. A note to me on two common fee-sheet mistakes in Indian preschools.

Rules: no hidden line items, no 'miscellaneous'. Every charge must have a name and a reason.
Output: the sheet plus the three notes.

NOTE Hand this out at the visit, not after the parent asks. It answers the hardest question before it is asked.

32 The three-package structure

Use when: Parents do not compare one fee with one fee. They compare what they get. Give them a structure.

PROMPT

You are a pricing adviser for Indian preschools and daycares. Build three packages for my centre.

Base facts: monthly cost per child [AMOUNT], staff cost [AMOUNT], space [DESCRIBE], capacity per programme [NUMBER]
Current offering: [WHAT YOU SELL TODAY]
What we can add without new staff: [LIST]
What costs us extra: [LIST]

Design three packages that are genuinely different, not the same thing at three prices. For each give: name, who it suits, what is included, what is not, the monthly price logic, and the one sentence that sells it.

Then add:
1. The 'middle package' rule - why most parents choose the middle one and how to make it the one you want to sell.
2. The comparison table, in the order a parent reads it.
3. The upgrade message to send to a parent already enrolled.
4. A warning: the package that looks profitable on paper but loses money because of staff hours.

Rules: do not invent a price; give me the formula and let me set the number.
Output: the packages plus the four items.

NOTE Three options, clearly different. Two options invite a comparison you cannot control.

33 The seat-hold and registration policy

Use when: Without a written policy, a held seat becomes an argument in April.

PROMPT

You are a school administrator in India. Write a seat-hold and registration policy for a preschool, in plain English a parent can read in two minutes.

Registration fee: [AMOUNT]
Token amount to hold a seat: [AMOUNT]
When the balance is due: [DATE OR RULE]
Seats per programme: [NUMBER]
What happens if a parent withdraws before session start: [WHAT I WANT]
What happens if they withdraw after: [WHAT I WANT]

Write the policy covering: what registering means, what the token does and does not guarantee, the deadline and what happens after it, the withdrawal position before and after session start, what happens if we cannot offer a seat, and how to contact us.

Then add:
1. The one-line summary for WhatsApp.
2. The message to send on the deadline day to parents who have not paid.
3. A note on the two clauses that cause the most disputes in Indian preschools, so I keep them clear.

Rules: no clause that a parent could not understand. No 'management reserves the right' without saying what the right is.
Output: the policy plus the three items.

NOTE Read your own policy aloud. If it sounds like a bank, rewrite it.

34 The sibling policy

Use when: Siblings are the cheapest admissions in the business, and most schools discount them badly.

PROMPT

You are a pricing adviser for Indian preschools. Design a sibling policy that builds loyalty without giving away margin.

Current fee: [AMOUNT PER MONTH]
Admission fee: [AMOUNT]
What we have offered informally so far: [DESCRIBE]
Typical family size in our area: [OBSERVATION]

Write:
1. Three sibling-policy options: a percentage off the second child's monthly fee, a waiver of the second admission fee, or a fixed family discount. For each, the cost to me over two years and the loyalty it buys.
2. The recommended option and why.
3. The exact wording for the fee sheet.
4. The WhatsApp message announcing it to existing parents.
5. The rule that prevents the discount being claimed by cousins, neighbours and 'like family' cases.

Rules: keep the maths simple enough to explain in one sentence. No condition a parent cannot verify.
Output: the five items.

NOTE Put the policy in writing before the second child arrives. Not after.

35 Monthly, quarterly or annual

Use when: The collection model you choose decides your cash flow and your admin load for the year.

PROMPT

You are a small-school finance adviser in India. Help me choose a fee collection model.

Monthly fee: [AMOUNT]
Number of children: [NUMBER]
Who collects fees today: [PERSON]
How parents pay: [CASH / UPI / BANK]
Bad debts last year: [ROUGH NUMBER]
Admin time spent chasing: [HOURS PER MONTH]

Write:
1. A comparison of monthly, quarterly and annual collection on cash flow, admin hours, default risk and parent resistance.
2. A recommended model with a discount for advance payment that is small enough to be affordable and large enough to change behaviour.
3. The UPI and receipt process in five steps, including what the parent receives and when.
4. The reminder calendar for the year.
5. A note on record-keeping: what a preschool must keep for each fee payment, and why.

Rules: no assumption about tax treatment. Tell me to confirm GST and accounting questions with my accountant.
Output: the five items.

NOTE A 2% discount for annual payment often costs less than the time you spend chasing monthly fees.

36 The fee increase letter

Use when: You will raise fees every year. How you announce it decides how many parents stay.

PROMPT

You are a school communications adviser in India. Write a fee revision letter for a preschool.

Current monthly fee: [AMOUNT]
New monthly fee: [AMOUNT]
Effective from: [DATE]
Notice period: [DAYS]
Reasons that are true: [FOR EXAMPLE, staff salaries, rent revision, new materials, training]
What parents get in return: [LIST]
What stays the same: [LIST]

Write:
1. A one-page letter in plain, warm English: thanks, the reason, the number, the date, what it pays for, what does not change, and how to ask questions.
2. A WhatsApp version under 110 words.
3. The answer to 'why so much?'
4. The answer to 'we will leave if you increase'.
5. A short note on timing - the month that causes least friction in an Indian preschool calendar, and why.

Rules: never blame 'inflation' without naming a real cost. Never announce an increase with less than one month's notice.
Output: the five items.

NOTE Announce in February for an April change, never in April for April.

37 The late fee reminder ladder

Use when: Three messages, escalating gently, that collect money without costing you the family.

PROMPT

You are an administrator in an Indian preschool. Write a three-step reminder ladder for late fees.

Fee due date: [DAY OF MONTH]
Grace period: [DAYS]
Late fee: [AMOUNT OR NONE]
Who sends the messages: [PERSON]
Payment methods: [UPI ID / BANK / CASH AT OFFICE]

Write:
1. Message 1, day 3 after due date: friendly, assumes an oversight, gives the UPI ID and asks if there is a problem.
2. Message 2, day 7: firmer, states the amount, the grace period end, and offers a call.
3. Message 3, day 15: states the consequence exactly as my policy says, keeps the door open, and names a person to talk to.
4. A call script for the parent who says they are short this month.
5. A note on the one thing never to do in front of a child or on a class WhatsApp group.

Rules: no public shaming, no mention of fees on group chats, no threats beyond my written policy.
Output: the five items.

NOTE Send reminders individually, never in a group. One public message costs you two families.

38 The concession request

Use when: Some parents genuinely cannot pay, and some are testing you. You need one policy for both.

PROMPT

You are a school administrator in India. Write a concession and scholarship policy for a small preschool.

Fee: [AMOUNT]
Number of concession seats we can afford this year: [NUMBER]
What we can offer: [PERCENTAGE OR FREE SEAT]
Who decides: [PERSON OR COMMITTEE]

Write:
1. The policy in five lines: who can apply, what documents, who decides, how long it lasts, when it is reviewed.
2. The message to a parent who asks for a concession - one that neither promises nor refuses.
3. The three questions that establish genuine need without being intrusive.
4. The message granting a concession, with the conditions attached.
5. The message declining, kindly, with an alternative (instalments, a different programme, next year).
6. A note on discretion: how to keep a concession private in a small school where everyone talks.

Rules: no request for income proof beyond what is necessary. No discrimination on any ground.
Output: the six items.

NOTE Decide the number of concession seats before the season, not one request at a time.

39 The refund and withdrawal policy

Use when: Parents leave. The way you handle it decides whether they speak well of you to the next ten families.

PROMPT

You are a school administrator in India. Write a withdrawal and refund policy for a preschool, in language a parent can read in one minute.

Registration fee: [AMOUNT, refundable or not]
Monthly fee: [AMOUNT]
Notice required: [DAYS]
Refund position before session: [WHAT I WANT]
Refund position after session starts: [WHAT I WANT]
Transport and annual charges: [POSITION]

Write:
1. The policy: six short clauses, plain English, no legal padding.
2. The one-line summary for WhatsApp.
3. The withdrawal form fields (minimum, respectful).
4. The exit conversation script: three questions that tell you why they are really leaving.
5. The message to send after a family leaves, which keeps the door open for the sibling or a return.

Rules: honest about what is not refundable. No clause that contradicts what my staff say verbally.
Output: the five items.

NOTE The exit conversation is free market research. Ask the third question and stay quiet.

40 The unit economics of one child

Use when: You cannot price a seat you have not costed. This is the sheet that tells you what a seat is worth.

PROMPT

You are a small-business finance adviser in India. Build a one-child unit economics sheet for a preschool.

Monthly fee per child: [AMOUNT]
Rent per month: [AMOUNT]
Staff salaries per month: [LIST OR TOTAL]
Utilities, internet, water: [AMOUNT]
Materials and consumables per child: [AMOUNT]
Transport cost per child: [AMOUNT]
Other monthly costs: [LIST]
Current children: [NUMBER]
Capacity: [NUMBER]

Write:
1. A cost-per-child calculation, with fixed and variable costs separated.
2. The break-even number of children.
3. The margin at current strength, and the margin at 80% capacity.
4. The three costs that grow faster than fees in Indian preschools, and the two levers that fix them.
5. A simple monthly one-page P&L a non-accountant can maintain.
6. A note on what to do with this sheet before setting next year's fee.

Rules: show the arithmetic line by line so I can check it. Tell me to confirm tax and payroll compliance with my accountant.
Output: the six items.

NOTE Do this before you set the fee, not after the year ends. It usually changes the number.

PART 5

The Brochure, the One-Pager & the Admission Kit

PROMPTS 41-50

Most Indian preschool brochures are interchangeable: a smiling child, a globe, the word 'holistic'. The documents in this part are the ones parents actually keep on the fridge - the fee sheet, the one-pager, the first-week plan, the consent forms. Build them once and reuse them every season.

41 The one-page parent summary

Use when: The single document a parent takes home and shows the family. It should fit on one side of A4.

PROMPT

You are a school communications adviser in India. Write a one-page parent summary for a preschool.

School: [NAME], [LOCALITY], [CITY]
Programmes and ages: [LIST]
Timings and holidays: [DETAIL]
Ratio and class size: [NUMBERS]
Fees: [ADMISSION, MONTHLY, ANNUAL]
Transport: [AREAS AND COST]
Safety: [FACTS ONLY]
What a typical day looks like: [HALF-HOUR BLOCKS]
Who to call: [NAME, NUMBER]

Write the one-pager in this order, with a heading for each: who we are in two lines, programmes and ages, a typical day, what your child will do in the first month, safety, fees in total for the first year, transport, and how to reach us.

Constraints: under 400 words total, no adjectives that cannot be checked, no 'holistic', 'world-class', 'best' or 'state-of-the-art'. Every claim must be a fact I gave you.
Rules: do not invent a single facility, award or number.
Output: the one-pager, then a note listing anything you had to leave out because I did not give you the fact.

NOTE Design it in Canva on one A4 side. Two sides means it gets thrown away.

42 The four-page brochure

Use when: Page by page, with the copy written, so a designer only has to lay it out.

PROMPT

You are a preschool brand consultant in India. Write the copy for a four-page A4 brochure.

School: [NAME], [LOCALITY], [YEARS RUNNING]
Programmes: [LIST]
What makes us genuinely different, in facts: [LIST]
Teachers: [QUALIFICATIONS, TENURE]
Safety: [FACTS]
Fees: [RANGE]
Contact: [DETAILS]

Page 1: cover - the one line that says what we are, the ages we serve, and the locality. No stock slogans.
Page 2: the day - a half-hour timeline of a child's morning, plus what each part develops.
Page 3: the people and the place - teachers, ratio, safety, spaces. Written as facts.
Page 4: admissions - programmes, fee range, the visit, the documents needed, and the contact.

For each page give: the headline, the body copy (under 120 words), and the one image to use (described, not a stock suggestion).
Then add: five phrases to remove from any preschool brochure, and why.
Rules: no unverifiable claims. No photographs of children without written parental consent.
Output: the four pages plus the two lists.

NOTE Print 200, not 2,000. You will change the fee in a year.

43 The admission form

Use when: Collect what you need, and nothing that will make a parent uneasy.

PROMPT

You are a school administrator in India. Design an admission form for a preschool that collects what is necessary and respects privacy.

Programmes: [LIST]
Documents we require: [LIST]
Medical information we need: [LIST]
Consent we need at admission: [LIST]

Write the form in sections with exact field labels:
1. Child: name, date of birth, gender, programme, previous care or school.
2. Family: parents' names, phone numbers, address, locality, emergency contact (a third person).
3. Health: allergies, medical conditions, medication, doctor's contact, immunisation status as declared by the parent.
4. Pick-up authorisation: named adults, photo ID rule.
5. Consents: photographs, CCTV, outdoor play, medical emergency, field trips.
6. Declarations and signature block.

Then add: a note on the five fields schools commonly ask for that are unnecessary or intrusive, and why to drop them; and a one-line data-handling statement for the bottom of the form.
Rules: no field about caste, religion, parental income or mother's employment. No medical detail beyond what affects daily care.
Output: the form plus the two notes.

NOTE Get the emergency contact of a third person. On the day you need it, the parents will be unreachable.

44 The document checklist

Use when: A missing document at admission is a week of delay. A checklist prevents it.

PROMPT

You are a school administrator in India. Write a document checklist for preschool admission, as a page I can hand over at the visit.

Documents we require: [LIST]
Timeline: session starts [DATE]
Who verifies: [PERSON]
What we do if a document is missing: [POLICY]

Write:
1. The checklist as tick boxes, in the order parents should collect them, with a one-line note on why each is needed.
2. The WhatsApp version (a short numbered list).
3. The reminder message for three days before the deadline.
4. The message for a parent who cannot produce one document in time, offering a conditional admission if my policy allows.
5. A note on which documents a school may not insist on, and how to phrase a request that is optional as optional.

Rules: no demand for documents that are not needed for a small child's admission. No withholding of a seat over a photocopy.
Output: the five items.

NOTE Number the checklist in the order of difficulty, hardest first. Parents collect in that order anyway.

45 The welcome pack for day one

Use when: The first week decides whether the parent trusts you for three years. Send the pack before the first day.

PROMPT

You are an early-years adviser in India. Write the welcome pack a preschool sends to a newly admitted family.

Child: [NAME], programme [PROGRAMME], start date [DATE]
Timings: [DETAIL]
What to send on day one: [LIST]
What not to send: [LIST]
First-week routine: [BRIEF]
Who to contact: [NAME, NUMBER]
Settling policy: [WHAT WE DO WHEN A CHILD CRIES]

Write:
1. A warm one-page welcome letter from the owner, under 200 words, that says what the first week will feel like, honestly, including the crying.
2. The day-one packing list and the leave-at-home list.
3. A first-week timetable for the parent: what happens each day and one thing they can do to help.
4. The three messages to send during week one: day one evening, day three, day five.
5. A short 'what to expect' note about separation, food, sleep and toilet accidents, in plain language that does not alarm.

Rules: honest about difficulty. No promise that the child will not cry.
Output: the five items.

NOTE Send this the week before joining. It removes most of the day-one phone calls.

46 The parent handbook contents

Use when: Twenty pages of policy nobody reads is worse than four pages everybody does.

PROMPT

You are a school administrator in India. Design the contents and copy for a short parent handbook.

Policies we actually have: [TIMINGS, HOLIDAYS, FEES, ABSENCE, ILLNESS, PICK-UP, UNIFORM, FOOD, TRANSPORT, DISCIPLINE, PHONES, COMPLAINTS]
Our position on screens and sweets: [POSITION]
Who parents should contact: [ROLES]

Write:
1. A table of contents with page allocations totalling under eight pages.
2. The copy for the five sections parents actually read: timings and late pick-up, illness and absence, food, pick-up authorisation, and how to raise a concern.
3. A one-page 'ten things to know' summary at the front, because most parents will only read that.
4. A short section on what the school will not do (no physical punishment, no screening tests, no homework for under-sixes) with the reason in one line each.
5. A note on the two policies that cause most friction in Indian preschools, and how to word them kindly.

Rules: plain English. No legal language a parent cannot follow.
Output: the five items.

NOTE Eight pages, not twenty. The handbook is a reference, not a defence.

47 The consent bundle

Use when: Photographs, CCTV, outdoor play, medical treatment, field trips. One page, five clear choices.

PROMPT

You are a school administrator in India. Write a consent page for a preschool.

What we photograph and why: [USE - INTERNAL / SOCIAL MEDIA / BROCHURE]
CCTV: [WHERE, WHO VIEWS, RETENTION]
Outdoor play and excursions: [WHAT AND WHERE]
Medical emergencies: [PROTOCOL]
Data we hold: [LIST]

Write five separate consent statements, each with a tick box, each in one or two sentences a parent can actually understand, covering: photographs for internal use, photographs for public use (website, Instagram, brochure), CCTV recording and who may view it, outdoor play and local outings, and emergency medical treatment.

Then add:
1. The withdrawal-of-consent line, so a parent can change their mind later.
2. The message to send to parents before any public post that includes children.
3. A note on the four consent mistakes schools make that create real legal risk in India, including the rule about identifying a child in a public post.
4. The one-line data statement: what we keep, where, for how long, and who can see it.

Rules: no blanket consent hidden inside the admission form. Each consent must be separable.
Output: the five statements plus the four items.

NOTE A blanket consent is not a consent. Five tick boxes cost you ten seconds and protect everyone.

48 The admissions page on your website

Use when: Parents will read this page before they ever call you. Most preschool websites have no admissions page at all.

PROMPT

You are a web copywriter for Indian small businesses. Write the admissions page for a preschool website.

School: [NAME], [LOCALITY], [CITY]
Programmes: [LIST]
Admission process: [STEPS]
Fees: [RANGE OR 'on request' - my choice]
Documents: [LIST]
Visit booking: [HOW - WhatsApp link, form, phone]
Session start: [DATE]

Write the page in this order: headline naming the locality and the programmes (not 'best preschool in [city]'), a two-line introduction, the programmes with ages and timings, how admission works in four numbered steps, what a visit involves, fees and what they include, the documents needed, a short FAQ of six questions parents ask, and a clear contact block.

Then add:
1. The page title tag and meta description under 155 characters.
2. Five local keyword phrases to use naturally, not stuffed.
3. The one call-to-action button text that works better than 'Submit'.
4. A note on the three things that make a preschool website lose enquiries.

Rules: no fake urgency, no invented testimonials, no stock claims.
Output: the page plus the four items.

NOTE Name your locality in the headline. 'Best preschool in Hyderabad' ranks for nobody.

49 The founder's note

Use when: One honest paragraph from the person who runs the place does more than a page of features.

PROMPT

You are an editor for Indian small-business websites. Help me write a founder's note for my preschool.

My background: [EDUCATION, YEARS, WHY I STARTED]
Years running: [NUMBER]
Number of children today: [NUMBER]
One thing I am proud of: [SPECIFIC]
One thing I am still working on: [HONEST]
What I want parents to feel: [DESCRIBE]

Write:
1. A founder's note of 180-220 words, first person, in simple English, that tells the reason the school exists, one concrete moment that shaped it, what the school does every day, and what a parent can expect from the owner personally.
2. A 60-word version for the brochure.
3. A Hinglish version for Instagram, if my city is in the Hindi belt.
4. A note on the two things that make founder notes read as marketing rather than as a person.

Rules: use only the facts I gave. Do not invent a struggle story, a number or a credential.
Output: the four items.

NOTE Write it once, then leave it alone. Rewriting it every year makes it sound like copy.

50 The twelve-question parent FAQ

Use when: The questions every parent asks, answered once, properly, in a document you can send at any time.

PROMPT

You are a school communications adviser in India. Write a parent FAQ for a preschool.

Facts: programmes [LIST], timings [DETAIL], fees [NUMBERS], transport [AREAS, COST], meals [POLICY], holidays [POLICY], ratio [NUMBERS], teacher qualifications [DETAIL], sick-child policy [POLICY], pick-up policy [POLICY]

Write twelve questions in the words parents actually use - including the awkward ones: what if my child cries for weeks, what if she does not eat, do you teach writing, will my child be ready for Class 1, how do you handle biting or hitting, can I see the CCTV, what if the teacher leaves, what if we move city, are there hidden charges.

For each: the question, a direct answer under 60 words, and the one fact that backs it up.

Then add: the two questions I should not answer on paper and should invite into a conversation instead, and why.
Rules: no promises about outcomes. Where the honest answer is 'no', say no.
Output: the twelve answers plus the note.

NOTE The FAQ does your receptionist's job at 11 pm, correctly.

PART 6

Google Business Profile & Local Search

PROMPTS 51-60

A preschool draws from a two to three kilometre radius. In that radius the parent's first screen is not your website - it is the map pack, three listings with a rating, a phone number and photos. Local SEO consultants who work with Indian preschools report the same thing repeatedly: most local schools have an unclaimed profile, wrong hours and fewer than ten reviews. That is the gap this part closes, at zero cost.

51 The profile completion audit

Use when: Before you write anything, find out what Google already shows about you.

PROMPT

You are a local SEO specialist for Indian small businesses. Audit my Google Business Profile.

School: [NAME AS ON THE SIGNBOARD]
Address: [FULL ADDRESS]
Phone: [NUMBER]
Category I have set: [CATEGORY]
Hours I have set: [HOURS]
Photos uploaded: [NUMBER AND TYPES]
Reviews: [NUMBER AND AVERAGE RATING]
Website linked: [YES/NO]
Questions answered: [NUMBER]
Posts published: [HOW OFTEN]

Give me:
1. A 15-point audit as a checklist, with what a complete profile looks like for a preschool specifically (primary category, secondary categories, services, attributes, hours, photos, Q&A, posts, messaging).
2. The five fields that most affect whether a parent calls, in priority order.
3. The exact category names to choose, in the order Google lists them, for a preschool that also runs daycare.
4. The three profile mistakes that quietly suppress a listing.
5. A one-hour plan to fix the top five gaps today.

Rules: only Google's own current options; if you are unsure of an option name, say so and tell me where to check.
Output: the five items.

NOTE Category is the single highest-leverage field. 'Preschool', not 'School'.

52 The business description

Use when: 750 characters that decide whether a parent taps call or scrolls on.

PROMPT

You are a local SEO copywriter in India. Write my Google Business Profile description.

School: [NAME], [LOCALITY], [CITY]
Years running: [NUMBER]
Programmes and ages: [LIST]
Timings: [DETAIL]
Ratio: [NUMBERS]
Transport: [AREAS]
One distinctive fact: [FACT]

Write:
1. A description of 700-750 characters: what we are, who we serve, the programmes and ages, the locality and landmark, timings, and a clear next step. Written for a parent, not for a search engine.
2. A 300-character version for other directories.
3. The three keyword phrases that belong naturally in the text, and where to place them.
4. A note on what Google's guidelines prohibit in a description (promotional offers, URLs, misleading claims) so I do not get the edit rejected.

Rules: no keyword stuffing, no 'best in city', no unverifiable superlatives.
Output: the four items.

NOTE Write for the parent reading on a phone in a lift. Short sentences win.

53 The services and attributes list

Use when: Google lets you list what you offer. Most preschools leave it empty.

PROMPT

You are a local SEO specialist. Build the services and attributes section of my Google Business Profile.

What we offer: [PROGRAMMES, DAYCARE, TRANSPORT, MEALS, HOLIDAY CARE, SUMMER CAMP]
Facilities: [PLAY AREA, CCTV, AC, PARKING, WASHROOM]
Accessibility: [WHAT APPLIES]
Languages: [LIST]
Owner or staff details: [ANYTHING RELEVANT]

Write:
1. The services list, with the exact service names and a one-line description each, in the order a parent would scan them.
2. The attributes that apply and the ones that do not, with a caution: only claim what is true and visible.
3. The photo categories to fill, with how many photos in each and what each should show.
4. The two attributes schools commonly select that create a complaint later.
5. A one-line check: how to verify every attribute in under ten minutes before publishing.

Rules: no attribute we cannot demonstrate on a walk-through.
Output: the five items.

NOTE Every attribute is a promise a parent will test at the gate.

54 The pre-filled Q&A

Use when: Google's Q&A section is where a stranger can answer for you. Own it.

PROMPT

You are a local SEO specialist in India. Write the Questions and Answers section for my Google Business Profile.

School facts: fees [RANGE], timings [DETAIL], ages [RANGE], transport [AREAS], meals [POLICY], admission process [STEPS]

Write:
1. Eight questions phrased the way Indian parents actually type them - including 'fees kitna hai', 'is admission open', 'do you have transport', 'what is the age for nursery', 'is CCTV there', 'do you give homework'.
2. For each: the answer under 45 words, factual, ending with the next step.
3. A note on how to post these legitimately (a school may ask and answer its own questions) and what Google prohibits.
4. The routine to check the section weekly and answer any new question within 24 hours.
5. A short list of the three questions I should answer with 'please call us' rather than on a public page, and why.

Rules: no invented fee, no promise of a seat, no competitor mentions.
Output: the five items.

NOTE A parent who sees a question answered in a day trusts the school more than any ad.

55 The weekly post calendar

Use when: Google posts keep a listing alive. Fifteen minutes a week, no design skills needed.

PROMPT

You are a local marketing adviser for Indian preschools. Build an eight-week Google post calendar.

School: [NAME], [LOCALITY]
Programmes: [LIST]
Events coming up: [LIST]
Admission status: [OPEN / WAITLIST]
Photos available: [TYPES]

For each of the eight weeks give: the post type (update, event, offer-free announcement, photo), the headline under 60 characters, the body under 100 words, the image to use, and the call-to-action button to select.

Include posts that are genuinely useful to parents, not only admission announcements: what children did this week, a safety reminder, a festival note, a parenting tip, a staff introduction, an open-day invitation, a 'what to look for in a preschool' post, and a season-closing note.

Then add: the two post types that get a listing flagged, and the best day and time to publish for Indian parents.
Rules: no offers that create false urgency. No children's faces without written consent.
Output: the calendar plus the note.

NOTE One photo of a real classroom beats a designed poster every week.

56 The review request

Use when: Reviews are the cheapest admissions asset you have. Ask badly and you get nothing.

PROMPT

You are a reputation adviser for Indian schools. Write a review request that a happy parent will actually complete.

School: [NAME]
Google review link: [LINK]
Moment I am asking: [FOR EXAMPLE, after a good PTM, after an event, on the child's birthday]
Who is asking: [OWNER / TEACHER]

Write:
1. The WhatsApp message, under 70 words: personal, specific to that family, with the direct link, and no pressure.
2. A version for a parent who has been with us over a year.
3. The polite single follow-up, three days later.
4. The in-person ask, in two sentences, for a parent standing at the gate.
5. A weekly routine: how many to ask, when, and who records it.
6. A note on what is not allowed - no incentives for reviews, no asking staff or family to post, no review gating.

Rules: honest requests only. No offer in exchange for a review.
Output: the six items.

NOTE Ask in person, send the link the same afternoon. That pairing works.

57 The review reply bank

Use when: Every review deserves a reply, especially the bad one. Here is the language for all three.

PROMPT

You are a school communications adviser in India. Write review reply templates.

School: [NAME], [LOCALITY]
Owner's name: [NAME]
What we genuinely do well: [LIST]
What we are working on: [LIST]

Write replies for:
1. A five-star review naming a teacher - thank, name the specific thing, no copy-paste feel.
2. A four-star review with a mild criticism - acknowledge, state the fix, invite a conversation.
3. A one-star review that is unfair or factually wrong - calm, factual, no argument, no blaming the parent, no disclosing any child's information.
4. A review that is clearly from someone who was never a parent here - the response and the report process.
5. A review about a fee dispute - what may and may not be said publicly.

For each: under 80 words, signed by a person, no template language.
Then add: the three sentences that escalate a bad review into a public fight, and why to avoid them.
Rules: never discuss a child's behaviour, health or family situation in a public reply.
Output: the five replies plus the note.

NOTE Reply once, calmly, then move the conversation to a phone call. Never argue in public.

58 The locality landing page

Use when: One page per locality and programme beats one page for the whole city.

PROMPT

You are a local SEO copywriter in India. Write a locality landing page for a preschool.

School: [NAME]
Locality: [LOCALITY], landmark [LANDMARK]
Programmes: [LIST WITH AGES]
Distance from landmark: [DISTANCE]
Transport from: [AREAS]
Timings: [DETAIL]
What local parents ask us most: [LIST]

Write:
1. The page: title tag, meta description, H1 naming locality and programmes, a two-line intro, the programmes with ages and timings, the daily routine, how to visit, the fee range, and a contact block. Total 450-550 words.
2. Three internal links to add (admissions page, programme pages, contact).
3. The schema markup type to use for a local preschool and the fields it needs.
4. The two things that make a locality page look like spam to Google.
5. A note on how many such pages to build and when to stop.

Rules: the same page must not be duplicated for five localities with only the name changed.
Output: the five items.

NOTE One locality, one page, real detail. Ten thin pages rank for nothing.

59 The local keyword list

Use when: The phrases real parents in your area type, grouped by intent.

PROMPT

You are a local search specialist for Indian preschools. Build my keyword list.

City: [CITY]
Localities I serve: [LIST]
Programmes: [LIST]
Landmark near us: [LANDMARK]
Competitors nearby: [NUMBER, NO NAMES]

Give me four groups of phrases with a note on where each belongs (GBP description, locality page, Instagram bio, ad headline):
1. Near-me and locality phrases.
2. Programme and age phrases.
3. Trust and safety phrases.
4. Comparison and 'how to choose' phrases.

For each group: 8-12 phrases in the way Indian parents type them, including the Hinglish variants.
Then add: the five phrases not worth chasing and why, and a simple way to check which of these you already rank for without paid tools.
Rules: no keyword tool claims, no invented search volumes.
Output: the four groups plus the notes.

NOTE Do not chase 'preschool franchise'. Chase 'play school in [your locality]'.

60 The twenty-photo shot list

Use when: Parents look at the washroom photo longer than at your logo. Photograph accordingly.

PROMPT

You are a school marketing adviser in India. Write a photo shot list for a preschool's Google profile and website.

Spaces: [ENTRANCE, CLASSROOMS, WASHROOM, PLAY AREA, KITCHEN, CORRIDOR, OFFICE]
Best light: [MORNING / AFTERNOON]
Phone available: [MODEL]
Consent position: [WHAT PARENTS HAVE AGREED TO]

Write:
1. A list of twenty photos, each with: what to shoot, the angle, what to include and exclude, and the one thing a parent learns from it.
2. The five photos to shoot first, in order.
3. Rules for photographing children: consent, faces, and the alternative (hands, backs, work, feet, materials).
4. A note on the three photos that make a school look worse than no photo at all.
5. A monthly refresh routine: which photos to replace and how often.

Rules: no stock images, no photos of children without written consent, no identifiable child in a public post without specific consent.
Output: the five items.

NOTE Shoot in daylight, on a phone, with the room tidy. That is the whole technique.

PART 7

Instagram, WhatsApp & the Content Engine

PROMPTS 61-70

Parents research on Instagram and decide on WhatsApp. A preschool does not need a content team; it needs three content pillars, a repeatable weekly rhythm, and the discipline to post real classroom life instead of borrowed quotes. Everything in this part is designed to be produced in twenty minutes a week by a teacher with a phone.

61 The three content pillars

Use when: Without pillars you post randomly and nothing accumulates.

PROMPT

You are a social media strategist for Indian small businesses. Define three content pillars for a preschool Instagram account.

School: [NAME], [LOCALITY]
Programmes: [LIST]
What parents in my area care about: [LIST]
What I can realistically film: [WHAT HAPPENS DAILY]
Time available per week: [HOURS]

Write:
1. Three pillars, each with: what it is, why a parent follows it, five post ideas, and the format that suits it (reel, carousel, photo, story).
2. The ratio of posts across pillars per month.
3. Ten hooks written as first lines a parent would stop for.
4. The five things not to post, with the reason for each.
5. A one-page weekly production routine for a teacher with a phone and 20 minutes.

Rules: no reposted quotes, no borrowed 'parenting tips' from other pages, nothing that identifies a child without consent.
Output: the five items.

NOTE Pillar one is your classroom. Pillar two is parent help. Pillar three is proof.

62 The thirty-day calendar

Use when: A month of posts planned in one sitting, with captions drafted.

PROMPT

You are a preschool social media manager in India. Build a 30-day Instagram calendar.

School: [NAME], [LOCALITY]
Month: [MONTH, YEAR]
Events and festivals in that month: [LIST - I will verify the dates]
Admission status: [OPEN/CLOSED]
Programmes: [LIST]
Format capacity: [REELS PER WEEK / PHOTOS]

Give a table: day, format, pillar, hook, caption (under 60 words), call to action, and the asset needed (photo, 15-second clip, carousel).

Include: 8 reels, 8 photo posts, 8 carousels, 4 stories-only days, and 2 days off.
Then add: the best three posting times for Indian parents, a caption template that works for classroom photos, and the three things to check before publishing anything with a child in it.
Rules: leave every festival date marked as 'verify' - do not assert a date.
Output: the calendar plus the three notes.

NOTE Batch-shoot one morning, publish for a month. That is the whole system.

63 Five reel scripts

Use when: Fifteen to thirty seconds, shot on a phone, no editing skill needed.

PROMPT

You are a short-form video writer for Indian small businesses. Write five reel scripts for a preschool.

What we can film: [CLASSROOM, PLAY AREA, ACTIVITY, TEACHER, MATERIALS]
Children's consent position: [WHAT IS ALLOWED]
Programme focus: [PROGRAMME]
Local angle: [LOCALITY]

For each reel give: the hook spoken in the first two seconds, the shot list in order (5-6 shots), the on-screen text, the voiceover or caption, the length, and the call to action.

The five reels:
1. A 20-second 'this is what a morning looks like here'.
2. A teacher demonstrating one activity a parent can repeat at home.
3. Three things to look for when you visit any preschool.
4. A before-and-after of a child's first month, described without exposing any child.
5. A 'question we get every day' answered on camera.

Rules: no children's faces without written consent - write the scripts so they work with hands, backs and work. No trending audio claims.
Output: the five scripts.

NOTE Film the room, not the poster. Parents are looking for the room.

64 The caption set for classroom photos

Use when: Twenty captions you can paste under a photo without thinking.

PROMPT

You are a copywriter for Indian preschools. Write twenty captions for classroom photos.

School: [NAME], [LOCALITY]
Tone: warm, plain, not cutesy
Programme: [PROGRAMME]
What the photos show: [LIST OF TYPICAL SCENES]

Write twenty captions of 25-45 words each. Each must: describe what is happening in plain language, name one thing the child is learning, and end with a line that invites a question or a visit.

Group them: five about play and materials, five about routine and independence, five about social moments, five about festivals and celebrations.
Then add: ten hashtags that suit a local Indian preschool, and a note on why hashtag volume matters less than locality.
Rules: no 'little wonders', no 'tiny tots', no exclamation-mark overload. No child's name.
Output: the captions plus the note.

NOTE Describe, do not sell. The photo sells; the caption only explains.

65 The parent testimonial post

Use when: The most persuasive content a school can publish, and the easiest to get wrong.

PROMPT

You are a school communications adviser in India. Build a testimonial process and three post formats.

Testimonials we have: [NUMBER AND FORM - WhatsApp messages, video, verbal]
Consent we have: [WHAT PARENTS AGREED TO]
School: [NAME]

Write:
1. A request message to a parent, under 80 words, asking for a short honest testimonial and explaining exactly where it will appear.
2. Three post formats: a quote card with the parent's words, a 30-second video script for a parent who agrees to be filmed, and a 'what changed for our family' carousel.
3. The consent line to include on every published testimonial.
4. A note on the one thing that makes testimonials worthless - editing them into marketing language - and how to trim without changing meaning.
5. The rule about not inventing, paraphrasing into a claim, or publishing a testimonial from someone who was not a parent here.

Rules: publish only words a parent actually said. No composite testimonials.
Output: the five items.

NOTE A slightly awkward real sentence beats a beautifully written fake one.

66 The WhatsApp broadcast

Use when: One message to your whole list, sent at the right moment, without getting reported as spam.

PROMPT

You are a WhatsApp marketing adviser for Indian small businesses. Write an admission-season broadcast.

Audience: [EXISTING PARENTS / ENQUIRIES / BOTH]
Number of contacts: [NUMBER]
Admission status: [OPEN FOR WHICH PROGRAMMES]
Deadline or event: [DATE]
What we want them to do: [VISIT / SHARE WITH A FRIEND / BOOK A SLOT]

Write:
1. The broadcast, under 90 words: one clear message, one action, one link.
2. A version for existing parents, framed as 'for a friend or neighbour' rather than a sales pitch to them.
3. A version for enquiries who have not visited.
4. The follow-up message for people who read but did not reply.
5. A note on WhatsApp Business rules for bulk messaging in India: consent, opt-out, and why a broadcast list is safer than a group.
6. The three things that make a parent block or report a school's number.

Rules: no false deadlines. Include an opt-out line.
Output: the six items.

NOTE Ask existing parents to forward it. A parent's forward converts better than your broadcast.

67 The festival and event set

Use when: Festivals are the calendar of an Indian preschool. Plan the posts, not just the event.

PROMPT

You are a content planner for Indian preschools. Build a festival and event content set.

Next three festivals or events: [NAMES AND MONTHS - I will verify dates]
What we will do in school: [ACTIVITIES]
Parent involvement: [YES/NO, HOW]
Photo consent: [WHAT IS ALLOWED]

For each event write:
1. A pre-event announcement (under 60 words) telling parents what to send, wear or prepare.
2. A day-of story sequence: four frames with captions.
3. A post-event post (under 80 words) with a thank-you and one learning from the day.
4. A WhatsApp message to parents who could not attend.

Then add: a note on the two ways Indian preschools get festival posts wrong - cultural insensitivity across a mixed parent body, and photographing children in costume without specific consent.
Rules: inclusive language, no assumption that every family celebrates the same festivals.
Output: the set plus the note.

NOTE Check with parents before you photograph a child in festival dress. Consent covers the costume too.

68 The staff introduction series

Use when: Parents choose people, not programmes. Show them the people.

PROMPT

You are a school communications adviser in India. Write a staff introduction series.

Staff: [NAMES, ROLES, QUALIFICATIONS, YEARS, ONE PERSONAL DETAIL EACH - WITH THEIR PERMISSION]
School: [NAME]
Format capacity: [PHOTO / 20-SECOND VIDEO]

Write:
1. A template for a staff post: the photo to take, the caption structure, and a 60-word example using one real staff member I described.
2. The questions to ask each staff member so the captions sound like them, not like HR.
3. A consent note: what a staff member must agree to before their photo and details are published.
4. The series schedule across a month.
5. The one thing that makes staff posts look like a recruitment ad instead of a trust builder.

Rules: only publish details a staff member has approved. No invented hobbies.
Output: the five items.

NOTE A teacher's own sentence about why she teaches is worth more than her qualification.

69 The safety-feature carousel

Use when: Parents are anxious. Show them the systems, calmly, without alarming them.

PROMPT

You are a school communications adviser in India. Write a seven-slide carousel on how we keep children safe.

Our real systems: [GATE AND PICK-UP, CCTV, STAFF VERIFICATION, FIRST AID, WASHROOM ROUTINE, SICK CHILD POLICY, VISITOR POLICY]
Gaps we have: [BE HONEST]

Write:
1. Seven slides: the hook slide, five system slides, and the closing slide. For each: the headline under 8 words, the body under 30 words, and the visual to use.
2. The caption under 90 words.
3. A note on which claims need proof and what proof looks like (a register, a certificate, a drill photo).
4. The three safety claims that get schools into trouble because they cannot be demonstrated.
5. A version for a WhatsApp status, three frames.

Rules: no claim we cannot show on a walk-through. No fear-based messaging about other schools.
Output: the five items.

NOTE If you cannot show the register, do not put the claim on a slide.

70 The ninety-day pre-season plan

Use when: Admission season is won in the ninety days before it starts.

PROMPT

You are a preschool marketing consultant in India. Build a 90-day plan ending on [DATE - the month admission enquiries usually begin in my area].

School: [NAME], [LOCALITY]
Budget: [AMOUNT]
Time available per week: [HOURS]
Current assets: [GBP STATUS, INSTAGRAM FOLLOWERS, REVIEWS, WEBSITE]
Programmes to fill: [LIST WITH SEATS]

Build a week-by-week plan across 13 weeks with three tracks:
- Findability: profile, reviews, locality page, listings.
- Proof: photos, film, staff series, testimonials.
- Readiness: fee sheet, one-pager, visit flow, follow-up system, enquiry register.

For each week: the one task that matters, the person who does it, and the output that proves it is done.
Then add: the three tasks that must be finished before any paid ad runs, and a one-line success measure for day 90.
Rules: no ad spend until the profile, the page and the follow-up system exist.
Output: the plan plus the notes.

NOTE If the follow-up system is not ready, ads just create enquiries you will lose.

PART 8

Parent Communication All Year

PROMPTS 71-80

Admissions are won in the visit and lost in the ordinary week that follows. Parents do not leave because the fee is high; they leave because they heard nothing for six weeks and then got a message only about money. This part is the year-round communication system: the Friday update, the hard conversations, and the messages that are hardest to write at 9 pm after a long day.

71 The Friday update

Use when: One photo, three sentences, every Friday. The single highest-return habit in this pack.

PROMPT

You are an early-years communications adviser in India. Build a weekly parent update template.

Class: [PROGRAMME, AGE]
Week: [DATES]
What happened: [BRIEF NOTES - activities, songs, discoveries]
One photo available: [DESCRIBE]
Anything coming up: [EVENT OR REMINDER]

Write:
1. The template: a greeting line, three sentences on what the children did and what it showed, one line of what is coming, and a sign-off from the teacher by name.
2. Three filled examples for three different weeks, using my notes.
3. A version for a week where nothing special happened - because most weeks are ordinary.
4. The rule about photographs: what may be sent in a class group and what needs separate consent.
5. A note on length: why under 120 words gets read and anything longer does not.

Rules: no exaggeration of what children learned. No child's name or behaviour in a group message.
Output: the five items.

NOTE Send it at the same time every Friday. Predictability is what parents are buying.

72 The first-week settling messages

Use when: The week a parent is most anxious and most likely to call three times a day.

PROMPT

You are an early-years adviser in India. Write the settling-week message sequence for a newly joined child.

Child: [NAME], age [AGE], joined [DATE]
Teacher: [NAME]
What usually happens in week one: [BRIEF]
Who answers parent calls: [PERSON, TIMINGS]

Write five short messages:
1. Day one, 11 am: the first update, under 60 words, honest, with one specific detail.
2. Day one, evening: what to expect tonight - tiredness, hunger, tears - and what to do.
3. Day three: progress, described plainly, without overclaiming.
4. Day five: the first week summary and what changes next week.
5. Day ten: the settling check-in, with two questions for the parent.

Each must be sendable by a teacher in under two minutes. Add: the one sentence that reassures a parent without dismissing their worry, and the three things never to say in week one.
Rules: no promises about how the child will feel. No comparison with other children.
Output: the five messages plus the notes.

NOTE The 11 am message on day one prevents four phone calls.

73 When one child hurts another

Use when: Biting, hitting and pushing happen in every preschool. What you say next decides whether two families stay.

PROMPT

You are a school communications adviser in India. Write the protocol and the messages for an incident where one child hurt another.

Ages involved: [AGES]
What happened: [BRIEF, NO NAMES]
Injuries: [NONE / MINOR - DESCRIBE]
Who witnessed: [STAFF]
Our policy: [WHAT WE DO]

Write:
1. The call script to the injured child's parent - what to say in the first 30 seconds, in what order, and what not to say.
2. The message to the other child's parent - factual, non-blaming, and clear about what the school is doing.
3. The incident note the teacher fills: fields only, no interpretation.
4. The follow-up message 48 hours later to both families.
5. The classroom measures to put in place, in three lines a parent can understand.
6. A note on what must never be shared: the other child's name, the family's details, or any speculation about the child's home.

Rules: never identify the other child. Never minimise an injury. Never promise it will not happen again.
Output: the six items.

NOTE Call before the parent sees the mark. The order of information decides the trust.

74 The illness and health notice

Use when: One hand-foot-mouth case handled badly can empty a class for a week.

PROMPT

You are a school health-communications adviser in India. Write the health notice set for a preschool.

Condition: [FOR EXAMPLE, hand-foot-mouth, conjunctivitis, chickenpox, seasonal flu]
Confirmed cases: [NUMBER, NO NAMES]
Our action: [DEEP CLEAN, CLASS CLOSURE, NOTHING]
Medical advice we are relaying: [WHAT - AND FROM WHOM]
Who to contact: [PERSON]

Write:
1. The notice to the affected class, under 130 words: what it is in plain language, what we have done, what parents should watch for, when to keep the child home, and who to ask.
2. A shorter version for the whole school.
3. The message to the family of the affected child - supportive, not blaming.
4. The return-to-school criteria in one line each.
5. A note on the medical boundary: what a school may say and must not say, and why every health claim should be attributed to a doctor or the health department.

Rules: no diagnosis, no treatment advice, no naming any child or family.
Output: the five items.

NOTE Attribute health guidance to a doctor. A school that diagnoses creates liability.

75 The accident and incident report

Use when: A form filled properly in ten minutes protects the child, the teacher and the school.

PROMPT

You are a school safety administrator in India. Design an incident report form and the parent message.

Typical incidents: [FALLS, SCRAPES, BITES, ALLERGIC REACTION, LOST CHILD AT PICK-UP]
Staff who fill it: [ROLE]
First aid available: [KIT, TRAINED PERSON]
Escalation: [WHO IS CALLED]

Write:
1. The form: date, time, place, what happened (facts only), who was present, injury observed, first aid given, who was informed and when, parent's response, action taken to prevent recurrence, signature of staff and of the person who reviewed it.
2. The parent call script, in the order: what happened, what we did, how the child is now, what happens next.
3. The WhatsApp summary to send after the call.
4. The review routine: who reads every form, how often, and what they look for.
5. A note on the three things that turn a minor incident into a dispute.

Rules: record facts, not opinions. No speculation about cause.
Output: the five items.

NOTE Write 'child fell near the slide at 10:40', not 'child was careless'.

76 The parent-teacher meeting

Use when: A PTM that is a queue outside a desk wastes everyone's morning.

PROMPT

You are an early-years trainer in India. Design a parent-teacher meeting for a preschool.

Children: [NUMBER]
Teachers: [NUMBER]
Time available: [MINUTES PER FAMILY]
Term: [TERM]
What we want parents to leave with: [OUTCOME]

Write:
1. The invitation message, under 90 words, with the date, slot system, and what to bring.
2. The 12-minute meeting structure: 2 minutes of what the child enjoys, 5 minutes of observation with examples, 2 minutes of what we are working on, 2 minutes of what the parent can do at home, 1 minute of questions.
3. The observation note template the teacher fills before the meeting - four lines, evidence-based, no labels.
4. The parent feedback slip.
5. The follow-up message for parents who did not attend, with a phone slot.
6. A note on what a teacher must not say: no diagnosis, no comparison with siblings or other children, no predictions about Class 1.

Rules: no marks, no ranking, no developmental diagnosis. Refer concerns to a professional.
Output: the six items.

NOTE Two examples per child, from this term. That is what makes a PTM feel real.

77 The progress note without marks

Use when: Under-sixes should not be graded. Parents still want to know how their child is doing.

PROMPT

You are an early-years assessment adviser in India. Write a progress note format for children under six.

Age group: [AGE]
Areas we observe: [LANGUAGE, SOCIAL, MOTOR, SELF-HELP, CURIOSITY]
Term: [TERM]
Who writes it: [TEACHER]

Write:
1. A one-page progress note with five areas, each with: what we observed this term, one example, and one thing we will work on next term.
2. A bank of 15 example sentences that describe behaviour without labelling the child - the difference between 'is aggressive' and 'sometimes pushes when a toy is taken'.
3. The closing paragraph template for the parent.
4. A note on why 'not yet' is a better phrase than 'weak', and three substitutions to use instead.
5. The escalation line: when a teacher should stop writing and ask the parent to consult a paediatrician or a professional, and the exact words to use.

Rules: no marks, no grades, no comparison. No diagnosis of any kind.
Output: the five items.

NOTE Describe what you saw, not what you concluded. The parent will do the concluding.

78 The difficult developmental conversation

Use when: The conversation no owner wants, and every good school eventually has.

PROMPT

You are an early-childhood adviser in India. Write a script for a conversation with a parent about a developmental concern.

Child: [AGE]
What we have observed: [SPECIFIC, DATED EXAMPLES]
What we have already tried: [LIST]
Who else is involved: [SPECIALIST, IF ANY]
Setting: [PRIVATE MEETING]

Write:
1. The opening two sentences that frame the meeting as partnership, not verdict.
2. How to present three concrete observations with dates, without labels.
3. What to say when the parent becomes defensive or upset, in three steps.
4. The referral language: how to suggest a paediatrician or a developmental specialist without diagnosing.
5. What the school will do in the classroom regardless of the outcome.
6. The written summary to send after the meeting.
7. A note on the boundary: what a school may never say, and why 'we think your child has...' is out of bounds.

Rules: no diagnosis, no prognosis, no comparison with other children. Compassionate, factual.
Output: the seven items.

NOTE Bring dates and examples. A parent can argue with an opinion, not with a date.

79 The fee reminder and the family in difficulty

Use when: Two different messages. Sending the wrong one costs you a family.

PROMPT

You are an administrator in an Indian preschool. Write the fee reminder set.

Fee: [AMOUNT], due [DATE]
Grace period: [DAYS]
Payment methods: [DETAIL]
Policy on arrears: [WHAT I WILL AND WILL NOT DO]

Write:
1. The standard reminder, day 3 and day 10 - short, neutral, with the amount and the UPI details.
2. The message for a parent who says money is tight this month: what to offer, what not to offer, and the one condition to attach.
3. The message for a parent who has stopped responding.
4. The final notice, stating the policy exactly as written, with a named person to call.
5. A note on the one conversation to have in person rather than on WhatsApp, and why.
6. A note on dignity: how to keep a family's difficulty private in a school where everyone knows everyone.

Rules: no threats beyond the written policy. No mention of fees in a class group.
Output: the six items.

NOTE Offer a plan, not a waiver. A plan keeps the child in school.

80 The exit interview

Use when: Every family that leaves is a free audit. Most schools never ask why.

PROMPT

You are a school improvement adviser in India. Write an exit conversation for a family leaving mid-year.

Child: [AGE], joined [DATE], leaving [DATE]
Reason given: [WHAT THEY SAID]
What we suspect: [HONEST]
Who will speak to them: [OWNER / TEACHER]

Write:
1. The call opening that makes an honest answer possible.
2. Five questions, in order, moving from easy to revealing - including 'what would have had to be different for you to stay?'
3. What to do when the reason given is not the real reason.
4. The written record: what to note and where to keep it.
5. The closing message to send after they leave, which keeps the door open.
6. A simple quarterly pattern review: what to count across exits and what the counts usually mean.

Rules: no defensiveness, no counter-arguments during the call, no pressure to stay.
Output: the six items.

NOTE Stay quiet after question five. The pause is where the truth comes out.

PART 9

Teachers, Safety & Compliance

PROMPTS 81-90

Admissions promises are kept or broken by staff. A parent who sees the same teacher every month for three years is a referral engine; a parent who sees four teachers in a year starts looking. This part covers hiring, induction, ratios, the daily safety routine, and the staff conversations that keep a small school stable.

81 The teacher job description

Use when: A vague advertisement brings vague applicants, and you will interview twenty of them.

PROMPT

You are an HR adviser for Indian preschools. Write a job description for an early-years teacher.

Role: [PROGRAMME, AGE GROUP]
Qualification we require: [FOR EXAMPLE, NTT / D.El.Ed / Montessori diploma / ECCE certificate]
Experience: [RANGE]
Timings: [DETAIL]
Salary range: [RANGE]
Ratio and class size: [NUMBERS]
What the role actually involves: [DAILY TASKS]

Write:
1. The job description: the role in one line, the six daily responsibilities, the three things the teacher owns, the qualifications and experience, the timings and salary range, and what we offer (training, leave, a stable team).
2. A version for a WhatsApp or Instagram job post, under 120 words.
3. The five screening questions to ask on the first call, before an interview.
4. A note on the two things to state clearly in the advert that reduce wasted interviews.
5. A note on verifying qualifications and the staff declaration a school should collect.

Rules: no requirement a good candidate could not meet. No discriminatory criteria.
Output: the five items.

NOTE Name the age group in the advert. Half the applicants will rule themselves out.

82 The interview question set

Use when: Behavioural questions reveal more than 'why did you choose teaching?'

PROMPT

You are an HR adviser for Indian preschools. Write an interview question set for an early-years teacher.

Role: [PROGRAMME]
Class size: [NUMBER]
Ratio: [RATIO]
Common challenges in our school: [LIST]

Write:
1. Twelve questions, grouped: four on working with children (with a scenario each), four on parents, two on colleagues and supervision, two on safety and boundaries.
2. For each: what a strong answer includes, and the warning sign in a weak one.
3. Three scenario questions set in an Indian classroom (a child who cries all morning, a parent who accuses the teacher of neglect, a child who does not eat).
4. A practical task: a 15-minute activity the candidate teaches to two staff members acting as children, and the four things to observe.
5. A note on the child-safety questions every preschool must ask and record, including the declaration a candidate should sign.

Rules: no question about marriage, pregnancy, caste, religion or family plans.
Output: the five items.

NOTE Ask every candidate the same questions. Comparison is the whole point.

83 The induction plan

Use when: A new teacher's first week decides whether she stays for two years.

PROMPT

You are an early-years trainer in India. Write a first-week induction plan for a new teacher.

School: [NAME]
Class she joins: [PROGRAMME, AGE]
Class size and ratio: [NUMBERS]
What she needs to know on day one: [LIST]
Who mentors her: [ROLE]

Write:
1. A day-by-day plan for the first five days: what she observes, what she does, who she shadows, and what she is responsible for by Friday.
2. The ten things she must know before meeting a parent.
3. A one-page 'our way of doing things' note: how we greet children, how we handle crying, how we speak about children in front of them, how we handle a toileting accident.
4. The three-week check-in questions.
5. The safety and boundaries briefing: pick-up rules, physical contact, photography, one-to-one time, and what to do if a child discloses something at home.
6. A note on the induction mistake that causes early attrition.

Rules: no expectation that a new teacher handles a parent complaint alone in week one.
Output: the six items.

NOTE Shadow for two days before you are given the class. Non-negotiable.

84 The staffing and ratio planner

Use when: You cannot sell seats you cannot staff, and you cannot staff what you have not counted.

PROMPT

You are an operations adviser for Indian preschools. Build a staffing planner.

Programmes and current children: [LIST WITH NUMBERS]
Ratio we follow: [RATIO]
Staff today: [ROLES AND NUMBERS]
Timings: [DETAIL]
Leave pattern: [WHAT HAPPENS WHEN A TEACHER IS ABSENT]
Daycare hours: [YES/NO, DETAIL]

Write:
1. A table showing children per programme, teachers needed at my ratio, caregivers needed, and the gap.
2. The hiring trigger: at how many additional children do I hire the next teacher, and what that means for the fee.
3. A leave-cover plan that does not break the ratio, including the substitute list.
4. The three staffing mistakes that cause safety incidents in small Indian preschools.
5. A note on the NCPCR play school norms for staffing (one teacher per 20 children and one caregiver per 20 children) and how to check what my state requires.

Rules: no assumption that a state rule equals the central guideline - tell me to verify locally.
Output: the five items.

NOTE Count the ratio at 10 am, not on paper. That is when everyone is in the room.

85 The daily safety checklist

Use when: Fifteen minutes in the morning, signed, every day. This is what an inspector and a parent both want to see.

PROMPT

You are a school safety adviser in India. Write a daily opening and closing safety checklist for a preschool.

Spaces: [CLASSROOMS, PLAY AREA, WASHROOM, KITCHEN, STAIRS, GATE]
Equipment: [CCTV, FIRE EXTINGUISHER, FIRST AID, WATER]
Staff: [NUMBER]
Who signs: [ROLE]

Write:
1. The opening checklist, 12 items, each a yes/no a person can verify in seconds (gates, sharp edges, electrical points, water, washroom soap, first aid stock, fire extinguisher pressure, CCTV recording, food temperature, toys intact, floor dry, register ready).
2. The closing checklist, 8 items.
3. The weekly and monthly items (drills, pest control, deep clean, equipment check).
4. The signature block and where the file lives.
5. A note on the three items most often skipped and what skipping them has cost schools.
6. A one-line message to parents, once a term, telling them this routine exists.

Rules: only checks a small school can actually complete in 15 minutes.
Output: the six items.

NOTE A checklist that takes an hour is a checklist nobody does.

86 The CCTV and data policy

Use when: Cameras protect children. Handled badly, footage and parent data create real legal exposure.

PROMPT

You are a data-protection adviser for Indian small institutions. Write a plain-English CCTV and data policy for a preschool.

Cameras: [WHERE]
Recording and retention: [DURATION]
Who can view: [ROLES]
Parent requests: [WHAT WE DO]
Data we hold: [ADMISSION FORMS, PHOTOS, MEDICAL NOTES, FEES, CCTV]
Where it is stored: [PAPER, PHONE, CLOUD]

Write:
1. The policy in seven short clauses a parent can read in two minutes: what is recorded, why, who views it, how long it is kept, what parents may request and how, what is never shared, and who to contact.
2. The answer to 'can I see the CCTV footage?' - a script that is firm, kind, and explains the rule that protects every child.
3. The answer to 'please send me the video of my child'.
4. A short data-handling note for staff: where parent details may not be kept (personal phones, personal WhatsApp, unsecured sheets).
5. A note on the Indian legal position: the DPDP Act 2025 applies to personal data of children with special protections, and school owners should take professional advice on their obligations.
6. The one-page consent line to add to the admission form.

Rules: no legal advice presented as certain. Point me to professional advice on compliance.
Output: the six items.

NOTE Never share footage showing another child. That single rule prevents most disputes.

87 The staff declaration and verification file

Use when: The paperwork that protects a child, and protects you if anything is ever alleged.

PROMPT

You are a school compliance adviser in India. Build the staff verification file for a preschool.

Staff: [ROLES]
What we already collect: [LIST]
Who maintains the file: [ROLE]

Write:
1. The full list of documents to keep for each staff member: identity, address, qualification certificates, previous employment reference, and the declarations that apply to people working with children.
2. A one-page staff declaration form covering: no conviction under child-protection laws, agreement to the school's child-safety policy, agreement to the photography and physical-contact rules, and acknowledgement of the complaint procedure.
3. A verification checklist with who checks what and when it is renewed.
4. The induction briefing note: five rules of conduct with children, in plain language.
5. A note on the legal framework a school owner should discuss with a lawyer - POCSO obligations, mandatory reporting duties, and the NCPCR guidelines for play schools.
6. A reminder line for the file: what to do the day a concern is raised.

Rules: do not draft legal text. Tell me clearly which parts need a lawyer's review.
Output: the six items.

NOTE Every adult in the building, including support staff and drivers, needs a file.

88 The complaint handling SOP

Use when: Most complaints escalate because nobody owned them in the first hour.

PROMPT

You are a school administrator in India. Write a complaint handling procedure for a preschool.

Complaints we receive: [LIST]
Who receives them: [ROLE]
Escalation: [OWNER]
Response time we can promise: [HOURS]

Write:
1. The five-step procedure: receive, acknowledge, investigate, respond, close - with the time limit for each.
2. The acknowledgement message, under 50 words, that calms a parent immediately.
3. The investigation note format: what was asked, of whom, what was found, what was decided.
4. The response template for a complaint that is upheld, one that is partly upheld, and one that is not upheld.
5. The complaint register columns and the monthly review question.
6. A note on the two complaints that must go straight to the owner and never be handled by the class teacher.
7. The line that must never be used: 'we will look into it' with no date.

Rules: every complaint gets a named owner and a date.
Output: the seven items.

NOTE Acknowledge within the hour, even if you have no answer yet.

89 The monthly staff meeting

Use when: Forty-five minutes, once a month, with an agenda that is not a complaint session.

PROMPT

You are an early-years manager in India. Write a monthly staff meeting agenda for a small preschool.

Team: [NUMBER AND ROLES]
Current issues: [LIST]
Time available: [MINUTES]
Term focus: [WHAT WE ARE WORKING ON]

Write:
1. A 45-minute agenda with timings: numbers first (attendance, enquiries, incidents), one teaching topic, one safety topic, one parent-communication topic, and a five-minute open floor.
2. The one-page numbers sheet to bring.
3. A rotating 10-minute training slot for the year: twelve topics a preschool team actually needs, in the order to teach them.
4. Three ways to make a quiet team speak, and one way to stop one person dominating.
5. The follow-up note to send within 24 hours: decisions, owners, dates.
6. A note on the meeting habit that destroys trust - raising individual performance issues in front of the team.

Rules: no meeting without an agenda sent a day earlier.
Output: the six items.

NOTE Numbers first, always. It stops the meeting becoming a mood.

90 The retention conversation

Use when: Replacing a teacher costs you a term of trust with parents. A twenty-minute conversation costs nothing.

PROMPT

You are an HR adviser for Indian small schools. Write a retention conversation for a preschool owner.

Teacher: [ROLE, YEARS WITH US]
Signs I have noticed: [LATE ARRIVALS, QUIETNESS, COMPLAINTS, RESIGNATION RUMOUR]
What we can offer: [TRAINING, SALARY REVIEW, HOURS, ROLE CHANGE]
What we cannot offer: [BE HONEST]

Write:
1. The opening that is not an interrogation.
2. Five questions that surface the real reason people leave small schools in India.
3. How to respond to each of the four most common reasons (salary, workload, a difficult parent, a better offer) - with what you can and cannot promise.
4. The stay conversation: what to agree in writing within 48 hours.
5. The graceful exit conversation, if she is leaving anyway - including how to protect the children's routine and what to tell parents.
6. A note on the one promise never to make to keep a teacher.

Rules: no promise you cannot keep for a year. No guilt.
Output: the six items.

NOTE Ask 'what would make next month easier?' before you ask 'are you leaving?'

PART 10

Admissions Operations & the Numbers

PROMPTS 91-100

Most owners know how many children they have and nothing else. The schools that fill seats every year know four numbers: enquiries, visits, enrolments and the reason each family was lost. This part builds the register, the follow-up sequence, the referral engine and the fifteen-minute weekly review that keeps a season on track.

91 The enquiry register

Use when: One sheet, six columns, updated daily. Everything else in this part depends on it.

PROMPT

You are an admissions systems adviser for Indian preschools. Design the enquiry register.

Enquiries per week in season: [NUMBER]
Channels: [WALK-IN, PHONE, WHATSAPP, INSTAGRAM, GOOGLE, REFERRAL, ADS]
Who updates it: [PERSON]
Tool: [PAPER / GOOGLE SHEETS / EXCEL]

Write:
1. The exact columns, in the order they should be filled, with the data type for each.
2. The four fields to fill at first contact and the three to fill after the visit.
3. A status list of no more than seven options, with the definition of each.
4. The lost-reason list: eight reasons, phrased so they are useful later.
5. A daily 10-minute routine and a weekly 15-minute routine.
6. The four numbers to read every Monday and what each tells you.
7. A note on the Indian data-privacy basics for parent contact details, including who may see the sheet.

Rules: usable on paper. No paid software.
Output: the seven items.

NOTE One lost-reason field will tell you more than a year of guessing.

92 The funnel maths

Use when: How many enquiries do you need to fill thirty seats? Guess and you will run out of season.

PROMPT

You are an admissions analyst for Indian preschools. Build the funnel maths for my school.

Seats to fill: [NUMBER]
Last season: enquiries [NUMBER], visits [NUMBER], enrolments [NUMBER]
Current conversion: [IF KNOWN]
Season length: [WEEKS]

Write:
1. My current enquiry-to-visit and visit-to-enrolment rates, calculated from the numbers above, with the arithmetic shown.
2. The enquiries needed this season to fill the seats, with a 20% buffer for families who change their mind.
3. The enquiries needed per week.
4. The effect of three improvements, each calculated separately: reply time down to under an hour, visit design, and a seven-day follow-up sequence - showing how many extra enrolments each produces at my current numbers.
5. The three assumptions that would break this model, and how to check them in the first fortnight.
6. A one-page worksheet I can reuse next season with blank fields.

Rules: show every calculation. If my numbers are missing, use clearly labelled industry ranges and say so.
Output: the six items.

NOTE Thirty seats usually needs well over a hundred quality enquiries. Plan for that.

93 The seven-day follow-up sequence

Use when: Most enrolments are lost in the gap between visit and decision. This sequence fills it.

PROMPT

You are an admissions adviser for Indian preschools. Write a seven-day follow-up sequence for parents who have visited.

School: [NAME], [LOCALITY]
Programmes: [LIST]
Seats left: [NUMBERS]
What parents liked most often: [LIST]
Who sends: [PERSON]

Write five messages across seven days:
- Day 0 evening: the visit recap with one specific detail they said.
- Day 2: something useful with no ask (a photo of the classroom, a one-line tip, an answer to a question they asked).
- Day 4: the teacher introduction or a short video of a typical morning.
- Day 6: the practical close - fee sheet, documents, visit slot, or a call offer.
- Day 7: the polite final check-in that leaves the door open.

For each: under 90 words, the exact words, and what to do if there is no reply.
Then add: the rule on how many messages is too many, and the point at which a lead should move to next season rather than keep receiving messages.
Rules: no invented scarcity, no guilt, no 'just following up'.
Output: the five messages plus the notes.

NOTE Day 2 message with no ask is the one that gets replies.

94 The lost-lead revival

Use when: Every season leaves a pile of families who visited and chose elsewhere. Most are still contactable.

PROMPT

You are a marketing adviser for Indian preschools. Build a lost-lead revival campaign.

Lost leads last season: [NUMBER]
Reasons recorded: [LIST]
What has changed since: [NEW FACILITY, NEW TEACHER, NEW PROGRAMME, FEE CHANGE]
Timing: [MONTH]

Write:
1. A revival message that is not a sales message: acknowledge the past decision, share what has changed, and ask one question.
2. Three versions by reason for loss (price, distance, chose a chain, joined late).
3. The follow-up for anyone who replies, and the one for silence.
4. A note on when revival is welcome and when it feels intrusive, with the one-month rule.
5. The register columns to track revival separately from new enquiries.

Rules: no pretending the earlier decision did not happen. No discounts as the opening line.
Output: the five items.

NOTE Families who chose a chain often come back at the sibling. Stay in touch.

95 The referral programme

Use when: A parent's recommendation is the only marketing in India that still works better than ads.

PROMPT

You are a growth adviser for Indian preschools. Design a referral programme that is ethical and cheap.

Current parent families: [NUMBER]
What we can offer: [FEE CREDIT, GIFT, EVENT INVITE, NOTHING]
What is allowed by our fee policy: [POSITION]
Referrals last year: [ESTIMATE]

Write:
1. Three programme options with the real cost of each, and a recommendation.
2. The ask: the exact words to use with a happy parent, and the moment in the year to use them.
3. The thank-you message when a referral joins, and the one when a referral only visits.
4. A simple tracking sheet.
5. The rules that keep it honest: no payment for reviews, no pressure on parents to refer, no using children's friendships as leverage.
6. A note on the one referral source schools forget - the families who left on good terms.

Rules: no incentive that could look like buying a review or a testimonial.
Output: the six items.

NOTE Ask at the happiest moment, which is usually the annual day, not the fee reminder.

96 The seat inventory and waitlist

Use when: Knowing exactly which seats are left, by programme, prevents both overselling and empty rooms.

PROMPT

You are an operations adviser for Indian preschools. Build a seat inventory and waitlist.

Programmes and capacity: [LIST]
Confirmed admissions: [NUMBERS]
Enquiries in progress: [NUMBERS]
Staff per class: [NUMBERS]
Session start: [DATE]

Write:
1. The inventory sheet: programme, capacity, confirmed, held, enquiries live, seats free, staff required, staff available.
2. The rule for when a programme is 'full', and how to communicate that without losing the family.
3. The waitlist process: how to offer a place, how long to hold it, and the message to send.
4. The message for a parent when a programme is full but a seat may open in April.
5. A note on the overselling mistake and what it costs in the first week of session.
6. A weekly update line you can send to the owner or partner in one minute.

Rules: no fake waitlist. Only list families who have agreed to be on it.
Output: the six items.

NOTE Hold one seat per class beyond confirmed numbers. Somebody always moves city in May.

97 The fifteen-minute weekly review

Use when: Four numbers, one page, same time every week. This is how a season stays on track.

PROMPT

You are an admissions analyst for Indian preschools. Write a weekly review for an owner who has fifteen minutes.

Season: [DATES]
Seats to fill: [NUMBER]
Current position: [ENQUIRIES, VISITS, ENROLMENTS]
Who attends: [PEOPLE]

Write:
1. The one-page review: four numbers this week against last week, the funnel conversion, the seats left, and the one thing that went wrong.
2. Five questions to answer every week, in order.
3. The three actions to choose from when the numbers are behind, ranked by cost and speed.
4. The message to send the team on Monday morning: three lines, one priority.
5. A note on the metric most owners watch that does not matter, and the one they ignore that does.

Rules: no dashboards, no software. One page, one pen.
Output: the five items.

NOTE If enquiries are fine and visits are low, the problem is reply speed. Not the ads.

98 The season debrief

Use when: Ten questions at the end of the season, written down, are worth more than next year's plan.

PROMPT

You are a school strategy adviser in India. Write an end-of-season debrief for a preschool.

Season: [DATES]
Enquiries, visits, enrolments: [NUMBERS]
Channels that produced enrolments: [LIST WITH NUMBERS]
Reasons for loss: [LIST WITH COUNTS]
What we spent: [AMOUNT]

Write:
1. Ten debrief questions, in the order that produces insight: numbers, channels, the visit, the follow-up, the fee, the staff, the timing, the competitor landscape, the surprises, and what to stop doing.
2. A one-page summary format that takes 30 minutes to fill.
3. How to decide which two channels to keep and which to drop, using cost per enrolment rather than cost per lead.
4. The carry-forward list: what to start in June for next season.
5. A note on the one number most schools never record, and why it is the most useful of all.

Rules: no conclusions without the numbers behind them.
Output: the five items.

NOTE Cost per enrolment, not cost per lead. Leads are cheap; seats are not.

99 The next-season pre-launch plan

Use when: Between sessions is when the next season is actually won.

PROMPT

You are a preschool marketing consultant in India. Build a June-to-September pre-launch plan for the following season.

School: [NAME], [LOCALITY]
Seats to fill next season: [NUMBER]
Assets to build: [PROFILE, WEBSITE, PHOTOS, FILM, TESTIMONIALS, FEE SHEET]
Staff available: [NUMBER]
Budget: [AMOUNT]

Write:
1. A month-by-month plan for four months, with one major output per month and the reason it must happen then.
2. The summer-camp or holiday-programme idea that produces next season's enquiries, with a one-page plan.
3. The pre-launch checklist: the ten things that must be ready before the first enquiry arrives.
4. The message to send to existing parents in September, before the season opens.
5. A note on the timing of fees, staff hiring and admissions so that none of the three collides.

Rules: no ad spend before the profile, page and follow-up system exist.
Output: the five items.

NOTE A summer programme in May is the cheapest enquiry source of the year.

100 The annual marketing budget

Use when: One page, in rupees, with what you expect back from each line.

PROMPT

You are a small-business finance adviser in India. Build an annual marketing budget for a preschool.

Seats: [NUMBER]
Fee per month: [AMOUNT]
Current spend: [LIST WITH AMOUNTS]
What has worked: [LIST]
What has not: [LIST]

Write:
1. A one-page budget with four lines: free assets (time), content production, local listings and print, and paid ads - with a rupee figure against each.
2. The expected enrolments from each line, using conservative and optimistic numbers, and the cost per enrolment that results.
3. The rule for the maximum you should spend to acquire one child, given my fee and average stay of three years.
4. The three lines to cut first if the season starts badly.
5. A monthly cash-flow view across the year, showing the months where spend and income do not align.
6. A note on what to do with the budget if enquiries arrive but visits do not.

Rules: show the arithmetic. Do not assume ad performance you have not seen.
Output: the six items.

NOTE Three years of fees is what a seat is worth. Spend against that, not against one month.

A

APPENDIX A

The 2027-28 Admissions Calendar

The Indian preschool year runs on a predictable clock. Parents research from October, visit through December and January, and decide by March. The dates below are the pattern most Indian cities follow; the Delhi entry-level schedule is shown as a worked example of how a state government sets its own window. Confirm your own state's notification each year.

MONTH	WHAT PARENTS ARE DOING	WHAT YOU DO
October	Starting to notice schools. Searching "play school near me". Asking in society WhatsApp groups.	Complete the Google profile. Shoot 20 photos. Ask five current parents for reviews. Fix the fee sheet and one-pager.
November	Shortlisting. Calling two or three schools. Comparing fees.	Publish the locality page. Run the first open day. Start the Friday parent update. Reply within the hour, every time.
December	Visiting. Some cities open government and private entry-level registrations in early December.	Peak visit month. Two open days. Every visit followed up the same evening. Staff briefed on the 30-minute flow.
January	Deciding. Families visit a second time, often with grandparents. First selection lists appear in some cities.	Second visits, teacher introductions, trial mornings. Hold seats with a written policy. Start the referral ask.
February	Finalising. Late movers. Some families are on waitlists elsewhere.	Convert the held seats. Follow up on every "we will discuss at home". Publish the fee revision for the following year if any.
March	Last-minute admissions. Families relocating or transferring.	Close the season. Late-admission message. Waitlist offers. Debrief while it is fresh.
April	Session begins in most states. Settling-in period.	Welcome packs out. First-week messages running. Enquiry register resets for next season.
May-June	Summer break. New families moving into the area.	Summer camp or holiday programme as an enquiry engine. Build assets for next season. Staff training.
July-September	Quiet for admissions. A few transfer enquiries.	Profile maintenance, reviews, content bank, website fixes, pre-launch plan for the next cycle.

> **Worked example - Delhi, 2026-27 entry level.** The Directorate of Education set the application window at 4 to 27 December 2025, with the first list on 23 January, a second list on 9 February, and the process closing on 19 March. Delhi also capped the registration fee at Rs 25 and barred capitation fees. Your city will publish its own dates; the shape of the calendar is the same.

B

APPENDIX B

The NCPCR Play School Norms - Your Trust Checklist

The National Commission for Protection of Child Rights published Regulatory Guidelines for Private Play Schools in 2017, covering children aged three to six. They are guidelines for states to adopt or notify, and only some states have formal preschool rules. Even where they are not yet mandatory, they are the checklist a careful parent and a careful inspector both use. Confirm your own state's position with the district authorities.

AREA	WHAT THE GUIDELINES SAY
Age of admission	No child below three years should be admitted to a play school. The guidelines cover ages three to six.
Screening	No capitation fee, and no screening procedure for the child or the parents at admission.
Fees	Fees to be regulated by the appropriate government and collected monthly or quarterly only.
Staff ratio	One teacher for 20 children and one caregiver for 20 children, plus adequate staff for hygiene, sanitation and safety.
Building	Boundary wall or fencing, ventilation, a separate rest room, barrier-free access, child-friendly and disabled-friendly toilets, low-level washbasin, potable water, play area, CCTV with data security, fire safety measures, periodic pest control.
Hours	Three to four hours of activities a day, as a non-residential facility.
Health	First aid and medicine kit with bandages, cotton, disinfectant, ORS, scissors, thermometer and antiseptic ointment; quarterly health check-up by a registered medical practitioner.
Records	Enrolment forms, admission register with both parents' details, children's attendance, staff attendance, health check records, stock register, fee record.
Parents	A Parent Teacher Association constituted within a month of admission, 75% parents (at least half mothers) and 25% teachers, meeting monthly with recorded proceedings.
Conduct	No physical punishment and no mental harassment of any child.
Completion	Pre-school education completes at six years; no child should be held back in a play school after six, and no exam or test should be conducted.
Staff checks	Declarations from staff that they have not been convicted under child-protection laws, and trained teachers and caregivers as prescribed.

> **How to use this page.** Walk your own school against each line and mark it green, amber or red. Put the three reds into the 30-day plan in Appendix G. Then photograph or document each green, because "we follow the guidelines" means nothing to a parent unless you can show it on a walk-through.

C

APPENDIX C

Ages, Classes and the Foundational Stage

The National Education Policy 2020 restructured the early years into a foundational stage of three years of pre-primary before Class 1, with Class 1 entry at age six. States are moving at different speeds. Delhi is the clearest published example, and it matters commercially: from 2027-28, Delhi schools introduce Lower KG and Upper KG as formal classes, which means three-year preschool journeys rather than two.

CLASS	AGE AS ON 31 MARCH	NOTES
Nursery (Balvatika 1 / Pre-school 1)	3+ to 4 years	The entry point. A child entering Nursery at 3+ reaches Class 1 at 6+.
Lower KG (Balvatika 2 / Pre-school 2)	4+ to 5 years	Introduced in Delhi from the 2027-28 session. New admissions allowed at 4+.
Upper KG (Balvatika 3 / Pre-school 3)	5+ to 6 years	Introduced in Delhi from the 2027-28 session. New admissions allowed at 5+.
Class 1	6+ to 7 years	Uniform age of 6+ implemented from 2026-27 onwards, in phases.

The phase-in, as published by the Delhi Directorate of Education. The restructuring takes effect from 2026-27, when Lower KG and Upper KG do not yet exist as separate classes and Nursery children are promoted to KG. From 2027-28, Lower KG and Upper KG are introduced, so a family joining Nursery in 2027-28 can stay for three years before Class 1. The head of school may relax the age limit by up to one month at either end. Students with a valid School Leaving Certificate and mark sheet from a recognised school are exempt from the age criteria when moving up a class.

What this means for your admissions pitch. For the 2027-28 season you can sell a three-year journey - Nursery to Upper KG - and name the schools your last two batches moved on to. Very few competitors say this out loud, and it answers the question every parent is really asking: what happens after this?

Verify locally. Other states have their own notifications and their own pace. Ask your district education office what applies to your state for the session you are selling, and never quote another state's rule as if it were yours.

D

APPENDIX D

The Funnel Worksheet

Fill this in with last season's real numbers. If you do not have them, start recording from today - the register in Prompt 91 is what makes this page possible next year. The worked example uses conservative industry ranges and is labelled as an example, not as a promise.

LINE	YOUR NUMBER	HOW TO READ IT
Seats to fill this season	____	Capacity minus returning children.
Enquiries received	____	Every parent who asked anything, on any channel.
Visits done	____	Only actual visits, not promised ones.
Enrolments confirmed	____	Fee paid or token received.
Enquiry to visit rate	____%	Visits / enquiries. Low here means slow replies or a weak first message.
Visit to enrolment rate	____%	Enrolments / visits. Low here means the visit or the follow-up, not the marketing.
Enquiries needed to fill seats	____	Seats / (enquiry-to-visit x visit-to-enrolment), plus a 20% buffer.
Enquiries needed per week	____	Divide by the number of weeks left in the season.
Cost per enquiry	Rs ____	Total marketing spend / enquiries.
Cost per enrolment	Rs ____	Total marketing spend / enrolments. This is the number that decides your budget.

Worked example, for illustration only. Thirty seats. An enquiry-to-visit rate of 60% and a visit-to-enrolment rate of 40% gives 24% overall, so thirty seats needs about 125 enquiries, or roughly 156 with a 20% buffer. Across a 20-week season that is eight enquiries a week. If your visit-to-enrolment rate is 20%, the same thirty seats needs 250 enquiries - which is why the visit and the follow-up are worth more attention than the ad budget.

The one number to watch weekly. Visits booked, not enquiries received. Enquiries flatter; visits predict.

E

APPENDIX E

The AI Tool Stack, With India Prices

You do not need a subscription to use this pack. A free plan will run most of the prompts. But if you are paying, pay for one tool, not four. Prices below are the India listings as published by each vendor in October and November 2026, in rupees where the vendor bills in rupees. Prices change; check at checkout.

TOOL	PLAN AND INDIA PRICE	WHAT IT IS GENUINELY GOOD AT FOR A PRESCHOOL
ChatGPT	Free; Go Rs 399/month; Plus Rs 1,999/month (GST included)	The all-rounder. Best starting point for every prompt in this pack. Go is enough for WhatsApp replies and captions; Plus helps with longer documents like the handbook and the brochure.
Google Gemini	Free; Google AI Plus Rs 399/month; Google AI Pro Rs 1,950/month	Best if your school already lives in Gmail, Docs and Drive. Strong on images, which helps with the brochure and carousel slides. Check whether you already get it bundled with your phone or broadband plan before paying.
Claude	Free; Pro around Rs 1,999/ month on the India App Store	Best for long, careful writing - the parent handbook, the policy set, the founder's note. Holds a long conversation without losing the thread.
Canva	Free; Pro Rs 500/month or Rs 4,000/year	Where the one-pager, brochure, fee sheet and Instagram posts actually get made. Free tier is enough to start; Pro is worth it once you are producing monthly.
WhatsApp Business	Free app	Quick replies, labels, catalogue and the away message. The most important tool on this list and the only one you should set up today.
Google Business Profile	Free	Your shopfront for "preschool near me". Part 6 of this pack is a full hour of work that costs nothing.

> **The one-tool rule.** Pick one assistant, learn its habits for a month, and keep your best prompts in a single note on your phone. Switching tools every week is how owners end up with twenty half-used subscriptions and no system.

> **What not to pay for yet.** Do not buy an admissions CRM, a school ERP or a "guaranteed leads" package in your first season. The register in Prompt 91 and a Google Sheet will do the same job until you have more than 150 enquiries a season.

F

APPENDIX F

The Verification Checklist

AI drafts; you verify. An assistant will invent a fee, a CCTV retention period, a state rule or a parent testimonial if you let it. Run every draft through these ten rules before it reaches a parent.

1. **Every number is yours.** Fees, ratios, timings, distances and dates must come from you, not from the model. If a number appeared in a draft you did not supply, delete it.
2. **No invented facilities.** If you do not have a nap room, a kitchen, a bus or an air-conditioned hall, the word must not appear anywhere in your material.
3. **No invented proof.** No testimonial, review, award, certification, parent count or "500 happy families" unless you can produce the evidence in ten seconds.
4. **Age rules are state rules.** Never quote NEP, NCPCR or another state's circular as if it were your own state's requirement. Ask your district education office.
5. **Health and development are not yours to diagnose.** No AI draft should name a condition, suggest a treatment or predict a child's future. Refer to a paediatrician or a specialist.
6. **Children's images need specific consent.** A consent for internal photographs is not a consent for Instagram. Check the consent bundle (Prompt 47) before every post.
7. **Never publish a child's name with a photograph**, and never describe a behaviour in a way that identifies a child to other parents.
8. **No comparison with a named competitor.** Ask good questions instead and let the parent compare.
9. **No promise of a seat, a discount or an outcome** unless it is written in your own policy document that day.
10. **Read it out loud.** If a sentence does not sound like something you would say at the gate, rewrite it. A parent can hear a machine in one line.

> **The three-minute test.** Before you send anything: does every fact in this message come from me? Would I say this to a parent's face? Would I be comfortable if another parent forwarded it to ten others? If all three answers are yes, send it.

G

APPENDIX G

The 30-Day Ramp-Up Plan

One action a day for a month. By day 30 you will have a complete profile, a designed visit, a fee sheet, a follow-up system and a content bank - which is everything this pack needs to work. Do not skip to the ads.

DAY	ACTION	DAY	ACTION
1	Run Prompt 51. Write down the five biggest gaps in your Google profile.	16	Do the funnel maths (Prompt 92). Write the number of enquiries you need per week on the wall.
2	Fix the profile: category, hours, phone, address, website link. Prompts 52 and 53.	17	Write the seven-day follow-up sequence (Prompt 93) and save all five messages.
3	Shoot the first ten photos from the list in Prompt 60. Daylight, phone, tidy rooms.	18	Write the same-evening visit message (Prompt 30).
4	Ask five happy parents for a review in person, send the link the same afternoon (Prompt 56).	19	Write the 24-hour recap (Prompt 20) and the 'what I heard' summary (Prompt 14).
5	Pre-fill eight questions and answers in the profile (Prompt 54).	20	Build the consent bundle (Prompt 47) and add it to your admission file.
6	Build the transparent fee sheet (Prompt 31). One page, every rupee.	21	Write the document checklist (Prompt 44) and the admission form (Prompt 43).
7	Write the one-page parent summary (Prompt 41). Print twenty.	22	Write the seat-hold and refund policies (Prompts 33 and 39). Print them.
8	Write the six-question qualification sheet (Prompt 11) and brief whoever answers the phone.	23	Design the three packages or the collection model (Prompts 32 and 35).
9	Build the objection bank (Prompt 15) with the eight objections you actually hear.	24	Write the welcome pack and the first-week messages (Prompts 45 and 72).
10	Write the 10-minute first reply and save it as a WhatsApp quick reply (Prompt 1).	25	Set the three content pillars (Prompt 61) and shoot one morning's footage.
11	Set the greeting and away messages in WhatsApp Business (Prompt 5).	26	Build the 30-day calendar (Prompt 62) and draft eight posts.
12	Design the 30-minute visit flow (Prompt 21). Walk it yourself, timed.	27	Write the WhatsApp broadcast for existing parents (Prompt 66).
13	Brief each teacher on the introduction script (Prompt 22) and rehearse once.	28	Write the locality page copy (Prompt 58) and put it on your site or profile.
14	Set up the activity stations (Prompt 23) with materials you already have.	29	Run the NCPCR checklist in Appendix B. Mark three reds and schedule the fixes.
15	Create the enquiry register (Prompt 91). Paper is fine. Start filling it today.	30	Run the 15-minute weekly review (Prompt 97) and set the same slot for every Monday.

H

APPENDIX H

The One-Page Cheat Sheet

Print this. Stick it where the phone is answered.

1 **Reply inside the hour.** The first reply decides the season. Ten minutes is better. After 9 pm, reply anyway.

2 **Give the full fee in the first message.** Admission, monthly and annual. A surprise in April is a lost family in May.

3 **Ask about the child, not the budget.** Age, locality, what they are worried about. The fee conversation is easier after that.

4 **Book the visit on the call.** Two time options, one confirmed. "I will send slots" loses half of them.

5 **Design the visit.** Thirty minutes, the child touches something in five, the real teacher meets the parent, the fee sheet leaves with them.

6 **Message the same evening.** One specific thing they said, one doubt answered, one next step with a date.

7 **Five follow-ups, seven days, each giving something.** Then stop. Next season is also a lead.

8 **Log every enquiry and the reason for every loss.** The reason column is worth more than any ad report.

9 **Show safety, do not claim it.** The washroom, the gate, the register, the ratio. Parents look hardest at the washroom.

10 **AI drafts, you verify.** Every number yours, no invented proof, no diagnosis, no child's photo without specific consent.

> **The one-line version.** Answer fast, tell the truth about money, design the visit, follow up the same day, and write down why you lost.

PRINT THESE

Worksheets

Three pages to photocopy. Fill them by hand for the first fortnight; you will learn more from these than from any dashboard.

Worksheet 1 - Enquiry register

DATE	PARENT & CHILD AGE	LOCALITY	CHANNEL	PROGRAMME	VISIT DATE	STATUS	LOST REASON

> Status options: new, replied, call done, visit booked, visited, second visit, documents given, seat held, joined, lost.

Worksheet 2 - Objection bank

WHAT THE PARENT SAID	WHAT THEY ARE REALLY ASKING	MY ONE-SENTENCE ANSWER	PROOF I CAN SHOW

Worksheet 3 - The weekly fifteen minutes

QUESTION	THIS WEEK
Enquiries this week (and last week)	
Visits booked and visits completed	
Seats held and seats confirmed	
Enquiry-to-visit rate this season	
Seats left, by programme	
The one thing that went wrong	
The one action for next week	

ONE LAST PAGE

What to do tomorrow morning

If you only do three things from this pack, do these.

1. Set the WhatsApp away message and the greeting message. Prompt 5. It takes fifteen minutes and it works tonight, while you are asleep, on the enquiry you would otherwise have answered at noon tomorrow.

2. Walk your own school for thirty minutes with Prompt 21 in your hand. Time it. Notice what a parent sees at the gate, at the washroom door, and in the first room. Fix the three things that embarrass you.

3. Start the register on the same day. Prompt 91, one page, six columns, filled for every enquiry. In twelve months that sheet will tell you more about your admissions than any consultant could.

The rest of the pack will still be here in February, when you have forty enquiries a week and no time to invent a message. That is what it is for.
